SUMMARY

Senior Software Engineer with 9+ years of experience designing, building, testing, and deploying production-grade, cloud-native systems. Strong background in building microservice-based REST APIs with a focus on scalability, reliability, and clean architecture. Proven experience creating detailed design documents, API specifications, and technical documentation to support distributed engineering teams. Hands-on expertise in containerization, Kubernetes deployments, CI/CD pipelines, and infrastructure automation using modern DevOps practices. Adept at collaborating with cross-functional teams, writing high-quality automated tests, and operating systems across development, staging, and production environments.

SKILLS

Golang	JavaScript	TypeScript	Microservice Architecture
REST API Design	Unit Testing	Test Automation	Kubernetes
Docker	AWS	Azure	Terraform
CloudFormation	CI/CD	Jenkins	PostgreSQL
VMWare ESXi	vSphere	Linux	

EXPERIENCE

Senior Software Engineer

SumatoSoft

April 2022 - December 2025

- Designed and implemented microservice-based REST APIs with a strong emphasis on scalability, fault tolerance, and clean separation of concerns, contributing to multiple production systems.
- Authored detailed design documents, API specifications, and internal technical documentation to align backend architecture with business and product requirements.
- Built comprehensive unit tests and automated test suites, ensuring high code coverage and reliable validation of business logic and service integrations.
- Deployed and operated containerized services on Kubernetes, managing configuration, scaling policies, and service health across environments.
- Automated infrastructure provisioning using Terraform and CloudFormation, improving consistency, repeatability, and deployment speed across cloud environments.
- Integrated applications and automated test pipelines with CI/CD systems such as Jenkins, enabling reliable, repeatable builds and deployments.

Software Engineer

Hexaview Technologies Inc.

July 2018 - March 2022

- Developed and maintained backend services and RESTful APIs supporting enterprise-scale applications with high availability requirements.
- Contributed to the design and documentation of service contracts, API schemas, and integration guidelines used by internal and external teams.
- Implemented automated unit and integration tests to validate service behavior and reduce regression risks during frequent releases.
- Worked closely with DevOps teams to deploy services to containerized and virtualized environments, including Kubernetes and VMWare-based platforms.

- Participated in CI/CD pipeline development and maintenance using Jenkins, improving build reliability and deployment automation.
 - Collaborated with cross-functional stakeholders to troubleshoot production issues, optimize performance, and improve system stability.
-

Software Developer

SimbirSoft Company

March 2015 - June 2018

- Built backend services and APIs to support data-intensive business workflows, focusing on correctness, performance, and maintainability.
 - Assisted in defining application architecture and contributed to technical design discussions for distributed systems.
 - Wrote unit tests and participated in early test automation efforts to improve overall software quality.
 - Deployed and tested applications in virtualized environments, gaining hands-on experience with infrastructure and runtime operations.
 - Worked with senior engineers to debug production issues and improve system observability and logging.
 - Gained foundational experience in scalable system design, CI/CD practices, and collaborative software development.
-

Software Developer Intern

Microsoft

August 2014 - February 2015

- Supported senior engineers in developing and testing backend components for internal software systems.
 - Assisted with writing unit tests and validating application behavior against defined requirements.
 - Contributed to documentation and code reviews, gaining exposure to large-scale engineering standards and practices.
 - Learned enterprise-grade development workflows, including version control, build pipelines, and release processes.
 - Collaborated with team members across disciplines, developing strong communication and problem-solving skills.
 - Gained early experience working within structured, high-quality software engineering environments.
-

EDUCATION

Bachelor of Computer Science

The University of North Carolina at Chapel Hill

2010 - 2014
