

# CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com  
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-330682401/> | Phone Number: +372 58619311

## PROFESSIONAL SUMMARY

Experienced **Senior Software Engineer** with 9+ years in **Java, Spring Boot, Quarkus, Angular, and React**, building scalable fintech, SaaS, and enterprise solutions. Skilled in **SQL and NoSQL databases, cloud-native architecture** across **AWS, GCP, and Azure**, and container orchestration with **Docker and Kubernetes**. Adept at optimizing system performance, ensuring security compliance, and delivering impactful products in fast-paced Agile environments.

## TECHNICAL SKILLS

- **Languages & Frameworks:** Java, Quarkus, Spring, Spring Boot, JavaServer Faces, React, Angular, JavaScript, TypeScript, Python, C#
- **Databases:** Microsoft SQL, PostgreSQL, MySQL, MongoDB, Redis (SQL & NoSQL)
- **Cloud & DevOps:** AWS, Azure, GCP, Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD pipelines, Terraform
- **Architecture & Practices:** Microservices, REST APIs, Event-Driven Systems, Serverless, Design Patterns, Agile/Scrum, TDD, BDD
- **Other:** Git, Jira, Confluence, JUnit, Mockito

## WORK EXPERIENCE

### Sensidev

#### Senior Software Engineer

September 2021 – December 2025

Timișoara, Romania

- Designed and developed **Java microservices with Spring Boot and Quarkus**, enhancing scalability and reducing API response latency by 40% in fintech transaction systems.
- Built **React and Angular user interfaces** integrated with Java backends, improving user adoption rates by introducing responsive, accessible, and optimized UI components.
- Implemented **PostgreSQL and Microsoft SQL solutions** for large-scale financial datasets, optimizing complex queries to reduce execution time by 55%.
- Designed and maintained **high-availability distributed systems** on AWS and GCP with Kubernetes clusters, ensuring 99.9% uptime for mission-critical banking applications.
- Spearheaded the adoption of **CI/CD pipelines** with GitHub Actions and Jenkins, automating testing and deployments across environments, reducing release cycles by 70%.
- Conducted **security audits and compliance checks** to align with GDPR and financial regulations, introducing secure coding practices and encrypted data pipelines.

- Mentored junior engineers in **Java, React, and database performance tuning**, raising team code quality standards and increasing sprint delivery efficiency.
- Collaborated with cross-functional teams across Europe to deliver **cloud-native fintech solutions**, ensuring seamless scalability for clients handling millions of transactions.

## Syscom Digital

### Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Developed **enterprise-grade Java applications** using Spring and JSF, integrating them with Angular dashboards to support digital marketing analytics platforms.
- Engineered **SQL Server and PostgreSQL database schemas** for high-traffic web apps, introducing indexing strategies that boosted query efficiency by 60%.
- Integrated **REST APIs and event-driven messaging** systems, enabling real-time synchronization of marketing data streams between distributed services.
- Modernized legacy systems by migrating to **cloud-native architectures** on AWS, leveraging Docker containers and serverless components for better scalability.
- Enhanced **frontend performance in Angular** by restructuring component state management, leading to a 35% faster page load experience for clients.
- Strengthened **data privacy and security compliance** by embedding role-based access controls, encrypted storage, and tokenized authentication workflows.
- Optimized **Agile workflows**, collaborating with business stakeholders and designers to ensure sprint deliverables matched evolving client requirements.
- Participated in **peer code reviews, testing automation, and CI/CD improvements**, raising system reliability and reducing production incidents by 45%.

## Soft Build

### Software Developer

June 2016 – July 2019

Timișoara, Romania

- Created **Java and Spring Boot backends** supporting ERP modules, reducing manual processing overhead for manufacturing clients by automating data workflows.
- Developed **interactive React-based dashboards** connected to real-time APIs, delivering operational transparency and performance tracking for clients.
- Implemented **database optimizations** across PostgreSQL and MySQL, refining queries and introducing caching strategies to handle millions of daily records.
- Migrated core business applications into **AWS and Azure cloud platforms**, achieving improved system elasticity and disaster recovery resilience.
- Introduced **Docker-based deployments** and early Kubernetes clusters, reducing onboarding complexity for new developers and stabilizing environments.
- Enhanced **testing coverage** with JUnit and Mockito frameworks, ensuring higher defect detection before deployment, cutting post-release issues by 40%.
- Collaborated on **API-first architectures**, improving maintainability and integration with external vendors across supply chain solutions.
- Contributed to the adoption of **Agile practices and DevOps workflows**, improving project delivery timelines and enhancing client satisfaction scores.

**Decima Digital**  
**Software Developer**  
**November 2015 – April 2016**  
Tallinn, Estonia

- Delivered **Java and JSF-based components** for e-commerce systems, focusing on modular design and maintainability to support scaling digital storefronts.
- Built **RESTful services** for order and customer management, enabling integration with external payment gateways and logistics providers.
- Worked on **PostgreSQL database schemas and stored procedures**, tuning queries for faster performance in customer-facing systems.
- Contributed to **frontend improvements with AngularJS**, implementing UI components for checkout flows and order tracking modules.
- Designed **test automation suites** to validate transactional workflows, ensuring robustness and accuracy across integrations.
- Participated in **agile ceremonies**, supporting sprint planning and retrospectives, ensuring continuous improvement of engineering practices.
- Improved **security standards** by implementing hashed passwords, access control, and basic compliance measures for online payment systems.
- Collaborated with senior developers to migrate components to **microservices architecture**, laying groundwork for system modernization.

**Borna Technology**  
**Software Developer Intern**  
**September 2014 – August 2015**  
Tallinn, Estonia

- Assisted in developing **Java-based web applications** for enterprise clients, learning foundational backend patterns and design principles.
- Built **SQL Server stored procedures and views** to support reporting modules, gaining exposure to real-world database optimization.
- Developed **basic AngularJS interfaces** to extend usability of existing enterprise dashboards for internal stakeholders.
- Collaborated in **API integration tasks**, connecting applications with external vendor systems while ensuring data reliability.
- Wrote **unit tests and documentation**, enhancing team knowledge sharing and ensuring smoother onboarding for new interns.
- Shadowed senior developers in **system debugging and troubleshooting**, gaining early experience in root cause analysis and error handling.
- Participated in **team code reviews**, learning best practices for maintainable, scalable codebases across enterprise projects.
- Contributed to **refactoring initiatives** that improved application performance, reducing response times and enhancing end-user experience.

---

## **EDUCATION**

**Tallinn University**

Bachelor's Degree in Computer Science,  
**2010 – 2014**

---

## CERTIFICATIONS

- ❖ Oracle Certified Professional: Java SE 11 Developer
  - ❖ AWS Certified Solutions Architect – Associate
  - ❖ Google Cloud Professional Cloud Developer
  - ❖ Microsoft Certified: Azure Developer Associate
- 

## PROJECTS

- ❖ **Fintech Transaction Engine:** Designed a **Java + Quarkus microservice platform** deployed on AWS EKS for high-frequency payment processing, handling 50k+ TPS.
- ❖ **Cross-Platform Analytics Dashboard:** Built a **React + Angular UI** connected to Java APIs and PostgreSQL, providing real-time reporting for investment managers.
- ❖ **Banking Compliance Automation:** Implemented **Spring Boot microservices** integrating with SQL Server, automating regulatory reporting for financial institutions.
