

TAYLOR PENTZ

Senior Software Engineer

taylorpentz2@gmail.com | 1601 Larkin, High Point, NC | +1 8042860439
<https://www.linkedin.com/in/taylor-pentz-698a98381/>

Professional Summary

Versatile Senior Software Engineer with 10+ years of full-stack development experience in SaaS, real-time systems, and enterprise web applications. Proven ability to lead architecture and deployment of scalable, high-performance platforms using Vue.js, C#, SQL Server, Redis, and cloud-native technologies (AWS, GCP). Known for delivering features with performance, clean architecture, and end-user value. Passionate about mentoring, agile collaboration, and continuous improvement.

Technical Skills

- ❖ **Languages:** JavaScript, TypeScript, C#, Python, PHP
- ❖ **Frontend:** Vue.js, React.js, Angular, HTML5, CSS3, Responsive Design
- ❖ **Backend:** Node.js, .NET Core, Laravel, Express.js
- ❖ **Databases:** SQL Server, PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch
- ❖ **Cloud:** AWS (Lambda, EC2, RDS, S3), GCP (App Engine, Firestore), Azure
- ❖ **DevOps:** Docker, Kubernetes, Git, GitHub Actions, CI/CD Pipelines
- ❖ **Tools:** RESTful APIs, Agile/Scrum, Jira, Postman, Swagger, TDD
- ❖ **Data:** Kafka, RabbitMQ, GraphQL, WebSockets, NoSQL

Professional Experience

SumatoSoft

Senior Software Engineer

Boston, MA (Remote) | Apr 2023 – Mar 2025

- Designed and deployed microservices using Node.js, Redis, and SQL Server to serve 100K+ users with under 200ms latency, improving reliability across multiple services.
- Built responsive front-end apps using Vue.js integrated with custom REST APIs and real-time event handling using WebSockets.
- Led cross-functional Agile pods and implemented sprint rituals and code review standards that cut technical debt by 30%.
- Developed automation pipelines using GitHub Actions and Docker, reducing deployment times by 45% across 12 environments.
- Integrated advanced geolocation and mapping features for logistics SaaS, streamlining job dispatching and live tracking accuracy.
- Created a permissions and role system that unified access controls across modules and improved compliance with SOC 2 standards.
- Implemented rate-limiting and data caching using Redis and Elasticsearch to drastically reduce redundant API calls and load.
- Mentored 4 junior engineers and improved onboarding speed through custom internal documentation and hands-on pairing.

Hexaview Technologies Inc.

Software Engineer

New York, NY | Jul 2018 – Mar 2023

- Developed scalable APIs in C# and integrated SQL Server backends to power financial dashboards used by wealth management clients.
- Contributed to frontend modules using Angular and Vue.js with advanced state management and component architecture.
- Engineered real-time notification systems with Kafka and Redis pub/sub, reducing latency in portfolio alerts by over 80%.
- Designed workflow automation rules engine for enterprise clients that handled over 1M conditions across business cases.
- Implemented logging and monitoring using ELK stack, improving error traceability and decreasing downtime by 50%.
- Migrated legacy .NET systems to .NET Core and containerized them with Docker, increasing deploy efficiency across cloud.
- Facilitated API documentation with Swagger and reduced integration time by external teams by 60%.
- Initiated coding standards and CI/CD processes across teams, boosting code quality metrics and reducing production bugs.

SimbirSoft Company

Software Developer

Boston, MA | Mar 2015 – Jun 2018

- Built RESTful services using C# and integrated Angular frontends for insurance and legal compliance SaaS clients.
- Applied caching strategies via Redis to support scaling under high-concurrency workloads and improve UX performance.
- Created real-time chat interfaces using SignalR and WebSockets for field service professionals.
- Tuned SQL Server indexes and queries to cut down reporting lag from 8s to under 1s for high-volume clients.
- Supported integration of Elasticsearch to enable advanced document search and indexing in client portals.
- Introduced unit and integration testing pipelines, increasing code coverage from 35% to 82% across services.
- Participated in Agile ceremonies and acted as a key stakeholder in sprint planning and backlog grooming.
- Refactored legacy monoliths into modular components, setting foundation for future migration to microservices.

Microsoft

Software Developer Intern

Cambridge, MA | Aug 2014 – Feb 2015

- Built internal tools for codebase search and analysis using TypeScript and custom indexing logic with Elasticsearch.

- Contributed to debugging tools for enterprise developer productivity and supported internal developer platform automation.
- Assisted in modernizing UI components using AngularJS and improving accessibility across internal dashboards.
- Collaborated with senior engineers in code reviews and contributed to backlog items in Azure DevOps.
- Designed a script automation workflow that reduced developer setup time by 40% across shared projects.
- Analyzed system performance bottlenecks and suggested patches that improved tool execution speed by 25%.
- Participated in internship hackathon and led the UI design effort for a productivity monitoring tool.
- Authored internal documentation and best practices for onboarding future interns into the tools ecosystem.

Projects

✓ **Real-Time Scheduling Platform (SumatoSoft, 2024)**

Led full-stack development of a responsive field scheduling app with drag-and-drop UI, role-based access, and live sync using WebSockets.

✓ **Event-Driven Wealth Management System (Hexaview, 2021)**

Architected backend logic for a Kafka-based rule engine that processed 5M+ events daily to automate alerts and rebalancing triggers.

✓ **Public API Gateway (Hexaview, 2022)**

Built and documented secure, RESTful APIs with OAuth2 for third-party integrations and client application extensibility.

Certifications

- **AWS Certified Developer – Associate**
- **Google Cloud Professional Cloud Developer**
- **Microsoft Certified: Azure Developer Associate**
- **Scrum Alliance Certified Scrum Developer (CSD)**

Education

University of North Carolina at Chapel Hill

Bachelor's Degree in Computer Science (2010 – 2014)
