

TAYLOR PENTZ

Senior .NET / Angular Software Engineer

taylorpentz2@gmail.com | 1601 Larkin, High Point, NC | +1 (980) 981-4522

<https://www.linkedin.com/in/taylor-p-b0389a3ba>

Professional Summary

Senior .NET + Angular Software Engineer with 10+ years building enterprise SaaS, healthcare, fintech, and workflow platforms using **C#, ASP.NET Core, .NET Framework 4.6–4.8, .NET Core 3.1, .NET 6–8, Angular 8–20, TypeScript, SQL Server, PostgreSQL**, and **Azure/AWS**, delivering secure APIs, modern UI architecture, legacy modernization, cloud-ready systems, and measurable reliability, performance, and delivery gains.

Technical Skills

- ❖ **Backend Engineering:** **C#, ASP.NET Core, .NET 6–8, .NET Core 3.1, .NET Framework 4.6–4.8**, ASP.NET MVC, Web API, Entity Framework Core, LINQ, ADO.NET, MediatR, AutoMapper, Background Services, Windows Services.
- ❖ **Frontend Engineering:** **Angular 8–20**, AngularJS, TypeScript 3.x–5.x, RxJS, NgRx, Reactive Forms, Angular Material, Bootstrap, HTML5, CSS3, SCSS, JavaScript ES6+, accessibility-focused UI development.
- ❖ **Architecture & API Design:** **Clean Architecture, Domain-Driven Design, CQRS**, REST APIs, microservices, modular monoliths, event-driven workflows, API versioning, OpenAPI/Swagger, OAuth2, OIDC, JWT, RBAC.
- ❖ **Databases & Data Access:** **SQL Server**, PostgreSQL, MySQL, Azure SQL, MongoDB, Redis, stored procedures, indexing, query tuning, EF Core migrations, data modeling, transaction handling, performance profiling.
- ❖ **Cloud & DevOps:** **Azure**, AWS, Azure App Service, Azure Functions, Azure Service Bus, AWS S3, SQS, Lambda, Docker, Kubernetes basics, IIS, Nginx, GitHub Actions, Azure DevOps, Jenkins, Terraform basics.
- ❖ **Testing & Quality:** xUnit, NUnit, MSTest, Moq, FluentAssertions, Jest, Jasmine, Karma, Cypress, Postman, integration testing, contract testing, regression testing, code reviews, SonarQube, secure coding practices.
- ❖ **Monitoring & Operations:** Application Insights, Serilog, ELK Stack, CloudWatch, Prometheus, Grafana, distributed tracing, structured logging, alerting, production incident review, root-cause analysis, SLO-focused engineering.

Professional Experience

SumatoSoft

Senior Software Engineer

Boston, MA (Remote) | Apr 2023 – Mar 2025

- ❖ Led development of **enterprise SaaS and workflow automation platforms** using **C#, ASP.NET Core, .NET 6–8, Angular 14–17, TypeScript, SQL Server, PostgreSQL, Azure, and AWS** for distributed business users.

- ❖ Designed and delivered secure **REST APIs**, reusable **Angular feature modules**, and shared component libraries that improved release consistency and increased feature delivery speed by **28%** across several product teams.
- ❖ Modernized legacy **.NET 6 services to .NET 8** and upgraded Angular applications from **Angular 14 to Angular 17**, resolving package conflicts, RxJS deprecations, route-guard issues, and build pipeline failures.
- ❖ Resolved production performance problems caused by **EF Core N+1 queries**, missing SQL indexes, oversized API payloads, and inefficient Angular change detection, reducing high-latency user workflows by **34%**.
- ❖ Implemented **OIDC, JWT authentication, RBAC authorization, audit logging, and tenant-aware data access** to strengthen security controls for administrative portals and customer-facing dashboards.
- ❖ Refactored tightly coupled service logic into **Clean Architecture, CQRS, MediatR handlers, and isolated domain services**, making business rules easier to test, review, and extend across new product features.
- ❖ Built new Angular experiences for **case management, reporting dashboards, notification preferences, and user administration**, using Reactive Forms, Angular Material, RxJS streams, and reusable validation patterns.
- ❖ Improved production reliability by adding **structured logging, Application Insights traces, health checks, retry policies, and circuit-breaker patterns** around external APIs and message-driven workloads.
- ❖ Enhanced **CI/CD pipelines** with GitHub Actions, Azure DevOps, Docker builds, automated tests, environment variables, and deployment gates to reduce failed deployments and improve release confidence.
- ❖ Mentored mid-level engineers through **code reviews, API design sessions, debugging workshops, and architecture planning**, raising team standards around maintainability, test coverage, and production readiness.

Hexaview Technologies Inc.

