

TAYLOR PENTZ

Senior Software Engineer

taylorpentz2@gmail.com | 1601 Larkin, High Point, NC | +1 (980) 981-4522
<https://www.linkedin.com/in/taylor-p-b0389a3ba>

Professional Summary

Results-oriented Senior Software Engineer with extensive expertise in **React, .NET Core, and full-stack application development**, delivering enterprise-grade solutions with emphasis on scalability, performance, and maintainability. Proven success in leveraging **AWS, GCP, Docker, SQL, and NoSQL** to build resilient applications. Skilled at collaborating with cross-functional teams to design, implement, and optimize systems that meet demanding business needs.

Technical Skills

- ❖ **Frontend:** React 18+, Redux, TypeScript, JavaScript (ES6+), REST, GraphQL
- ❖ **Backend:** .NET Core, C#, Node.js, Python, Java
- ❖ **Cloud & DevOps:** AWS, GCP, Docker, Kubernetes, CI/CD Pipelines
- ❖ **Databases:** SQL Server, PostgreSQL, MySQL, MongoDB, Redis, NoSQL

Professional Experience

SumatoSoft

Senior Software Engineer
Boston, MA (Remote) | Apr 2023 – Mar 2025

- ❖ Designed and implemented scalable web applications by integrating **React frontends with .NET Core microservices**, ensuring high performance under heavy concurrent usage.
- ❖ Developed advanced **component libraries and design systems** in React to streamline UI development across multiple enterprise products.
- ❖ Migrated monolithic .NET applications into modular microservices architecture, reducing deployment complexity and enabling faster feature delivery cycles.
- ❖ Applied **Docker containers and Kubernetes orchestration** to streamline deployment pipelines across AWS and GCP, ensuring consistency across environments.
- ❖ Optimized complex SQL queries and integrated with NoSQL stores to balance relational and unstructured data requirements, improving query response times significantly.
- ❖ Collaborated closely with UX designers and product managers to deliver intuitive user experiences, integrating **REST and GraphQL APIs** for smooth client-server communication.
- ❖ Implemented automated testing frameworks for React components and .NET APIs, improving reliability and reducing production defects through CI/CD integration.
- ❖ Mentored junior engineers in full-stack best practices, ensuring code quality, scalable designs, and adherence to industry standards.

Hexaview Technologies Inc.

Software Engineer

New York, NY | Jul 2018 – Mar 2023

- ❖ Built enterprise-level client applications using **React with Redux and TypeScript**, paired with backend services powered by **.NET Core APIs**.
- ❖ Designed and optimized RESTful APIs for large data transfers, leveraging SQL Server for relational operations and MongoDB for unstructured data persistence.
- ❖ Developed cloud-ready services integrated with **AWS Lambda, S3, and RDS**, enabling fault-tolerant, serverless event-driven workflows.
- ❖ Led modernization of existing .NET Framework applications into .NET Core, improving performance, maintainability, and deployment flexibility across cloud environments.
- ❖ Integrated third-party identity providers for **OAuth2 and SAML authentication**, enhancing security while providing seamless enterprise SSO support.
- ❖ Automated CI/CD pipelines using Jenkins and GitHub Actions, containerizing services with **Docker** and ensuring rapid, consistent deployments.
- ❖ Conducted extensive code reviews, performance profiling, and refactoring, establishing coding standards and fostering technical excellence across teams.
- ❖ Partnered with stakeholders to define business requirements and translated them into technical specifications that aligned with both front-end and back-end systems.

SimbirSoft Company

Software Developer

Boston, MA | Mar 2015 – Jun 2018

- ❖ Built interactive **React SPAs integrated with ASP.NET MVC and .NET Core APIs**, enabling feature-rich dashboards for enterprise clients.
- ❖ Implemented **responsive UI designs** using React and Bootstrap, ensuring accessibility and cross-browser support across devices.
- ❖ Designed scalable database schemas in SQL Server and MongoDB to handle increasing volumes of structured and unstructured datasets.
- ❖ Developed reusable C# class libraries and service layers, enabling modular application design that reduced duplicate logic across projects.
- ❖ Conducted performance tuning of .NET backend services and database queries, reducing page load times and improving application responsiveness.
- ❖ Automated deployment workflows using Docker containers, ensuring parity across development, staging, and production environments.
- ❖ Collaborated in Agile ceremonies with distributed teams, maintaining efficient sprint planning, backlog grooming, and continuous integration practices.
- ❖ Wrote unit and integration tests across React and .NET codebases, strengthening application reliability and preventing regressions during new releases.

Microsoft

Software Developer Intern

Cambridge, MA | Aug 2014 – Feb 2015

- ❖ Contributed to development of internal tools using C# and ASP.NET, improving efficiency of engineering teams working with large distributed datasets.
- ❖ Assisted in building experimental React front-end prototypes integrated with .NET backend services, accelerating evaluation of new UI technologies.
- ❖ Optimized queries in SQL Server to improve reporting performance for internal dashboards, ensuring faster insights for operational teams.
- ❖ Documented APIs, designed test cases, and assisted senior engineers in debugging critical issues within .NET applications and React prototypes.

Projects

- ❖ **E-Commerce Cloud App:** Designed a full-stack application with **React + .NET Core APIs**, deployed via Docker on AWS with SQL + NoSQL hybrid storage.
- ❖ **Healthcare Analytics Dashboard:** Built a data-driven React interface with .NET services for predictive healthcare metrics, integrated with GCP BigQuery.
- ❖ **Real-Time Chat Platform:** Implemented scalable WebSocket messaging with React frontend, .NET backend, and Redis pub/sub for high-availability.

Certifications

- ❖ **AWS Certified Solutions Architect – Associate** (Amazon Web Services)
- ❖ **Google Cloud Professional Cloud Developer** (Google Cloud Platform)
- ❖ **Microsoft Certified: Azure Fundamentals (AZ-900)**
- ❖ **Docker Certified Associate (DCA)**
- ❖ **Microsoft Certified: .NET Developer (MCSA/MCSD track)**
- ❖ **MongoDB Certified Developer – Associate**
- ❖ **SQL Server Database Development Certification (Microsoft)**

Education

University of North Carolina at Chapel Hill

Bachelor's Degree in Computer Science (2010 – 2014)
