

TAYLOR PENTZ

Senior Software Engineer

taylorpentz2@gmail.com | 1601 Larkin, High Point, NC | +1 8042860439
<https://www.linkedin.com/in/taylor-p-b0389a3ba>

Professional Summary

Senior Software Engineer with strong expertise in **PHP, React, and full-stack development**, building scalable enterprise systems and cloud-native web platforms. Skilled in **AWS, GCP, Docker, SQL, NoSQL**, and modern DevOps practices, with a proven record of delivering complex applications in fintech, SaaS, and enterprise software.

Technical Skills

- ❖ **Languages & Frameworks:** PHP, React, JavaScript (ES6+), TypeScript, Node.js
- ❖ **Cloud & DevOps:** AWS, GCP, Docker, Kubernetes, CI/CD
- ❖ **Databases:** SQL (PostgreSQL, MySQL), NoSQL (MongoDB, Redis)
- ❖ **Tools:** Git, Jira, Jenkins, REST/GraphQL APIs

Professional Experience

SumatoSoft

Senior Software Engineer
Boston, MA (Remote) | Apr 2023 – Mar 2025

- ❖ Spearheaded development of **scalable full-stack solutions** using PHP for backend services and React for UI, ensuring seamless integrations across distributed systems.
- ❖ Designed cloud-native deployments on **AWS and GCP** with Docker containers and Kubernetes orchestration, enhancing scalability and infrastructure automation.
- ❖ Built and optimized **SQL and NoSQL schemas** to handle millions of records with strong data integrity, ensuring optimized query performance and resiliency.
- ❖ Collaborated with cross-functional teams to integrate REST and GraphQL APIs, ensuring **secure, maintainable, and high-performing service interactions**.
- ❖ Enhanced CI/CD pipelines with Jenkins and GitHub Actions, automating builds, testing, and deployments to multiple staging and production environments.
- ❖ Mentored junior engineers on PHP, React, and cloud-native development practices, improving code quality and fostering engineering excellence.
- ❖ Applied containerized microservices design, ensuring modular codebases and smooth feature delivery, reducing dependency bottlenecks.
- ❖ Delivered high-availability systems that met enterprise client SLAs by applying **robust monitoring, scaling strategies, and disaster recovery planning**.

Hexaview Technologies Inc.

Software Engineer

New York, NY | Jul 2018 – Mar 2023

- ❖ Engineered robust **enterprise PHP applications** with modular architectures, integrating React-based UIs to create seamless front-end and backend workflows.
- ❖ Migrated monolithic apps to **microservices** with Docker containers, improving fault tolerance, scalability, and deployment consistency.
- ❖ Deployed workloads in **AWS cloud**, leveraging services such as EC2, S3, RDS, and Lambda for cost-efficient, high-availability infrastructure.
- ❖ Designed and maintained **PostgreSQL and MongoDB** databases with optimized indexes and sharding to handle diverse workload patterns and data models.
- ❖ Developed reusable React components and advanced state management flows, ensuring **consistent UI/UX** across large SaaS platforms.
- ❖ Conducted detailed code reviews, enforcing design principles, security standards, and scalability patterns across engineering deliverables.
- ❖ Collaborated with product owners and solution architects to translate requirements into **robust technical implementations**.
- ❖ Delivered solutions with strong emphasis on performance, security, and maintainability, ensuring enterprise readiness and client adoption.

SimbirSoft Company

Software Developer

Boston, MA | Mar 2015 – Jun 2018

- ❖ Contributed to development of **complex PHP applications** serving enterprise clients, with seamless integration into modern web platforms.
- ❖ Built and maintained React-based dashboards and client-facing applications, implementing **responsive UI design with optimized rendering performance**.
- ❖ Created high-performance backend services, leveraging caching strategies with **Redis and optimized MySQL queries** to minimize latency.
- ❖ Enhanced product reliability by integrating **cloud-based deployments on AWS**, with automated scaling and infrastructure monitoring.
- ❖ Improved developer experience by establishing coding standards, **introducing code linting, and creating reusable library modules**.
- ❖ Implemented API integrations with third-party vendors, ensuring secure transactions and **real-time data synchronization across platforms**.
- ❖ Applied TDD and unit testing for both backend PHP and front-end React, resulting in high coverage and lower production defects.
- ❖ Collaborated in Agile teams, participating in sprint planning, backlog grooming, and iterative delivery cycles for enterprise clients.

Microsoft

Software Developer Intern

Cambridge, MA | Aug 2014 – Feb 2015

- ❖ Assisted in building **internal productivity tools** using PHP backends and React interfaces, accelerating adoption of modern web technologies within the team.

- ❖ Gained hands-on exposure to **Azure cloud services** and implemented containerized deployments using Docker for test environments.
- ❖ Optimized SQL database queries and designed schemas to support scalable data operations, reducing load times and improving system reliability.
- ❖ Collaborated with senior engineers to deliver secure and reliable **API endpoints** for internal productivity applications.
- ❖ Applied agile development practices, including pair programming and sprint demos, gaining insights into enterprise-scale software processes.
- ❖ Designed UI enhancements and implemented accessibility standards to improve usability across diverse internal teams.
- ❖ Authored clear technical documentation, ensuring maintainability and easier onboarding for future developers.
- ❖ Demonstrated adaptability by quickly learning new technologies and applying them to real-world business problems.

Projects

- ❖ **E-Commerce SaaS Platform:** Built a multi-tenant PHP + React SaaS for retailers with AWS hosting, real-time analytics, and containerized microservices.
- ❖ **Financial Data Pipeline:** Developed a scalable data ingestion system using PHP, SQL, and NoSQL with GCP for ETL, storage, and visualization.
- ❖ **Healthcare Management Tool:** Engineered React-based dashboards with PHP APIs to support patient data workflows, meeting HIPAA compliance.
- ❖ **AI-Driven Reporting System:** Designed automated reporting with PHP microservices, React UI, and cloud-native deployment pipelines.

Certifications

- ❖ **AWS Certified Solutions Architect – Associate**
- ❖ **Google Cloud Professional Cloud Developer**
- ❖ **Docker Certified Associate**
- ❖ **SQL & NoSQL Database Design and Optimization (Coursera)**

Education

University of North Carolina at Chapel Hill

Bachelor's Degree in Computer Science (2010 – 2014)
