

TAYLOR PENTZ

Senior Software Engineer

taylorpentz2@gmail.com | linkedin.com/in/taylor-pentz-080a8b39b | 1601 Larkin, High Point, NC | +1 8042860439

SUMMARY

Senior Software Engineer with 9+ years of experience designing, building, and maintaining production-grade software systems in collaborative, product-driven environments. Strong background in .NET, C#, RESTful APIs, SQL, and modern JavaScript frameworks with hands-on experience delivering scalable, secure, and maintainable applications. Proven ability to work within cross-functional teams alongside product managers, designers, and QA to break down complex requirements into high-quality, customer-facing solutions. Known for a low-ego, mentorship-driven approach, strong ownership mindset, and honest communication during code reviews, retrospectives, and architectural discussions. Experienced in cloud-native development, CI/CD pipelines, and modern engineering practices with a focus on reliability, performance, and continuous improvement.

SKILLS

C#	JavaScript	TypeScript	React
Vue.js	Angular	.NET Core	.NET Framework
ASP.NET MVC	Web API	REST APIs	PostgreSQL
SQL Server	SQL Best Practices	Microsoft Azure	AWS
CI/CD Pipelines	Jenkins	PowerShell	Git
API Security	OAuth	Distributed Systems	Event-Driven Architecture
Unit Testing	Code Reviews	Automation Mindset	

EXPERIENCE

Senior Software Engineer

SumatoSoft

April 2022 - December 2025

- Designed and developed end-to-end software features using .NET Core, C#, RESTful APIs, SQL databases, and React-based user interfaces in production environments.
- Worked as part of a cross-functional team with product managers, designers, and QA to break down requirements, estimate work, and deliver high-quality, customer-facing functionality.
- Led code reviews and provided intentional mentorship to junior engineers, promoting best practices, clean code standards, and a culture of continuous learning.
- Built and maintained secure APIs with proper authentication and authorization mechanisms, including OAuth-based flows and API security best practices.
- Implemented and optimized CI/CD pipelines using Git, Jenkins, and PowerShell to improve deployment reliability and development velocity.
- Diagnosed and resolved complex production issues through systematic troubleshooting, logging, and performance analysis, improving overall system stability and customer satisfaction.

Software Engineer

Hexaview Technologies Inc.

July 2018 - March 2022

- Developed and maintained full-stack web applications using C#, .NET Framework, ASP.NET MVC, Web API, SQL databases, and modern JavaScript frameworks.

- Collaborated closely with integrated design and product teams to translate business requirements into scalable technical solutions.
- Implemented unit tests and participated in continuous integration workflows to ensure code quality, reliability, and maintainability.
- Contributed to horizontally scalable systems and supported integrations with external services through well-defined APIs.
- Actively participated in peer code reviews, offering constructive feedback and embracing honest, low-ego technical discussions.
- Supported cloud-based deployments and operational workflows on Azure and AWS, gaining hands-on experience with cloud infrastructure and DevOps practices.

Software Developer

SimbirSoft Company

March 2015 - June 2018

- Built and enhanced backend services and web applications using C#, .NET technologies, and relational databases in enterprise environments.
- Worked on API design and implementation, ensuring maintainable code structure and adherence to REST principles.
- Collaborated with senior engineers to troubleshoot defects, refactor legacy components, and improve system performance.
- Participated in Agile ceremonies, including sprint planning and retrospectives, contributing to team transparency and delivery predictability.
- Gained early exposure to distributed systems concepts and message-driven patterns while supporting evolving product requirements.
- Developed a strong foundation in software engineering fundamentals, version control with Git, and collaborative development workflows.

Software Developer Intern

Microsoft

August 2014 - February 2015

- Supported development of internal tools and services using C# and .NET under the guidance of senior engineers.
- Assisted with debugging, testing, and incremental feature development in a large-scale enterprise environment.
- Learned industry best practices around code quality, documentation, and secure software development.
- Collaborated with team members through code reviews and design discussions, gaining exposure to professional engineering workflows.
- Participated in sprint activities and gained firsthand experience working within an Agile development process.
- Built a strong foundation in professional software engineering, teamwork, and clear technical communication.

EDUCATION

Bachelor of Computer Science

The University of North Carolina at Chapel Hill

2010 - 2014
