

TAYLOR PENTZ

Senior Software Engineer – Python (FastAPI/Django), Vue, AWS

taylorpentz2@gmail.com | 1601 Larkin, High Point, NC | +1 (980) 981-4522

<https://www.linkedin.com/in/taylor-p-b0389a3ba>

Professional Summary

Senior Software Engineer with 11+ years of experience building scalable products across fintech, SaaS, and enterprise platforms using **Python**, **Vue.js**, distributed systems, cloud-native architectures, and modern DevOps practices, delivering secure and high-performance applications through expertise in **Python 3.8–3.12**, **Vue 2/3**, microservices, API design, CI/CD automation, cloud infrastructure, and modernization of legacy systems.

Technical Skills

- ❖ **Languages:** Python, JavaScript, TypeScript, SQL, Bash, HTML5, CSS3
- ❖ **Backend:** Python 3.8–3.12, FastAPI, Django, Flask, Celery, REST APIs, GraphQL, gRPC, JWT, OAuth2
- ❖ **Frontend:** Vue.js 2/3, Nuxt.js, Vuex, Pinia, JavaScript ES6+, TypeScript, Vuetify, Tailwind CSS
- ❖ **Cloud & DevOps:** AWS, Docker, Kubernetes, Terraform, GitHub Actions, Jenkins, CI/CD, Nginx, Linux, ECS, Lambda
- ❖ **Databases:** PostgreSQL, MySQL, Redis, MongoDB, DynamoDB, Elasticsearch
- ❖ **Architecture:** Microservices, Event-Driven Architecture, Distributed Systems, Serverless, Clean Architecture, Domain Driven Design
- ❖ **Testing:** PyTest, Jest, Cypress, Playwright, Unit Testing, Integration Testing, Contract Testing
- ❖ **Monitoring:** Prometheus, Grafana, CloudWatch, ELK Stack, Sentry, Datadog
- ❖ **Practices:** Agile, Scrum, Code Reviews, System Design, Performance Optimization, Security Best Practices, Technical Leadership

Professional Experience

SumatoSoft

Senior Software Engineer

Boston, MA (Remote) | Apr 2023 – Mar 2025

- ❖ Architected enterprise-grade platforms using **Python 3.11**, **FastAPI**, **Vue 3**, and **AWS**, creating scalable microservices and reusable frontend modules that supported rapid feature delivery across multiple business domains.
- ❖ Led migration from monolithic services to **containerized microservices** with **Docker** and **Kubernetes**, reducing deployment bottlenecks and improving overall release efficiency by **38%** across engineering teams.
- ❖ Developed high-throughput REST APIs with **FastAPI**, asynchronous processing with Celery, and Redis caching that resolved latency issues causing intermittent timeout failures during peak business hours.
- ❖ Implemented advanced frontend workflows using **Vue 3**, **Pinia**, and TypeScript while redesigning state management patterns that significantly improved maintainability of large-scale UI modules.
- ❖ Resolved production incidents related to database locking, API throttling, and memory spikes by introducing monitoring dashboards, query optimization, and proactive alerting strategies.

- ❖ Built secure authentication services using **OAuth2**, JWT, and role-based authorization layers that improved compliance requirements and reduced authentication-related defects.
- ❖ Modernized legacy Python services by upgrading unsupported dependencies, refactoring synchronous workflows, and improving code coverage through automated testing pipelines.
- ❖ Introduced **GitHub Actions** pipelines with automated testing, container validation, and deployment workflows that reduced failed production releases and improved engineering productivity.
- ❖ Collaborated with architects and product teams to design event-driven workflows using messaging patterns that simplified integrations between distributed services.
- ❖ Mentored engineers through architecture reviews, performance optimization sessions, and coding standards initiatives that improved development consistency across projects.

Hexaview Technologies Inc.

