SUMMARY

Senior Software Engineer with 15+ years of experience building, scaling, and operating full-stack web applications and backend systems in fast-paced SaaS environments. Deep expertise in TypeScript, React, Next.js, and Node.js with a strong focus on data-intensive workflows, serverless architectures, and AWS event-driven systems. Proven track record of designing robust solutions for CSV ingestion, data parsing, and record reconciliation using AWS Lambda, S3 events, and relational databases. Comfortable operating with high autonomy, owning features end-to-end, and leading small pods of engineers while remaining hands-on. Known for relentlessly high engineering standards, strong communication, and the ability to translate complex business problems into reliable, scalable software.

SKILLS

JavaScript	TypeScript	PHP	React
Next.js	HTML5	CSS3	Responsive Design
Accessibility (WCAG)	Node.js	REST APIs	Serverless Architecture
Data Processing	CSV Parsing	PostgreSQL	MySQL
AWS	AWS Lambda	S3	SNS
EventBridge	CI/CD	Git	Docker
Code Reviews	Agile/Scrum	JIRA	Sprint Planning
Technical Leadership			

EXPERIENCE

Senior Software Engineer

SumatoSoft

April 2022 - December 2025

- Designed and developed full-stack applications using React, Next.js, TypeScript, and Node.js to support complex SaaS workflows.
- Built scalable backend services focused on data ingestion, CSV parsing, validation, and matching records against existing customer datasets.
- Implemented AWS serverless solutions using Lambda, S3 event triggers, SNS, and EventBridge to process uploaded files reliably and at scale.
- Collaborated closely with product managers and designers to translate business requirements into robust, maintainable technical solutions.
- Partnered with architects to design event-driven systems emphasizing performance, fault tolerance, and observability.
- Owned features end-to-end, from technical design and estimation through implementation, deployment, and production support.
- Led code reviews and enforced high standards for code quality, testing, and documentation across the team.
- Actively contributed to sprint planning, grooming, and delivery while holding accountability for timelines and outcomes.
- Mentored junior and mid-level engineers, providing guidance on full-stack best practices and AWS serverless patterns.
- Optimized database queries and data pipelines in PostgreSQL to ensure performance and scalability under

heavy workloads.

- Worked flexible hours when required to support releases, incident response, and business-critical deadlines.

Software Engineer

Hexaview Technologies Inc.

July 2018 - March 2022

- Developed and maintained full-stack web applications using React, JavaScript, Node.js, and relational databases.
- Implemented backend services to handle data-heavy workflows, including importing, transforming, and validating structured datasets.
- Integrated frontend applications with REST APIs to ensure secure and reliable data exchange.
- Worked extensively with PostgreSQL and MySQL, focusing on schema design, query optimization, and data integrity.
- Collaborated within Agile teams, participating in daily stand-ups, sprint planning, and retrospectives.
- Contributed to code reviews and helped standardize engineering best practices across the team.
- Supported deployment pipelines and version control workflows using Git and CI/CD tools.
- Partnered with QA and product stakeholders to troubleshoot issues and improve system reliability.
- Demonstrated strong ownership and accountability for delivered features in production environments.

Software Developer

SimbirSoft Company

March 2015 - June 2018

- Built and maintained web application interfaces using JavaScript, HTML, and CSS.
- Developed backend integrations to support data-driven business applications.
- Worked with relational databases to store, retrieve, and process application data.
- Implemented responsive design principles to ensure cross-device compatibility.
- Collaborated with cross-functional teams to deliver production-ready software.
- Contributed to architectural discussions and incremental system improvements.
- Focused on writing clean, maintainable, and testable code.

Software Developer Intern

Microsoft

August 2014 - February 2015

- Assisted in developing internal web applications using JavaScript and related technologies.
- Implemented UI components and fixed bugs under the guidance of senior engineers.
- Supported integration of frontend components with backend services and APIs.
- Learned enterprise-grade software engineering practices including version control and code reviews.
- Gained hands-on experience working within an Agile development environment.

EDUCATION

Bachelor of Computer Science

The University of North Carolina at Chapel Hill

2010 - 2014
