Professional Summary

Full-stack engineer with extensive expertise in designing and scaling enterprise applications using **Angular**, **Node.js**, **SQL/NoSQL databases**, and **cloud platforms (AWS & GCP)**. Proven track record in building high-performance microservices, containerized solutions with **Docker**, and leading teams to deliver robust web platforms. Adept in translating complex business requirements into secure, maintainable, and scalable software systems.

Technical Skills

- ❖ **Frontend:** Angular 12+, TypeScript, RxJS, NgRx, HTML5, CSS3
- ❖ **Backend:** Node.js, Express.js, REST, GraphQL, Microservices
- ❖ **Databases:** PostgreSQL, MySQL, MongoDB, Redis, NoSQL stores
- ❖ **Cloud & DevOps:** AWS, GCP, Docker, CI/CD pipelines, Kubernetes

Professional Experience

SumatoSoft

Senior Software Engineer
Boston, MA (Remote) | Apr 2023 – Mar 2025

- ❖ Designed and implemented full-stack solutions leveraging **Angular on the frontend and Node.js microservices on the backend**, ensuring seamless integration and high system resilience.
- ❖ Spearheaded migration of monolithic architecture into containerized **Dockerized microservices deployed across AWS and GCP**, enhancing scalability, monitoring, and recovery capabilities.
- ❖ Developed enterprise-grade RESTful APIs and GraphQL endpoints in Node.js, integrating **SQL and NoSQL data models** to optimize both structured and unstructured data flows.
- ❖ Optimized Angular UI components for high-traffic applications, implementing **state management with NgRx** and improving load times while maintaining WCAG accessibility standards.
- ❖ Implemented **secure authentication flows with JWT and OAuth2** across distributed systems, integrating SSO and robust role-based access controls.
- ❖ Designed CI/CD pipelines with GitHub Actions and GitLab CI, ensuring **automated test coverage, Docker image builds, and deployments to cloud environments**.
- ❖ Mentored junior engineers in **Angular best practices, Node.js performance tuning, and database query optimization**, fostering a knowledge-sharing culture.
- ❖ Collaborated with cross-functional teams to deliver **data-intensive dashboards and reporting modules**, leveraging Angular visualizations with backend aggregation pipelines.

Hexaview Technologies Inc.

Software Engineer

New York, NY | Jul 2018 – Mar 2023

- ❖ Engineered scalable **Angular-based frontends integrated with Node.js APIs**, delivering enterprise SaaS solutions with responsive UIs and strong security models.
- ❖ Built reusable Angular component libraries and introduced **modular architecture**, reducing code duplication and enabling faster feature delivery.
- ❖ Implemented **caching strategies with Redis and NoSQL databases**, reducing latency for data-intensive features by optimizing storage and retrieval.
- ❖ Automated deployments using **Docker and container orchestration tools** to deliver fault-tolerant services across hybrid cloud environments.
- ❖ Enhanced backend resilience by implementing **rate limiting, load balancing, and retry mechanisms** in Node.js services under high-concurrency workloads.
- ❖ Designed and tuned complex **SQL queries and stored procedures** for PostgreSQL and MySQL databases, ensuring data integrity and query performance.
- ❖ Collaborated with product owners to translate requirements into actionable epics, building **REST APIs and GraphQL resolvers** that aligned with business goals.
- ❖ Performed **code reviews and architecture assessments**, enforcing standards in Angular styling, TypeScript type safety, and Node.js asynchronous patterns.

SimbirSoft Company

Software Developer

Boston, MA | Mar 2015 – Jun 2018

- ❖ Built **Angular single-page applications integrated with Node.js backends**, ensuring smooth user interactions with complex business logic.
- ❖ Designed **REST APIs** with Express.js and integrated them into Angular frontends with RxJS observables and NgRx state management.
- ❖ Enhanced application reliability by implementing **error handling, logging pipelines, and monitoring tools** for proactive issue detection.
- ❖ Migrated legacy systems into **modern full-stack architectures with SQL and NoSQL hybrid persistence layers**, improving both performance and maintainability.
- ❖ Containerized legacy applications with **Docker**, introducing repeatable build environments and reducing environment-specific errors.
- ❖ Developed **real-time chat and notification features** using WebSockets in Node.js, integrated with Angular UI updates.
- ❖ Created **data visualization dashboards in Angular**, connected to backend aggregation services that queried both SQL and NoSQL sources.
- ❖ Collaborated closely with QA and DevOps teams to deliver tested, deployable modules using **CI/CD best practices**.

Microsoft

Software Developer Intern

Cambridge, MA | Aug 2014 – Feb 2015

- ❖ Contributed to frontend modules in **AngularJS and TypeScript**, enhancing usability of internal productivity tools.

- ❖ Assisted in building **Node.js API endpoints** supporting internal dashboards with SQL Server and NoSQL store integrations.
- ❖ Participated in early adoption of **containerization with Docker**, packaging prototypes for repeatable deployments.
- ❖ Collaborated with senior engineers on implementing **authentication flows, session management, and security protocols**.
- ❖ Enhanced testing reliability by contributing to **unit tests and end-to-end test frameworks** in Angular.
- ❖ Gained practical exposure to **cloud infrastructure deployments on AWS**, focusing on monitoring and logging.
- ❖ Designed documentation for **cross-team integration and API specifications**, supporting long-term maintainability.
- ❖ Learned enterprise coding best practices including **linting, style guides, and peer review processes**.

Projects

- ❖ **Smart Retail Dashboard:** Developed a cloud-hosted Angular + Node.js solution for real-time sales analytics with SQL and NoSQL hybrid data persistence.
- ❖ **Healthcare Portal:** Built a secure, HIPAA-compliant platform with Angular UI, Node.js APIs, and Dockerized deployment on AWS and GCP.
- ❖ **E-commerce Engine:** Implemented microservices in Node.js with Angular storefront, enabling real-time inventory management and seamless customer experience.

Certifications

- ❖ **AWS Certified Solutions Architect – Associate**
- ❖ **Google Cloud Professional Cloud Developer**
- ❖ **Docker Certified Associate**

Education

University of North Carolina at Chapel Hill

Bachelor's Degree in Computer Science (2010 – 2014)