Software Engineer

New York, NY | Jul 2018 – Mar 2023

- ❖ Engineered customer-facing applications using **Python 3.8–3.10**, **Django**, **Vue 2/3**, and PostgreSQL to support large transactional workloads across distributed environments.
- ❖ Built scalable backend services and optimized ORM queries that reduced slow database operations by **34%**, improving response times for heavily utilized customer workflows.
- ❖ Developed reusable Vue component libraries with centralized state management using **Vuex**, increasing consistency across frontend applications and reducing duplicate implementations.
- ❖ Migrated legacy frontend modules from older JavaScript implementations into modern **Vue.js** architecture while maintaining backward compatibility requirements.
- ❖ Implemented background processing pipelines using Celery and Redis to manage asynchronous reporting workloads and eliminate recurring request timeout failures.
- ❖ Investigated production issues involving memory leaks, API serialization failures, and inconsistent session handling through structured debugging and observability improvements.
- ❖ Designed secure REST interfaces with validation layers, rate limiting, and logging controls to strengthen platform reliability and operational visibility.
- ❖ Created CI/CD pipelines using **Jenkins**, Docker, and automated quality gates that accelerated deployment cycles and improved release confidence.
- ❖ Partnered with cross-functional teams to deliver new product capabilities while maintaining high system availability during major platform enhancements.

SimbirSoft Company

Software Developer

Boston, MA | Mar 2015 – Jun 2018

- ❖ Developed backend services using **Python 3.5–3.7**, **Flask**, and relational databases while supporting customer-facing applications with increasing transaction volumes.
- ❖ Created responsive web applications using early **Vue.js** implementations and reusable UI components that simplified frontend maintenance across multiple projects.
- ❖ Improved API performance by optimizing database indexing strategies and introducing caching mechanisms that reduced expensive query execution patterns.
- ❖ Resolved recurring production defects involving concurrency conflicts, failed background jobs, and inconsistent data synchronization between dependent services.
- ❖ Participated in modernization initiatives by replacing outdated libraries and improving service maintainability through modular architecture practices.

- ❖ Implemented automated testing strategies with PyTest and integration testing pipelines to reduce regression issues during frequent releases.
- ❖ Supported cloud migration initiatives involving Docker adoption and infrastructure standardization for improved deployment consistency.
- ❖ Worked closely with QA and product stakeholders to translate business requirements into scalable technical solutions with measurable operational value.

Microsoft

Software Developer Intern
Cambridge, MA | Aug 2014 – Feb 2015

- ❖ Developed internal tools using **Python**, JavaScript, and SQL to automate repetitive engineering tasks and improve reporting accuracy across teams.
- ❖ Contributed to frontend enhancements and usability improvements that streamlined navigation flows and reduced manual support requests from internal users.
- ❖ Assisted with debugging software defects related to API integrations, validation logic, and inconsistent database responses in shared environments.
- ❖ Participated in code reviews and engineering discussions to improve software quality and increase familiarity with enterprise development standards.
- ❖ Created automation scripts that reduced repetitive operational tasks and improved consistency of development workflows.
- ❖ Collaborated with senior engineers to implement enhancements while following structured software delivery processes and coding standards.
- ❖ Supported testing activities and documentation updates to improve release readiness and reduce onboarding effort for new contributors.

Projects

Cloud Native Financial Analytics Platform

- ❖ Built a scalable analytics platform using **Python**, **FastAPI**, **Vue 3**, PostgreSQL, Redis, and AWS that processed large financial datasets with asynchronous workflows, automated reporting pipelines, and containerized deployment architecture.

Certifications

- ❖ **AWS Certified Developer – Associate**
- ❖ **AWS Certified Solutions Architect – Associate**
- ❖ **Certified Kubernetes Application Developer (CKAD)**
- ❖ **Microsoft Certified: Azure Fundamentals**
- ❖ **Scrum Fundamentals Certified (SFC)**

Education

University of North Carolina at Chapel Hill

Bachelor's Degree in Computer Science (2010 – 2014)
