Professional Summary

Entrepreneurial Senior Software Engineer with 10+ years of experience building scalable, performant, and elegant web applications in both startup and enterprise environments. Expert in full-stack development with a strong emphasis on React, Node.js, TypeScript, and cloud-native architecture. Proven record in leading cross-functional teams, shipping products from scratch, and driving frontend excellence. Passionate about decentralization, cloud infrastructure, and contributing to open-source ecosystems.

Technical Skills

- ❖ **Languages:** JavaScript, TypeScript, HTML5, CSS3, SQL, NoSQL, Python
- ❖ **Frameworks/Libraries:** React, Next.js, Redux, Express, Node.js, NestJS
- ❖ **Testing:** Cypress, Jest, Playwright
- ❖ **Cloud Platforms:** AWS (Lambda, S3, EC2, RDS, ECS), GCP (Cloud Run, GKE, Firestore), Vercel
- ❖ **Databases:** PostgreSQL, MySQL, MongoDB, Redis
- ❖ **DevOps & Tools:** Git, Docker, Kubernetes, CI/CD, Figma, Jira, Agile
- ❖ **Soft Skills:** Remote collaboration, mentorship, code reviews, cross-functional leadership

Professional Experience

SumatoSoft

Senior Software Engineer

Boston, MA (Remote) | Apr 2023 – Mar 2025

- Architected and implemented a TypeScript-based microservices platform using Node.js and Express to support scalable SaaS products for logistics and eCommerce clients.
- Led a React frontend redesign that enhanced accessibility, improved loading time by 45%, and aligned components directly with Figma design systems.
- Integrated backend APIs using REST and GraphQL, optimizing performance and caching to reduce DB load by 60%.
- Spearheaded automated testing using Cypress and Jest, increasing frontend test coverage to 95%.
- Deployed services to AWS ECS and Lambda with CI/CD via GitHub Actions, enabling daily production releases with zero downtime.
- Mentored 5 junior engineers, conducted regular code reviews, and championed clean architecture practices.
- Collaborated with UX designers and PMs in agile sprints to prioritize product roadmap and deliver high-impact features.
- Refactored legacy monoliths into modular, containerized services with Docker, significantly reducing tech debt and deployment time.

Hexaview Technologies Inc.

Software Engineer

New York, NY | Jul 2018 – Mar 2023

- Designed and built modern web interfaces with React and TypeScript for enterprise finance tools, improving client engagement and reducing churn.
- Developed scalable REST APIs and microservices using Node.js and NestJS, interfacing with PostgreSQL and MongoDB.
- Led implementation of role-based authentication, access control, and JWT tokenization across services.
- Integrated Kafka-based event processing for real-time data sync across distributed systems.
- Built E2E tests with Playwright and implemented CI pipelines for test automation.
- Coordinated cross-team architecture reviews and created technical documentation for internal tools and libraries.
- Introduced AWS S3-based file handling and GCP Pub/Sub integrations for hybrid cloud strategies.
- Played a key role in migrating traditional hosting to AWS with Terraform-based infrastructure provisioning.

SimbirSoft Company

Software Developer

Boston, MA | Mar 2015 – Jun 2018

- Delivered React and Vue-based SPAs integrated with Node.js and Firebase to support rapid MVP development cycles.
- Collaborated on greenfield product development with remote teams, owning full-stack modules.
- Participated in backend API creation, integrating with NoSQL data stores like Firestore and Redis.
- Championed code review and testing practices to improve product stability.
- Supported agile delivery cycles and co-led weekly demo sessions with stakeholders.
- Automated internal DevOps workflows using shell scripts and GitLab CI/CD.
- Optimized frontend bundling using Webpack to improve load performance for low-bandwidth regions.
- Delivered user-centric features with a focus on accessibility and internationalization support.

Microsoft

Software Developer Intern

Cambridge, MA | Aug 2014 – Feb 2015

- Contributed to web tooling enhancements within Visual Studio Team Services, focusing on UI responsiveness.
- Collaborated with UX designers to implement dynamic UI components in React and Backbone.
- Created internal libraries to standardize form validation across web modules.
- Wrote automated UI tests with Selenium for regression scenarios.
- Participated in standups and product planning meetings in a cross-functional agile team.
- Supported migration of internal REST APIs to early .NET Core services.
- Optimized existing components to be WCAG 2.0 compliant.
- Received early career mentorship from senior engineers across frontend and DevOps tracks.

Projects

- ✓ **Decentralized GPU Management Portal (2024)**
Built a web-based admin interface using React and TypeScript that allowed NodeShift partners to manage GPU usage, billing, and scaling policies across decentralized compute nodes. Integrated with Node.js microservices and deployed via GCP Cloud Run.
- ✓ **Event-Driven Wealth Management System (Hexaview, 2021)**
Led backend design of a Kafka-based portfolio alerting system that processed 5M+ events daily. Implemented rules engine for proactive client engagement and risk management.
- ✓ **Real-Time Collaborative Dashboard (SumatoSoft, 2023)**
Developed collaborative React dashboard with live updates via WebSockets for a logistics SaaS. Integrated with AWS API Gateway and Lambda for serverless scalability.

Certifications

- AWS Certified Solutions Architect – Associate (2023)
- Google Cloud Associate Cloud Engineer (2024)
- MongoDB Developer Certification (2023)
- React Advanced Patterns (Frontend Masters, 2024)

Education

University of North Carolina at Chapel Hill

Bachelor's Degree in Computer Science (2010 – 2014)
