

TAYLOR PENTZ

Senior Software Engineer

taylorpentz2@gmail.com | 1601 Larkin, High Point, NC | +1 (980) 981-4522
<https://www.linkedin.com/in/taylor-p-b0389a3ba>

Professional Summary

Versatile Senior Software Engineer with deep expertise in **Java, Angular, Spring Boot, RESTful APIs, and microservices**, experienced in delivering enterprise-grade software solutions across cloud-native and distributed systems. Skilled in optimizing performance, designing scalable architectures, and integrating modern DevOps practices with **AWS, GCP, Docker, SQL, and NoSQL** databases. Strong collaborator with a track record of mentoring teams and delivering high-quality, business-critical software in Agile environments.

Technical Skills

- ❖ **Frontend:** Angular 8+, TypeScript, RxJS, NgRx, SCSS, Web Components
- ❖ **Backend:** Java 11+, Spring Boot, REST APIs, Microservices, Node.js (supporting)
- ❖ **Cloud & DevOps:** AWS, GCP, Docker, Kubernetes, Jenkins, CI/CD pipelines
- ❖ **Databases:** PostgreSQL, MySQL, MongoDB, Cassandra, Redis (SQL + NoSQL)

Professional Experience

SumatoSoft

Senior Software Engineer

Boston, MA (Remote) | Apr 2023 – Mar 2025

- ❖ Designed and developed Angular 14+ enterprise frontends with reusable state-managed components, ensuring performance, scalability, and maintainability across mission-critical applications.
- ❖ Built backend microservices in Java Spring Boot integrated with SQL and NoSQL databases, streamlining data flow, enabling high availability, and reducing query latency in distributed environments.
- ❖ Migrated workloads to **AWS ECS and GCP Cloud Run** using Docker containers and Kubernetes orchestration, ensuring efficient deployments, enhanced scalability, and zero-downtime releases.
- ❖ Optimized SQL queries in PostgreSQL and created advanced MongoDB indexing strategies, resulting in improved data retrieval performance for analytics-heavy modules.
- ❖ Led code reviews, mentored junior engineers, and implemented Agile best practices, raising code quality standards and fostering team-wide knowledge sharing.
- ❖ Designed RESTful APIs and GraphQL endpoints for secure integration with external partners, ensuring compliance with OAuth 2.0 and JWT authentication flows.
- ❖ Established CI/CD pipelines with Jenkins and GitHub Actions, integrating automated testing, container builds, and cloud deployments for faster release cycles.
- ❖ Collaborated with cross-functional teams including product managers, UX designers, and DevOps engineers to deliver features aligned with evolving business requirements.

Hexaview Technologies Inc.

Software Engineer

New York, NY | Jul 2018 – Mar 2023

- ❖ Developed enterprise dashboards in Angular with custom modules, reusable services, and optimized change detection, ensuring seamless performance in large-scale financial applications.
- ❖ Engineered scalable Java Spring Boot microservices for core transaction processing, integrating with **AWS RDS for SQL data** and **MongoDB clusters for NoSQL storage**.
- ❖ Deployed containerized services via Docker, standardizing builds and minimizing environment inconsistencies across development, staging, and production pipelines.
- ❖ Implemented caching and async data processing strategies with Redis and Kafka, enabling high-throughput workloads and significantly reducing response times.
- ❖ Worked closely with architects to define microservice boundaries, API contracts, and domain-driven design principles, resulting in modular and maintainable systems.
- ❖ Integrated third-party APIs and ensured data security through encryption standards, secure key management, and strict access control policies.
- ❖ Automated regression testing and integrated testing frameworks with CI/CD pipelines, ensuring reliable production releases.
- ❖ Partnered with stakeholders to translate complex business requirements into scalable technical solutions while aligning with Agile sprint goals.

SimbirSoft Company

Software Developer

Boston, MA | Mar 2015 – Jun 2018

- ❖ Built enterprise Angular applications with modular architecture, introducing lazy loading and RxJS observables for improved rendering efficiency.
- ❖ Implemented Java Spring MVC and Spring Boot backend modules supporting multi-tenant applications, integrating seamlessly with relational and non-relational databases.
- ❖ Deployed applications into **GCP App Engine** with containerized builds, enhancing resilience and ensuring fault-tolerant scaling in production environments.
- ❖ Optimized SQL schemas in MySQL and PostgreSQL and implemented partitioning strategies, improving query execution speed and storage efficiency.
- ❖ Integrated NoSQL databases like MongoDB for unstructured data storage, improving analytics processing for client-driven insights.
- ❖ Worked with Dockerized environments to replicate production setups locally, reducing integration bugs and streamlining developer onboarding.
- ❖ Supported cross-team collaboration with front-end engineers, QA testers, and product owners, delivering consistent features aligned with deadlines.
- ❖ Refactored legacy codebases to align with modern coding standards, reducing technical debt and boosting maintainability.

Microsoft

Software Developer Intern

Cambridge, MA | Aug 2014 – Feb 2015

- ❖ Contributed to enterprise web application modules using AngularJS and Java backends, improving system usability and performance.

- ❖ Created SQL stored procedures and optimized database queries to handle large-scale datasets across enterprise data management systems.
- ❖ Collaborated with senior developers to integrate authentication and security modules, ensuring compliance with corporate identity standards.
- ❖ Assisted in refactoring front-end UI modules to improve rendering performance and user experience across multiple devices.
- ❖ Participated in Agile sprints, contributing to documentation, testing, and development of new features within enterprise productivity tools.
- ❖ Conducted research and proof-of-concepts on emerging frameworks, presenting recommendations for future adoption.
- ❖ Integrated Azure cloud services into application workflows, supporting real-time monitoring and analytics for internal teams.
- ❖ Prepared technical documentation and unit test coverage, ensuring maintainability and clear knowledge transfer.

Projects

- ❖ **E-Commerce Cloud Migration:** Migrated a legacy retail platform to microservices on AWS + GCP with Angular frontend and Dockerized Java backend.
- ❖ **Financial Analytics Dashboard:** Built a real-time Angular dashboard integrating Java APIs with SQL + NoSQL backends for large-scale reporting.
- ❖ **Healthcare Platform Modernization:** Re-architected a patient data system with Java Spring Boot microservices and Angular frontend to improve compliance and scalability.

Certifications

- ❖ **AWS Certified Solutions Architect – Associate**
- ❖ **Google Cloud Professional Cloud Developer**
- ❖ **Docker Certified Associate (DCA)**
- ❖ **Oracle Certified Professional, Java SE 11 Developer**

Education

University of North Carolina at Chapel Hill

Bachelor's Degree in Computer Science (2010 – 2014)
