Professional Summary

Frontend Engineer specializing in Vue.js applications with expertise in building scalable, user-centric platforms. Skilled in delivering high-performance SPAs, integrating with cloud ecosystems (AWS, GCP), and containerized environments (Docker). Strong background in SQL/NoSQL data design and frontend optimization for enterprise and SaaS products.

Technical Skills

- ❖ **Frontend:** Vue.js (Vue 2/3, Vuex, Pinia), JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS, Tailwind
- ❖ **Cloud & Infra:** AWS (Lambda, S3, CloudFront), GCP (Firestore, BigQuery), Docker, CI/CD pipelines
- ❖ **Data:** SQL (PostgreSQL, MySQL), NoSQL (MongoDB, Firestore, Redis)
- ❖ **Tools & Workflow:** Git, Jira, Agile/Scrum, REST, GraphQL, Cypress, Jest

Professional Experience

SumatoSoft

Senior Software Engineer

Boston, MA (Remote) | Apr 2023 – Mar 2025

- ❖ Led Vue 3 SPA development integrating complex state management with Pinia and Vuex, ensuring modularity and maintainability for large enterprise apps.
- ❖ Architected component libraries with reusable UI modules, improving design consistency and reducing redundant development across multi-team workflows.
- ❖ Collaborated with backend engineers to design REST/GraphQL contracts, ensuring seamless data flow and type-safe integrations across SQL and NoSQL databases.
- ❖ Optimized frontend performance using code-splitting, lazy loading, and server-side rendering, reducing load times and enhancing Lighthouse performance scores.
- ❖ Deployed containerized frontend environments via Docker and orchestrated CI/CD pipelines on AWS/GCP, ensuring reliable multi-region deployment strategies.
- ❖ Designed automated testing frameworks (Jest, Cypress) for regression and E2E testing, significantly reducing bug leakage into production releases.
- ❖ Implemented role-based access control (RBAC) and OAuth2 integrations with AWS Cognito, strengthening application security and compliance readiness.
- ❖ Mentored junior engineers on Vue best practices, advanced TypeScript patterns, and clean code architecture, fostering a high-quality engineering culture.

Hexaview Technologies Inc.

Software Engineer

New York, NY | Jul 2018 – Mar 2023

- ❖ Built dynamic Vue.js dashboards for financial SaaS platforms, integrating data visualization libraries (D3.js, Chart.js) for real-time analytics and reporting.
- ❖ Integrated APIs across microservices using REST/GraphQL, ensuring smooth synchronization between SQL (PostgreSQL) and NoSQL (MongoDB) data sources.
- ❖ Implemented Vue Router and dynamic form rendering to handle complex business flows, enabling user customization of workflows with high maintainability.
- ❖ Containerized Vue apps with Docker and deployed using Kubernetes on GCP, enabling scalable, fault-tolerant frontend infrastructure.
- ❖ Collaborated with product managers to define UI/UX requirements, translating wireframes into responsive, accessible Vue components (WCAG 2.1 compliance).
- ❖ Introduced unit and integration testing pipelines with Jest and Vue Test Utils, driving up overall code quality and coverage percentages.
- ❖ Refactored legacy JavaScript codebases into modern Vue 3 + TypeScript projects, eliminating technical debt and enhancing developer productivity.
- ❖ Participated in Agile ceremonies and contributed to architectural decisions, ensuring long-term scalability and alignment with business objectives.

SimbirSoft Company

Software Developer

Boston, MA | Mar 2015 – Jun 2018

- ❖ Delivered Vue.js modules for e-commerce platforms handling complex shopping carts, checkout flows, and secure payment integrations.
- ❖ Designed and implemented SQL schemas and Redis caching strategies, optimizing data retrieval and improving API response times.
- ❖ Integrated third-party services (Stripe, PayPal, Twilio) into Vue applications, ensuring seamless customer experience across payment and messaging workflows.
- ❖ Built mobile-first responsive layouts with SCSS and Tailwind, ensuring cross-browser and cross-device compatibility.
- ❖ Configured AWS CloudFront for content delivery, optimizing performance for high-traffic Vue applications serving global audiences.
- ❖ Partnered with QA engineers to automate testing strategies, introducing Cypress test suites that simulated real-world end-user scenarios.
- ❖ Developed real-time notification systems leveraging WebSockets and integrated seamlessly with Vue state management.
- ❖ Participated in team-wide refactoring initiatives, improving modularization and maintainability of core Vue codebases.

Microsoft

Software Developer Intern

Cambridge, MA | Aug 2014 – Feb 2015

- ❖ Assisted in developing UI modules for internal tools using JavaScript and CSS, ensuring accessibility and adherence to Microsoft design standards.

- ❖ Wrote SQL queries and stored procedures to support frontend dashboards with structured reporting features.
- ❖ Contributed to documentation and cross-team knowledge sharing, improving onboarding for future interns and junior engineers.

Projects

- ❖ **Realtime Analytics Dashboard:** Built Vue.js SPA with real-time WebSocket streams for financial data visualization.
- ❖ **E-Commerce Cart Engine:** Developed Vue-based cart and checkout flow integrated with AWS Lambda and SQL/NoSQL backends.
- ❖ **Content Delivery Portal:** Designed responsive Vue 3 app deployed via Docker and served globally using AWS CloudFront.

Certifications

- ❖ **AWS Certified Developer – Associate**
- ❖ **Google Cloud Professional Cloud Developer**
- ❖ **Docker Certified Associate**

Education

University of North Carolina at Chapel Hill

Bachelor's Degree in Computer Science (2010 – 2014)
