

TAYLOR PENTZ

Senior Software Engineer

taylorpentz2@gmail.com | 1601 Larkin, High Point, NC | +1 8042860439
<https://www.linkedin.com/in/taylor-pentz-698a98381/>

Professional Summary

Senior Software Engineer with expertise in **Java, Vue.js, and full-stack enterprise application development**, leveraging **AWS, GCP, Docker, SQL, and NoSQL** to design scalable, high-performing, and secure systems. Experienced in leading cross-functional teams, driving agile delivery, and optimizing architectures for cloud-native environments.

Technical Skills

- ❖ **Backend:** Java, Spring Boot, REST APIs, Microservices
- ❖ **Frontend:** Vue.js, Vuex, TypeScript, Vuetify
- ❖ **Cloud & DevOps:** AWS, GCP, Docker, Kubernetes, CI/CD
- ❖ **Databases:** PostgreSQL, MySQL, MongoDB, Redis, NoSQL

Professional Experience

SumatoSoft

Senior Software Engineer
Boston, MA (Remote) | Apr 2023 – Mar 2025

- ❖ ed development of enterprise Java microservices integrated with Vue.js SPAs, ensuring seamless API design that enhanced scalability and reduced latency under heavy workloads.
- ❖ Designed and implemented CI/CD pipelines with **Docker, Kubernetes, and GitLab CI**, improving deployment automation and achieving consistent cloud rollouts on **AWS and GCP**.
- ❖ Built secure and optimized backend modules with **Spring Boot and Hibernate**, applying advanced caching and database indexing strategies for SQL and NoSQL systems.
- ❖ Collaborated with product managers and UI/UX teams to architect Vue.js frontends, incorporating **Vuex for state management** and delivering highly interactive client dashboards.
- ❖ Integrated third-party APIs and payment gateways into Java-Vue ecosystems, ensuring compliance with security protocols and optimizing performance for enterprise transactions.
- ❖ Mentored junior engineers by conducting code reviews, enforcing clean coding practices, and guiding them in adopting **containerization and microservice patterns**.
- ❖ Implemented monitoring and logging with **Prometheus and ELK stack**, which significantly improved fault detection and system observability across distributed environments.
- ❖ Partnered with data teams to design scalable **NoSQL data models**, ensuring seamless integration between real-time analytics and Vue.js dashboards.

Hexaview Technologies Inc.

Software Engineer

New York, NY | Jul 2018 – Mar 2023

- ❖ Developed **Java backend services with Spring Boot** and **Vue.js frontends** for fintech platforms, ensuring robust transaction processing with SQL and NoSQL databases.
- ❖ Designed and deployed applications on **AWS EC2 and GCP App Engine**, leveraging Docker for portable deployments and Kubernetes for resilient orchestration.
- ❖ Improved query performance by designing optimized **PostgreSQL and MongoDB schemas**, achieving significant improvements in scalability for high-volume data workloads.
- ❖ Delivered enterprise Vue.js modules with **Vuetify and Vue Router**, creating dynamic SPAs that enhanced user experience and met accessibility standards.
- ❖ Implemented authentication and authorization layers using **JWT, OAuth2, and Spring Security**, ensuring compliance with enterprise-grade security policies.
- ❖ Automated unit and integration testing pipelines with **JUnit, Mockito, Cypress, and Jest**, raising coverage across both Java backend and Vue.js frontend codebases.
- ❖ Supported DevOps adoption by migrating legacy deployments into **Dockerized microservices**, cutting manual deployment time and improving rollback reliability.
- ❖ Collaborated in agile sprints with cross-functional teams, ensuring timely delivery of features, mentoring peers, and participating in architecture reviews for enterprise projects.

SimbirSoft Company

Software Developer

Boston, MA | Mar 2015 – Jun 2018

- ❖ Built full-stack enterprise solutions by combining **Java Spring MVC backends with Vue.js-driven SPAs**, significantly improving user engagement through modern web interfaces.
- ❖ Designed and deployed Java microservices into **Docker containers**, orchestrated via Kubernetes clusters for fault-tolerant scaling and optimized cloud utilization.
- ❖ Created secure APIs with **Spring Boot**, integrating seamlessly with third-party services and exposing data to Vue.js applications through structured REST endpoints.
- ❖ Implemented **NoSQL (MongoDB, Redis) data caching layers** alongside SQL databases, achieving reduced query response times and improved application responsiveness.
- ❖ Contributed to frontend development with Vue.js, optimizing state management with **Vuex** and ensuring responsive UI with custom CSS and component libraries.
- ❖ Applied **agile methodologies** by collaborating closely with QA, design, and DevOps teams to deliver incrementally tested and production-ready features.
- ❖ Built automated CI/CD pipelines with Jenkins and Git, enabling continuous deployments of both backend services and Vue.js applications.
- ❖ Enhanced monitoring and troubleshooting capabilities by setting up **log aggregation and performance dashboards**, reducing downtime during production incidents.

Microsoft

Software Developer Intern

Cambridge, MA | Aug 2014 – Feb 2015

- ❖ Assisted in designing backend services in **Java** and contributed to frontend prototypes with early Vue.js components, supporting enterprise feature testing.

- ❖ Gained hands-on experience with **cloud deployments on Azure** while experimenting with Docker for containerization of internal microservices.
- ❖ Contributed to development of internal tools that integrated **SQL and NoSQL data stores**, supporting analytics and reporting systems.
- ❖ Participated in team code reviews and debugging sessions, learning professional software engineering standards from senior developers.
- ❖ Explored optimization of Java REST endpoints by analyzing profiling metrics and applying code refactoring practices.
- ❖ Supported test automation initiatives using JUnit and Selenium, ensuring quality delivery of microservice features under supervised mentorship.
- ❖ Documented technical processes and contributed to knowledge bases, improving onboarding for new team members.
- ❖ Learned Agile and Scrum methodologies through sprint participation and daily standups.

Projects

- ❖ **Enterprise Analytics Platform:** Built a Java + Vue.js analytics system integrated with AWS and GCP, enabling real-time dashboards powered by SQL and NoSQL data.
- ❖ **Fintech Microservices:** Designed scalable Java Spring Boot microservices with Vue.js SPAs for transaction management, deployed via Docker and Kubernetes.
- ❖ **Cloud Migration Toolkit:** Led migration of legacy systems into AWS/GCP hybrid infrastructure using Dockerized Java services and Vue.js web frontends.

Certifications

- ❖ **AWS Certified Solutions Architect – Associate**
- ❖ **Google Cloud Professional Cloud Developer**
- ❖ **Oracle Certified Professional: Java SE Programmer**
- ❖ **Docker Certified Associate**

Education

University of North Carolina at Chapel Hill

Bachelor's Degree in Computer Science (2010 – 2014)
