SUMMARY

Senior Software Engineer with 9+ years of experience building high-performance, scalable, and user-centric web applications for SaaS platforms. Strong hands-on expertise in React and Next.js, including server-side rendering (SSR) and static site generation (SSG) to deliver fast, SEO-optimized applications. Proven experience integrating REST and GraphQL APIs with secure and efficient frontend architectures. Adept at translating complex UX/UI requirements into clean, maintainable components using modern JavaScript and TypeScript. Known for performance optimization, responsive design, and close collaboration with cross-functional teams in agile environments.

SKILLS

JavaScript (ES6+)	TypeScript	Next.js	React
HTML5	CSS3	Responsive Design	Accessibility (WCAG)
Redux	Context API	REST APIs	GraphQL
API Integration	Webpack	Babel	CI/CD
Git	SSR	SSG	Code Splitting
Caching Strategies	Frontend Performance Optimization		

EXPERIENCE

Senior Software Engineer

SumatoSoft

April 2022 - December 2025

- Designed and developed modern web applications using React and Next.js with a strong focus on performance, scalability, and maintainability.
- Implemented server-side rendering (SSR) and static site generation (SSG) in Next.js to improve SEO, initial load times, and overall user experience.
- Built reusable, responsive UI components by collaborating closely with UX/UI designers and product managers.
- Integrated RESTful and GraphQL APIs to ensure secure, efficient, and reliable data flow between frontend and backend systems.
- Applied performance optimization techniques such as code splitting, lazy loading, and caching strategies across Next.js applications.
- Worked extensively with TypeScript to enforce type safety and improve long-term maintainability of frontend codebases.
- Collaborated with backend engineers to align API contracts and ensure seamless frontend-backend integration.
- Participated in architectural discussions to evolve frontend architecture for complex SaaS platforms.
- Led code reviews and provided mentorship to junior engineers on React and Next.js best practices.
- Supported CI/CD pipelines and production deployments to ensure reliable and repeatable releases.
- Delivered features end-to-end in agile environments while maintaining high quality and performance standards.

Software Engineer

Hexaview Technologies Inc.

July 2018 - March 2022

- Developed and enhanced frontend features using React and modern JavaScript for enterprise SaaS

applications.

- Contributed hands-on to Next.js-based modules, gaining practical experience with SSR and page-level optimization.
 - Integrated frontend applications with REST APIs and GraphQL endpoints for data-driven interfaces.
 - Collaborated with designers to convert wireframes and prototypes into functional, responsive components.
 - Optimized application performance through efficient state management and rendering strategies.
 - Maintained consistent UI patterns through reusable component libraries.
 - Worked with Git-based workflows and CI/CD pipelines to support continuous delivery.
 - Participated in peer code reviews to improve code quality and shared best practices.
 - Delivered features in agile teams while meeting performance and usability requirements.
-

Software Developer

SimbirSoft Company

March 2015 - June 2018

- Built and maintained frontend user interfaces using JavaScript, HTML, and CSS for data-intensive web applications.
 - Collaborated with backend developers to integrate RESTful services into frontend components.
 - Implemented responsive design techniques to ensure compatibility across browsers and devices.
 - Improved page performance and usability through optimized rendering and asset management.
 - Contributed to frontend architecture discussions as applications scaled in complexity.
 - Focused on writing clean, modular, and maintainable frontend code.
 - Supported production releases and resolved frontend defects in live environments.
-

Software Developer Intern

Microsoft

August 2014 - February 2015

- Assisted in developing frontend features for internal web applications using JavaScript and HTML.
 - Worked closely with senior engineers to implement UI components and fix bugs.
 - Supported integration of frontend components with backend services and APIs.
 - Learned and applied software engineering best practices including version control and code reviews.
 - Gained hands-on experience working within an agile enterprise development environment.
-

EDUCATION

Bachelor of Computer Science

The University of North Carolina at Chapel Hill

2010 - 2014
