SUMMARY

Senior Software Engineer with 9+ years of experience specializing in frontend engineering for SaaS platforms, with a strong focus on React, TypeScript, and scalable UI architectures. Proven ability to design and deliver high-performance, accessible, and user-centric web applications in regulated and data-sensitive environments such as healthcare. Extensive experience collaborating with backend, product, and design teams to translate complex requirements into intuitive interfaces. Strong advocate for frontend best practices, performance optimization, and maintainable architectures. Experienced mentor and code reviewer who drives quality, scalability, and long-term technical excellence across teams.

SKILLS

JavaScript	TypeScript	React	Angular
HTML5	CSS3	Responsive Design	Accessibility (WCAG)
REST APIs	API Integration	PostgreSQL	AWS
Azure	CI/CD	Git	Frontend Architecture
Performance Optimization	Code Reviews	Testing Best Practices	

EXPERIENCE

Senior Software Engineer

SumatoSoft

April 2022 - December 2025

- Designed and delivered scalable, high-performance frontend applications using React and TypeScript for SaaS platforms in healthcare and regulated industries.
- Collaborated closely with backend engineers to integrate RESTful APIs, ensuring secure, reliable, and performant data-driven user experiences.
- Partnered with product managers and designers to translate complex healthcare workflows into intuitive, accessible, and responsive user interfaces.
- Led frontend architecture decisions, introducing reusable component patterns and performance optimizations to support long-term scalability.
- Implemented accessibility and responsive design best practices to ensure compliance with WCAG standards and cross-device usability.
- Optimized application performance by reducing bundle sizes, improving rendering efficiency, and enhancing perceived load times.
- Actively contributed to cloud-based deployments and CI/CD pipelines to support reliable and frequent releases.
- Conducted thorough code reviews to maintain high engineering standards and ensure clean, maintainable codebases.
- Mentored junior engineers, providing guidance on React patterns, TypeScript usage, and frontend best practices.
- Collaborated in distributed teams, ensuring clear communication and alignment across engineering, product, and design.

Software Engineer

Hexaview Technologies Inc.

July 2018 - March 2022

- Developed and enhanced frontend features for enterprise SaaS applications using modern JavaScript

frameworks with a strong emphasis on React.

- Built reusable, maintainable UI components aligned with shared design systems to ensure consistency across applications.
- Integrated frontend applications with backend REST APIs, ensuring secure authentication flows and accurate data rendering.
- Collaborated with cross-functional teams to deliver scalable solutions supporting business-critical workflows.
- Improved frontend performance and responsiveness through code optimization and efficient state management.
- Participated actively in code reviews, contributing to improved code quality and shared engineering standards.
- Worked in agile environments, delivering features iteratively while adapting to evolving product requirements.
- Ensured cross-browser and cross-device compatibility for complex user interfaces.
- Contributed to architectural discussions around frontend scalability and maintainability.

Software Developer

SimbirSoft Company

March 2015 - June 2018

- Built and maintained web application user interfaces using JavaScript, HTML, and CSS for data-intensive business applications.
- Collaborated with backend developers to integrate APIs and ensure seamless frontend-to-backend communication.
- Implemented responsive design techniques to support consistent experiences across desktop and mobile devices.
- Contributed to frontend architecture decisions to support application growth and increasing complexity.
- Focused on writing clean, maintainable, and testable frontend code aligned with long-term product goals.
- Assisted in performance tuning and UI optimizations to improve user experience.
- Worked within distributed teams, gaining experience delivering production-ready software in professional environments.

Software Developer Intern

Microsoft

August 2014 - February 2015

- Supported frontend and full-stack development on internal enterprise web applications.
- Implemented JavaScript-based UI components under the guidance of senior engineers.
- Assisted in integrating frontend components with backend services and internal APIs.
- Learned and applied professional software engineering practices including version control and code reviews.
- Collaborated within an agile team environment, gaining exposure to large-scale software development workflows.

EDUCATION

Bachelor of Computer Science

The University of North Carolina at Chapel Hill

2010 - 2014
