Professional Summary

Seasoned Front-End Engineer with over 10 years of experience building scalable, component-driven, and accessible digital experiences across Drupal and modern JavaScript stacks. Proven leader in front-end architecture, performance optimization, and mentoring, with deep proficiency in Drupal theming, JavaScript frameworks, and decoupled architectures. Passionate about building mission-driven platforms that marry UX excellence with technical rigor.

Technical Skills

- ❖ **Front-End:** JavaScript (ES6+), TypeScript, React, Vue.js, Angular, HTML5, CSS3, SCSS, Twig, Tailwind, Responsive Design, Component Libraries, Accessibility (WCAG), Performance Tuning
- ❖ **CMS / Frameworks:** Drupal 7/8/9/10, WordPress, Next.js, Nuxt.js
- ❖ **DevOps & CI/CD:** Git, GitHub Actions, Bitbucket Pipelines, Docker, Pantheon, Acquia, Vercel, Netlify
- ❖ **Testing & QA:** Cypress, Jest, Lighthouse, Google PageSpeed, BrowserStack, Axe
- ❖ **Cloud & Databases:** AWS (S3, Lambda, CloudFront), GCP (App Engine, Firebase), Azure DevOps, MySQL, PostgreSQL, MongoDB, Redis
- ❖ **Other Tools:** Webpack, Figma, Storybook, Google Analytics, Tag Manager

Professional Experience

SumatoSoft

Senior Software Engineer

Boston, MA (Remote) | Apr 2023 – Mar 2025

- Spearheaded front-end technical strategy for Drupal and headless builds, including component architecture, caching layers, and multi-device accessibility, reducing page load times by 40%.
- Led implementation of a custom component system integrated with Figma design tokens, empowering cross-team collaboration and reusability across five enterprise applications.
- Developed decoupled front-ends using React and Vue integrated with Drupal via JSON:API, enabling flexible content delivery while maintaining editorial workflows.
- Architected a design system compliant with WCAG 2.1 and implemented real-time auditing with automated Lighthouse and Axe scans in CI pipelines.
- Collaborated with UX teams to define breakpoints, typography scales, and accessibility patterns, ensuring consistency across 10+ client sites.
- Integrated Pantheon hosting automation and CI pipelines for automated deployment, visual regression tests, and accessibility audits.
- Established frontend documentation standards using Storybook and markdown specs, improving onboarding and internal knowledge transfer.

- Mentored junior developers in component-based architecture, Git workflows, and Drupal theming best practices, raising team velocity by 30%.

Hexaview Technologies Inc.

Software Engineer

New York, NY | Jul 2018 – Mar 2023

- Led Drupal 9 frontend migration projects using progressive decoupling strategies combining Twig templates and embedded React components, streamlining legacy modernization.
- Designed and implemented global SCSS architecture with BEM methodology, reducing CSS bloat and improving maintainability across multiple white-label solutions.
- Created reusable frontend components for 10+ B2B applications, integrated with Drupal views and blocks, while adhering to WCAG AA standards.
- Delivered pixel-perfect UI experiences by translating complex UX prototypes from Figma into modular components backed by performance budgets.
- Built front-end testing frameworks using Cypress and integrated them with GitHub Actions for continuous UI validation across browsers.
- Defined caching strategies and performance optimization pipelines leveraging Cloudflare and Pantheon Advanced Page Cache modules.
- Contributed to Drupal community through patch contributions and co-authored a frontend performance guide used across three delivery teams.
- Participated in agile ceremonies as Scrum lead, coordinating cross-functional collaboration and technical scoping for large-scale front-end features.

SimbirSoft Company

Software Developer

Boston, MA | Mar 2015 – Jun 2018

- Delivered fully responsive Drupal themes with advanced Twig templating and Bootstrap 4 integration, improving mobile UX by over 50% across user segments.
- Implemented front-end design systems with style guides and token-based theming, enabling reusable templates and consistent branding.
- Engineered multilingual and RTL support across government websites, including front-end accessibility localization logic.
- Streamlined legacy front-end architecture by modularizing global components into feature-driven directories with scoped styles.
- Participated in stakeholder workshops to define UI logic, front-end validation, and user journey flows, translating them into sprint-ready tasks.
- Integrated analytics tracking using Google Tag Manager and A/B testing frameworks to inform future UI decisions.
- Automated deployment using Gulp and Docker for cross-environment parity and reproducibility.
- Contributed to DevOps pipeline for static asset optimization, reducing time-to-first-byte by 35%.

Microsoft

Software Developer Intern

Cambridge, MA | Aug 2014 – Feb 2015

- Developed internal UI components for SharePoint using Knockout.js and vanilla JavaScript, improving documentation search UX by 60%.
- Refactored large codebases to adopt modular patterns and linting standards, improving front-end maintainability across teams.
- Integrated telemetry dashboards with GA and internal analytics to monitor feature usage and optimize UI patterns accordingly.
- Collaborated with accessibility team to build screen reader-compatible components and semantic HTML layouts.
- Built a prototype content moderation dashboard with React and deployed via Azure App Services for internal content workflows.
- Conducted QA and cross-browser compatibility testing across IE11, Edge, Chrome, and Firefox using Selenium and in-house tools.
- Presented front-end performance optimization strategies to engineering leaders, sparking further research in caching techniques.
- Supported junior interns in front-end Git workflows and HTML/CSS best practices, boosting delivery timelines for internal tooling.

Projects

❖ Decoupled Drupal + React Site for Public Health

Built a fast, accessible site using Drupal as a headless CMS with a React front-end. Used JSON:API, lazy loading, and reusable components to improve performance and flexibility.

❖ Drupal Component Library for Universities

Led the creation of an accessible UI library in Drupal using Twig and SCSS. Ensured all components met WCAG 2.1 standards and worked with UX teams to maintain design consistency.

❖ Drupal Multi-Site Platform for Global NGO

Developed a Drupal 9 platform supporting multiple regional sites. Used layout builder, multilingual theming, and automated deployments via Pantheon.

❖ Static JAMstack Site with Nuxt + Drupal

Created a static site using Nuxt.js and Drupal GraphQL API. Added search with Algolia and deployed with Netlify for fast, SEO-friendly pages.

Certifications

- **Acquia Certified Front-End Specialist**
- **Google Web Fundamentals - Performance Optimization**
- **AWS Cloud Practitioner**
- **GCP Associate Cloud Engineer**
- **MongoDB for Front-End Devs – Mongo University**

Education

University of North Carolina at Chapel Hill

Bachelor's Degree in Computer Science (2010 – 2014)
