SUMMARY

Senior Software Engineer with 9+ years of experience building, scaling, and maintaining high-impact, customer-facing SaaS applications. Proven ability to design robust backend systems and intuitive user experiences with a strong focus on product quality, scalability, and reliability. Experienced in leading technical decisions, mentoring engineers, and collaborating closely with product, design, and data teams to deliver business-critical outcomes. Customer-obsessed, data-driven, and outcomes-oriented engineer with a strong owner’s mindset and passion for building products that positively impact users at scale.

SKILLS

Ruby	JavaScript	TypeScript	Ruby on Rails
React	Angular	REST APIs	Backend Architecture
Scalable Systems	PostgreSQL	AWS	CI/CD
Git	System Design	Performance Optimization	Code Reviews
Mentoring	Data-Driven Decision Making		

EXPERIENCE

Senior Software Engineer

SumatoSoft

April 2022 - December 2025

- Designed and developed scalable, consumer-facing web applications with a strong emphasis on performance, reliability, and user experience in SaaS environments.
- Built and maintained backend services and APIs using Ruby on Rails, ensuring clean architecture and long-term maintainability of core product platforms.
- Led technical decision-making around system design, architecture trade-offs, and technology selection to support high-growth product initiatives.
- Collaborated closely with product managers, designers, and data teams to deliver data-driven features aligned with customer needs and business goals.
- Mentored junior and mid-level engineers through code reviews, design discussions, and hands-on guidance to raise overall engineering quality.
- Owned features end-to-end from concept through production, ensuring successful delivery and measurable business impact.
- Improved application performance and scalability by identifying bottlenecks and implementing targeted optimizations.
- Contributed to CI/CD pipelines and deployment workflows to support reliable and frequent production releases.
- Partnered with cross-functional stakeholders to revamp core user experiences and improve customer engagement.
- Championed best practices in testing, code quality, and documentation across the engineering team.
- Acted as a trusted technical advisor to leadership on system improvements and long-term platform strategy.

Software Engineer

Hexaview Technologies Inc.

July 2018 - March 2022

- Developed and enhanced backend and frontend features for enterprise SaaS applications serving a large user

base.

- Worked extensively with Ruby on Rails and JavaScript frameworks to build reliable, maintainable product functionality.
 - Integrated RESTful APIs and backend services to support complex business workflows and customer-facing features.
 - Collaborated with cross-functional teams to translate product requirements into scalable technical solutions.
 - Optimized application performance and improved system stability across production environments.
 - Participated actively in architectural discussions and contributed to long-term platform evolution.
 - Conducted code reviews and shared best practices to improve code quality and team efficiency.
 - Supported data-driven product decisions by implementing instrumentation and analytics-friendly solutions.
 - Demonstrated strong ownership by driving features to completion and ensuring production readiness.
-

Software Developer

SimbirSoft Company

March 2015 - June 2018

- Built and maintained web applications with a focus on backend development and user-facing functionality.
 - Developed server-side logic and APIs using Ruby on Rails and related technologies.
 - Collaborated closely with designers and backend engineers to deliver cohesive product experiences.
 - Implemented responsive and performant solutions to support growing product requirements.
 - Contributed to architectural decisions that enabled applications to scale with increased usage.
 - Focused on writing clean, testable, and maintainable code aligned with long-term business needs.
 - Gained strong experience working in distributed teams and delivering production-ready software.
-

Software Developer Intern

Microsoft

August 2014 - February 2015

- Supported development of internal web applications in a large-scale enterprise environment.
 - Implemented frontend and backend features under the guidance of senior engineers.
 - Assisted with debugging, testing, and improving existing application functionality.
 - Collaborated within an agile team, gaining exposure to professional software development workflows.
 - Built a strong foundation in software engineering best practices, version control, and code reviews.
-

EDUCATION

Bachelor of Computer Science

The University of North Carolina at Chapel Hill

2010 - 2014
