SUMMARY

Senior Software Engineer with 9+ years of experience designing and delivering scalable, user-centric web applications in SaaS and platform environments. Strong frontend-leaning full-stack expertise with deep experience building modern UI architectures, design systems, and responsive interfaces using component-based frameworks. Proven ability to collaborate closely with Product and UX partners to translate complex workflows into intuitive, accessible user experiences. Experienced in building and integrating backend APIs, supporting data-driven platforms, and delivering maintainable systems from greenfield through production. Recognized for ownership, clear communication, and the ability to shape platform foundations that scale predictably over time.

SKILLS

JavaScript	TypeScript	Python	React
Vue	HTML5	CSS3	Design Systems
Responsive Design	Accessibility (WCAG)	REST APIs	Django
Sanic	API Integration	PostgreSQL	MySQL
AWS	CI/CD	Git	Frontend Architecture
Performance Optimization	Testing Best Practices	Code Reviews	

EXPERIENCE

Senior Software Engineer

SumatoSoft

April 2022 - December 2025

- Designed and delivered frontend-leaning full-stack features for large-scale SaaS platforms, focusing on maintainable UI architecture and long-term scalability.
- Established shared frontend patterns, component structures, and data-fetching approaches to support predictable platform growth.
- Collaborated closely with Product Managers and UX Designers to translate complex business and instructional workflows into intuitive user experiences.
- Built responsive, accessible interfaces aligned with WCAG standards to support diverse user populations and real-world usage constraints.
- Implemented and evolved reusable UI components and shared utilities to improve consistency and development velocity.
- Integrated frontend applications with backend REST APIs using Django-based services, ensuring reliable data flow and performance.
- Optimized frontend performance, reducing load times and improving responsiveness across complex, data-driven screens.
- Contributed to architectural decisions balancing near-term feature delivery with long-term platform sustainability.
- Led code reviews and mentored engineers, reinforcing best practices in frontend architecture and clean code.
- Partnered with cross-functional teams in sprint-based delivery environments, contributing to planning, estimation, and retrospectives.
- Supported CI/CD pipelines and cloud-based deployments to ensure reliable releases in production environments.

Software Engineer

Hexaview Technologies Inc.

July 2018 - March 2022

- Developed and enhanced frontend-heavy features for enterprise SaaS applications using modern JavaScript frameworks.
- Built reusable, component-based UI systems that improved consistency and reduced duplication across applications.
- Worked closely with backend engineers to integrate RESTful APIs and ensure accurate, performant data presentation.
- Collaborated with Product and Design partners to implement user workflows aligned with business requirements.
- Optimized frontend performance and responsiveness for users across devices and browsers.
- Contributed to frontend architecture decisions supporting scalability and maintainability.
- Participated actively in sprint planning, backlog grooming, and iterative delivery cycles.
- Performed peer code reviews, promoting shared standards and continuous improvement.
- Helped maintain secure authentication and authorization flows within frontend applications.

Software Developer

SimbirSoft Company

March 2015 - June 2018

- Built and maintained web application user interfaces using JavaScript, HTML, and CSS.
- Implemented responsive design principles to ensure usability across desktop and mobile devices.
- Collaborated with backend developers to integrate APIs and support end-to-end feature delivery.
- Contributed to frontend architecture discussions as applications scaled in complexity.
- Focused on writing clean, maintainable, and testable frontend code.
- Supported production releases and bug fixes in live customer-facing systems.
- Gained strong foundational experience working in distributed development teams.

Software Developer Intern

Microsoft

August 2014 - February 2015

- Supported frontend and full-stack development on internal web applications.
- Implemented JavaScript-based UI components under guidance from senior engineers.
- Assisted with integrating frontend components with backend services and APIs.
- Participated in code reviews and learned professional engineering best practices.
- Gained hands-on experience working within an agile, enterprise-scale environment.

EDUCATION

Bachelor of Computer Science

The University of North Carolina at Chapel Hill

2010 - 2014