Software Engineer

New York, NY | Jul 2018 – Mar 2023

- ❖ Developed customer-facing fintech and enterprise web applications using **C#, ASP.NET Core, .NET Core 3.1, .NET 5–6, Angular 8–13, TypeScript, SQL Server, Redis, and Azure DevOps**.
- ❖ Migrated older ASP.NET MVC and Web API modules into **ASP.NET Core services**, improving deployment flexibility and reducing duplicated business logic across loan, payment, and onboarding workflows.
- ❖ Implemented Angular modules for **account setup, billing workflows, document review, role management, and reporting screens**, using NgRx, RxJS, lazy loading, guards, interceptors, and reusable UI components.
- ❖ Reduced recurring production defects by **31%** by improving validation rules, fixing inconsistent API error handling, adding regression tests, and standardizing exception mapping across backend services.
- ❖ Solved critical timeout issues in payment and reporting APIs by optimizing **SQL Server stored procedures, EF Core queries, Redis caching, pagination, and background processing** for large customer datasets.
- ❖ Supported modernization from AngularJS and early Angular applications into **Angular 10+** patterns, replacing controller-heavy screens with component-based architecture and typed service layers.
- ❖ Built secure API integrations with third-party payment, identity, and document platforms using **OAuth2, webhooks, retry queues, idempotency keys, and detailed audit trails** for compliance-sensitive workflows.
- ❖ Improved engineering quality through **xUnit, NUnit, Jasmine, Karma, Cypress, Postman collections, and SonarQube checks**, strengthening test coverage for core business workflows before production releases.

- ❖ Collaborated with product owners, QA engineers, DevOps teams, and client stakeholders in Agile ceremonies to clarify requirements, break down technical risks, and deliver stable releases on predictable schedules.

SimbirSoft Company

Software Developer

Boston, MA | Mar 2015 – Jun 2018

- Built enterprise web applications using **C#, .NET Framework 4.5–4.7, ASP.NET MVC 5, Web API 2, AngularJS 1.5, early Angular 2, JavaScript, SQL Server, and IIS** for business operations teams.
- Developed backend services for **order processing, customer records, workflow approvals, and internal reporting**, using layered architecture, repository patterns, LINQ, stored procedures, and transaction-safe updates.
- Improved page responsiveness by **26%** by replacing heavy server-rendered screens with AngularJS views, client-side filtering, optimized API endpoints, and reduced SQL round trips for common workflows.
- Resolved production issues involving **null reference exceptions, duplicate form submissions, broken session handling, and slow report exports** by improving validation, logging, locking, and query execution plans.
- Participated in legacy modernization by moving selected ASP.NET Web Forms and MVC screens toward **Web API 2, AngularJS components, Bootstrap layouts, and more maintainable service boundaries**.
- Implemented role-based access checks, export features, dashboard widgets, scheduled jobs, and notification workflows that helped business users process operational tasks with fewer manual spreadsheets.
- Created unit and integration tests with **MSTest, NUnit, Moq, Postman, and SQL test data scripts**, improving confidence around refactoring work and reducing regression risk during monthly releases.
- Worked closely with senior engineers during architecture reviews, production support, and release planning, building strong foundations in **C#, SQL optimization, API design, debugging, and maintainable code practices**.

Microsoft

Software Developer Intern

Cambridge, MA | Aug 2014 – Feb 2015

- ❖ Supported internal engineering tools using **C#, .NET Framework 4.5, ASP.NET MVC 5, JavaScript, AngularJS 1.2, Bootstrap 3, SQL Server 2012, and Visual Studio** in a structured enterprise environment.
- ❖ Built small backend features for internal dashboards, including data-entry endpoints, validation flows, lightweight reporting views, and service-layer logic used by engineering and operations teams.
- ❖ Fixed UI defects involving inconsistent form validation, browser rendering issues, broken table sorting, and missing client-side error messages across AngularJS and MVC-based administrative screens.
- ❖ Assisted with SQL Server query cleanup, stored procedure updates, and data-mapping corrections to improve accuracy for internal reports and reduce support tickets from business users.
- ❖ Added logging, defensive null checks, and clearer exception messages to help senior engineers diagnose recurring production-like issues during staging validation and release testing.
- ❖ Created test cases with **MSTest, manual regression scripts, and Postman-style API checks**, helping the team catch workflow defects earlier before handing builds to QA reviewers.
- ❖ Gained practical experience with **Agile ceremonies, pull requests, code reviews, enterprise coding standards, source control discipline, and cross-functional communication** in a large software engineering organization.

Projects

- ❖ **Enterprise Workflow Modernization Platform:** Designed and delivered a **.NET 8 + Angular 17** modernization initiative that replaced legacy screens, introduced **Clean Architecture**, optimized SQL queries, added structured logging, and improved release stability for high-volume operational workflows.
- ❖ **Secure Multi-Tenant Reporting Dashboard:** Built a secure reporting platform using **ASP.NET Core, Angular, SQL Server, PostgreSQL, JWT/OIDC, Redis caching, and Azure DevOps**, enabling tenant-aware analytics, role-based access, faster exports, and more reliable executive reporting.

Certifications

- ❖ **Microsoft Certified: Azure Developer Associate**
- ❖ **Microsoft Certified: Azure Fundamentals**
- ❖ **AWS Certified Cloud Practitioner**
- ❖ **Professional Scrum Master I**

Education

University of North Carolina at Chapel Hill

Bachelor's Degree in Computer Science (2010 – 2014)
