Professional Summary

Motivated JavaScript Developer with 9+ years of experience in full-stack engineering, CMS customization, workflow automation, and database optimization. Skilled in building scalable CMS modules, optimizing SQL queries, supporting large data migrations, and integrating REST APIs. Adept at balancing development and administration responsibilities while delivering efficient workflows and responsive technical support. Strong background in working with Rock RMS, WordPress, and enterprise CMS platforms, with expertise across AWS, GCP, SQL/NoSQL, and containerized environments.

Technical Skills

- ❖ **Programming & Frameworks:** JavaScript (ES6+), jQuery, Node.js, React, HTML5, CSS3
- ❖ **CMS Platforms:** Rock RMS, WordPress, Drupal, Sitecore, Custom CMS modules
- ❖ **Databases:** SQL (PostgreSQL, MySQL, MS SQL Server), NoSQL (MongoDB, Redis, DynamoDB)
- ❖ **Workflow Automation:** Lava, Liquid, Zapier, API-based automations
- ❖ **Cloud & Infrastructure:** AWS (Lambda, RDS, S3, ECS), GCP (Cloud SQL, Cloud Run, Pub/Sub), Docker, Git, CI/CD pipelines
- ❖ **Integration & APIs:** REST API design, authentication (OAuth/JWT), schema design, backup & restore
- ❖ **Other Tools:** GitHub, GitLab, Jira, Confluence

Professional Experience

SumatoSoft

Senior Software Engineer

Boston, MA (Remote) | Apr 2023 – Mar 2025

- ❖ Designed and implemented advanced CMS modules, extending workflows with JavaScript and SQL, while optimizing system performance for high-traffic platforms.
- ❖ Supported complex data migrations, including schema transformations, SQL query optimization, and error-tolerant rollback strategies across multiple systems.
- ❖ Built integrations between Rock RMS and third-party tools via REST APIs, ensuring secure authentication and smooth end-to-end workflows across environments.
- ❖ Automated recurring tasks using Lava scripting, workflow rules, and API hooks, reducing manual data processing and accelerating reporting turnaround time.
- ❖ Provided tier 2/3 technical support, resolving escalated CMS, API, and SQL issues with structured debugging and proactive monitoring.
- ❖ Deployed CMS and backend services on AWS and GCP, leveraging Docker containers and cloud database services to ensure scalability and reliability.
- ❖ Collaborated with stakeholders to capture requirements and translate them into maintainable CMS features that aligned with business goals.

- ❖ Documented all migration, integration, and workflow automation procedures to strengthen team knowledge and ensure repeatable deployments.

Hexaview Technologies Inc.

Software Engineer

New York, NY | Jul 2018 – Mar 2023

- ❖ Developed custom CMS modules in JavaScript and jQuery, enhancing content workflows while ensuring maintainability through reusable, documented code.
- ❖ Managed SQL database operations, optimizing queries for performance and implementing structured schema design for scalable, secure data handling.
- ❖ Built and maintained REST API integrations with external CRMs, ensuring seamless data exchange and compliance with API security standards.
- ❖ Supported Rock RMS customization and provided direct client support for CMS module behavior, performance, and integrations.
- ❖ Designed workflow automations with Liquid templates and event-based triggers, reducing repetitive manual operations and enabling end-user self-service.
- ❖ Migrated CMS deployments into Dockerized containers, improving environment consistency, automated testing, and streamlined CI/CD pipelines.
- ❖ Mentored junior developers on JavaScript best practices, debugging CMS workflows, and implementing efficient SQL queries.
- ❖ Delivered stakeholder presentations on CMS enhancements, workflow efficiency gains, and long-term scalability strategies.

SimbirSoft Company

Software Developer

Boston, MA | Mar 2015 – Jun 2018

- ❖ Developed and extended CMS applications in JavaScript and jQuery, including custom plugins, advanced templates, and admin interfaces.
- ❖ Conducted SQL query optimization and schema restructuring for enterprise databases, ensuring scalability and resilience under high workloads.
- ❖ Automated content publishing workflows by leveraging templating languages and API triggers to reduce latency and human error.
- ❖ Implemented RESTful services to integrate CMS with payment gateways, email platforms, and reporting tools, ensuring real-time synchronization.
- ❖ Contributed to Rock RMS feature enhancements, customizing data blocks and workflows to align with user needs.
- ❖ Delivered structured tier 2 technical support for CMS issues, collaborating with QA and DevOps teams to deliver patches and fixes.
- ❖ Migrated CMS platforms into Docker-based environments, ensuring smooth rollouts and reproducible deployments across test and production.
- ❖ Coordinated directly with clients to design CMS features that aligned with strategic digital transformation goals.

Microsoft

Software Developer Intern

Cambridge, MA | Aug 2014 – Feb 2015

- ❖ Assisted in CMS integration projects, enhancing JavaScript modules and supporting SQL schema updates for enterprise application rollouts.
- ❖ Contributed to workflow automation scripts that reduced manual database administration and improved CMS system reliability.
- ❖ Supported internal stakeholders with technical troubleshooting, documenting knowledge base solutions for recurring CMS challenges.
- ❖ Collaborated with senior engineers to optimize CMS data handling using SQL and REST API connectors.
- ❖ Developed CMS feature prototypes that were later integrated into enterprise production environments.
- ❖ Gained early exposure to containerized development and contributed to experiments in Docker-based CMS deployment workflows.
- ❖ Participated in technical reviews, refining CMS features to improve system stability, user satisfaction, and long-term maintainability.
- ❖ Engaged in cross-team collaboration to expand CMS functionality and enhance system adoption across multiple departments.

Projects

- ❖ **Rock RMS Migration Tool:** Built a scalable data migration system with rollback capability for church databases.
- ❖ **CMS Workflow Automator:** Designed reusable Lava/Liquid scripts for workflow automation across multiple CMS platforms.
- ❖ **REST API Integrator:** Developed API services enabling CMS platforms to integrate securely with CRMs and external tools.
- ❖ **Dockerized CMS Deployment:** Migrated CMS systems into Docker containers with CI/CD pipelines for repeatable cloud deployments.

Certifications

- ❖ AWS Certified Solutions Architect – Associate
- ❖ Google Cloud Associate Engineer
- ❖ Docker Certified Associate
- ❖ Microsoft SQL Server Database Certification

Education

University of North Carolina at Chapel Hill

Bachelor's Degree in Computer Science (2010 – 2014)
