

TAYLOR PENTZ

Senior Software Engineer

1601 Larkin, High Point, NC | +1 8042860439 | taylorpentz2@gmail.com | linkedin.com/in/taylor-pentz-080a8b39b

Professional Summary

Senior Software Engineer with 9+ years of experience designing and delivering high-quality, scalable software solutions with strong expertise in iOS development using Swift. Proven background in building performance-optimized, user-centric mobile applications that integrate AI-driven features to enhance functionality and engagement. Experienced across the full mobile application lifecycle, from concept and architecture through deployment and long-term maintenance. Adept at collaborating with cross-functional teams to translate complex requirements into intuitive, reliable applications aligned with Apple Human Interface Guidelines. Strong focus on performance optimization, clean architecture, and maintainable code. Passionate about leveraging emerging AI technologies to build innovative iOS experiences that scale in production environments.

Skills

- Swift
- JavaScript
- TypeScript
- iOS App Development
- Apple Human Interface Guidelines
- UIKit
- SwiftUI
- Performance Optimization
- App Lifecycle Management
- AI Integration
- AI-Driven Features
- API Integration
- Machine Learning Concepts
- Git
- CI/CD
- REST APIs
- Testing & Debugging
- Code Reviews
- Agile Collaboration
- Documentation

Work History

Senior Software Engineer

April 2022 to December 2025

SumatoSoft

- Designed and developed advanced mobile and frontend applications with a strong focus on iOS platforms using Swift and modern development practices.
- Led the integration of AI-powered features into client-facing applications to improve personalization, user engagement, and overall functionality.
- Collaborated closely with UI/UX designers to ensure applications adhered to Apple Human Interface Guidelines and delivered intuitive user experiences.
- Worked with backend engineers to integrate RESTful APIs and AI services, ensuring secure and reliable data flow across systems.
- Optimized application performance by improving load times, memory usage, and responsiveness across supported iOS devices.
- Conducted thorough testing and debugging to ensure application stability, reliability, and scalability in production environments.
- Provided ongoing maintenance and enhancements for existing applications to meet evolving business and regulatory requirements.
- Actively participated in architectural discussions to ensure long-term scalability and maintainability of iOS solutions.
- Led code reviews and enforced best practices for Swift development, performance optimization, and clean architecture.
- Documented development processes, technical decisions, and application workflows to support long-term knowledge sharing.
- Mentored junior engineers and supported team skill growth while remaining hands-on with feature development and delivery.

Software Engineer

July 2018 to March 2022

Hexaview Technologies Inc.

- Developed and maintained mobile and web application features with a strong emphasis on performance, usability, and scalability.

- Contributed to iOS application development using Swift, focusing on clean code and reusable components.
- Integrated AI-enabled APIs and third-party services to enhance application functionality and data-driven behavior.
- Collaborated with cross-functional teams to deliver high-quality features aligned with product and user requirements.
- Optimized application performance through profiling, debugging, and continuous refinement.
- Ensured adherence to best practices for version control, code reviews, and team collaboration using Git.
- Participated in testing and debugging cycles to improve reliability and reduce production issues.
- Supported deployment workflows and contributed to CI/CD processes for reliable releases.
- Maintained clear technical documentation and communicated progress effectively with stakeholders.

Software Developer

March 2015 to June 2018

SimbirSoft Company

- Built and enhanced application features with a focus on responsive design and user-friendly interfaces.
- Contributed to iOS-related development efforts and supported Swift-based feature implementation.
- Collaborated with backend developers to integrate APIs and ensure seamless application behavior.
- Focused on performance optimization and efficient data handling across applications.
- Participated in code reviews and followed best practices for maintainable software development.
- Assisted in debugging and resolving production issues to improve application stability.
- Supported long-term application maintenance and incremental feature enhancements.

Software Developer Intern

August 2014 to February 2015

Microsoft

- Supported iOS and web development initiatives by assisting in feature implementation and bug fixes.
- Worked with senior engineers to develop Swift-based components and improve application usability.
- Assisted in integrating frontend components with backend services and internal APIs.
- Gained hands-on experience with testing, debugging, and performance optimization techniques.
- Collaborated within an agile development environment, learning industry-standard engineering practices.

Education

Bachelor of Computer Science

2010 to 2014

The University of North Carolina at Chapel Hill
