Professional Summary

Full-stack software engineer with extensive expertise in **PHP, Vue.js, SQL, NoSQL, AWS, GCP, and Docker**, delivering scalable, high-performance applications across diverse industries. Skilled in designing modular architectures, optimizing complex queries, and building cloud-native solutions that balance reliability, cost, and developer velocity. Adept at collaborating with cross-functional teams, leading code reviews, and mentoring junior engineers while driving product success with technical excellence.

Technical Skills

- ❖ **Languages & Frameworks:** PHP, Vue.js, JavaScript (ES6+), TypeScript, Node.js
- ❖ **Databases:** SQL (PostgreSQL, MySQL), NoSQL (MongoDB, Redis)
- ❖ **Cloud & DevOps:** AWS (EC2, S3, RDS, Lambda), GCP (Cloud Run, Firestore, Pub/Sub), Docker, CI/CD pipelines
- ❖ **Other:** REST & GraphQL APIs, Microservices, Agile/Scrum, Git

Professional Experience

SumatoSoft

Senior Software Engineer
Boston, MA (Remote) | Apr 2023 – Mar 2025

- ❖ Spearheaded the development of enterprise-grade full-stack applications using **PHP and Vue.js**, ensuring code scalability, testability, and long-term maintainability.
- ❖ Built and optimized **SQL and NoSQL database schemas**, integrating caching strategies with Redis to handle high-volume requests and deliver faster data throughput.
- ❖ Deployed and managed **cloud infrastructure on AWS and GCP**, leveraging Dockerized services to ensure consistency across staging, testing, and production environments.
- ❖ Collaborated closely with cross-functional teams, including product managers and designers, to align technical solutions with evolving business goals.
- ❖ Led the creation of **secure REST and GraphQL APIs**, standardizing endpoints and improving interoperability across microservices-driven platforms.
- ❖ Mentored junior engineers through code reviews and pair programming, fostering engineering best practices while reducing defect rates across the codebase.
- ❖ Introduced observability tools and monitoring pipelines that proactively identified bottlenecks, improving uptime and reducing operational costs.
- ❖ Championed Agile ceremonies and technical roadmap planning, ensuring that sprints were predictable, transparent, and outcome-driven.

Hexaview Technologies Inc.

Software Engineer

New York, NY | Jul 2018 – Mar 2023

- ❖ Designed and implemented **modular PHP backends and Vue.js frontends**, supporting complex workflows for enterprise clients across fintech and retail domains.
- ❖ Optimized SQL queries and tuned database indices, significantly reducing latency on high-traffic transaction systems while maintaining strict data integrity.
- ❖ Built containerized environments with **Docker**, streamlining onboarding and ensuring consistent deployments across development, QA, and production stages.
- ❖ Integrated **AWS Lambda and GCP Pub/Sub** into workflows, enabling real-time event-driven processing and seamless scaling for distributed services.
- ❖ Partnered with architects to migrate legacy monolithic systems into microservices, improving maintainability and enabling independent deployment cycles.
- ❖ Delivered robust authentication and authorization modules, enforcing **OAuth2/JWT standards** to secure sensitive enterprise data.
- ❖ Automated build and release processes with CI/CD pipelines, reducing downtime and increasing release velocity while enforcing unit and integration test coverage.
- ❖ Coordinated with stakeholders to gather requirements, refine user stories, and translate business goals into technical deliverables that exceeded client expectations.

SimbirSoft Company

Software Developer

Boston, MA | Mar 2015 – Jun 2018

- ❖ Built and maintained **PHP and Vue.js applications**, focusing on performance optimization and clean code principles aligned with industry best practices.
- ❖ Designed normalized SQL schemas and implemented NoSQL data models, allowing systems to balance strong consistency with high availability.
- ❖ Integrated third-party services and APIs into large-scale applications, ensuring seamless data exchange and system interoperability across platforms.
- ❖ Leveraged **Docker containers** for testing environments, reducing inconsistencies across developer machines and streamlining QA workflows.
- ❖ Contributed to **Agile development practices**, ensuring that deliverables were shipped incrementally, tested thoroughly, and aligned with sprint goals.
- ❖ Introduced **unit testing frameworks** and continuous integration tools, increasing software reliability and reducing production defects.
- ❖ Participated in technical design discussions, presenting architecture diagrams and database schema proposals to align with business requirements.
- ❖ Provided post-deployment support and troubleshooting, ensuring rapid resolution of user-reported issues and enhancing overall system reliability.

Microsoft

Software Developer Intern

Cambridge, MA | Aug 2014 – Feb 2015

- ❖ Supported the development of **PHP-based backend services** and experimented with early Vue.js prototypes to enhance user interfaces for internal tooling.
- ❖ Assisted in migrating legacy applications to newer stacks, documenting processes and creating training material for broader engineering adoption.

- ❖ Designed and executed SQL queries to validate data pipelines, supporting analytics teams in uncovering business insights from large datasets.
- ❖ Contributed to sprint ceremonies and Agile workflows, gaining hands-on experience with modern engineering processes within a high-performing team.
- ❖ Collaborated with senior engineers on debugging sessions, gaining insights into large-scale system optimization techniques and coding best practices.
- ❖ Created internal utilities that automated repetitive workflows, reducing manual effort for engineering and operations teams.
- ❖ Conducted code reviews with guidance from mentors, learning best practices in security, maintainability, and test coverage.
- ❖ Delivered small but impactful features that improved productivity across engineering teams, reinforcing the importance of detail-oriented execution.

Projects

- ❖ **E-Commerce Optimization Platform:** Built a scalable PHP + Vue.js application with AWS-hosted microservices, enabling personalized shopping experiences.
- ❖ **Fintech Transaction Engine:** Developed a secure, containerized payments gateway integrating SQL and NoSQL databases, ensuring low-latency processing.
- ❖ **Analytics Dashboard:** Designed a Vue.js visualization tool with real-time updates powered by GCP Pub/Sub, enabling actionable business intelligence.

Certifications

- ❖ **AWS Certified Solutions Architect – Associate**
- ❖ **Google Cloud Professional Cloud Developer**
- ❖ **Docker Certified Associate (DCA)**

Education

University of North Carolina at Chapel Hill

Bachelor's Degree in Computer Science (2010 – 2014)
