SUMMARY

Senior Software Engineer with 9+ years of experience designing, developing, and maintaining production-grade web applications with a strong focus on WordPress-based platforms. Extensive hands-on expertise in PHP, HTML5, CSS3, JavaScript, and jQuery, combined with deep experience customizing WordPress themes, plugins, and content-driven websites. Proven ability to collaborate directly with clients and stakeholders to gather requirements, translate business needs into technical solutions, and deliver reliable, high-performing websites. Strong background in version control, deployment workflows, and ongoing maintenance, ensuring secure, scalable, and maintainable solutions. Known for clear communication, end-to-end ownership, and a pragmatic, results-driven approach to building digital products.

SKILLS

PHP	JavaScript	HTML5	CSS3
jQuery	WordPress Theme Development	WordPress Plugin Development	REST APIs
Server-Side PHP	MySQL	Git	CI/CD
Basic Server Administration	WordPress	GitHub	Performance Optimization
Security Best Practices			

EXPERIENCE

Senior Software Engineer

SumatoSoft

April 2022 - December 2025

- Led the design, development, and maintenance of content-driven and marketing websites using WordPress, focusing on custom themes, plugins, and performance optimization.
- Collaborated directly with clients and internal stakeholders to gather website requirements, define functionality, and translate business goals into scalable WordPress solutions.
- Developed reusable WordPress components using PHP, HTML5, CSS3, JavaScript, and jQuery, ensuring cross-browser compatibility and responsive design.
- Managed WordPress site architecture, including database interactions, integrations with third-party services, and deployment workflows using Git-based version control.
- Performed performance tuning, troubleshooting, and ongoing maintenance to improve page load times, security posture, and overall site reliability.
- Provided documentation, training, and hands-on support to clients and junior developers, ensuring long-term maintainability and smooth handoff of WordPress solutions.

Software Engineer

Hexaview Technologies Inc.

July 2018 - March 2022

- Developed and maintained WordPress-based websites and internal tools, delivering customized themes and plugins aligned with client branding and functional requirements.
- Worked closely with designers, product managers, and clients to refine UI/UX requirements and implement pixel-perfect, responsive front-end solutions.
- Built and customized WordPress plugins using PHP and JavaScript to extend CMS functionality and integrate

with external APIs and services.

- Ensured website stability and performance through proactive monitoring, debugging, and optimization of WordPress installations and underlying databases.
- Used Git for source control and collaborated within distributed teams to manage releases, bug fixes, and ongoing enhancements.
- Supported clients post-launch by providing WordPress training, documentation, and technical support to empower content editors and administrators.

Software Developer

SimbirSoft Company

March 2015 - June 2018

- Contributed to the development of web applications and CMS-driven websites, including early exposure to WordPress customization and PHP-based development.
- Implemented front-end features using HTML5, CSS3, and JavaScript, ensuring responsive layouts and consistent behavior across browsers.
- Assisted in building and maintaining backend logic for content management systems, focusing on data integrity and maintainable code structures.
- Collaborated with senior engineers to troubleshoot issues, refactor legacy code, and improve overall application performance.
- Gained hands-on experience with Git-based workflows, code reviews, and structured release processes in a production environment.
- Supported ongoing maintenance and updates, learning best practices for long-term stability and client-facing web platforms.

Software Developer Intern

Microsoft

August 2014 - February 2015

- Worked as a software developer intern contributing to internal web-based tools and applications used by engineering teams.
- Assisted in implementing front-end features and bug fixes using HTML, CSS, and JavaScript under the guidance of senior engineers.
- Collaborated within an agile team environment, participating in stand-ups, code reviews, and sprint planning activities.
- Learned industry best practices for writing clean, maintainable code and following structured development workflows.
- Gained exposure to large-scale software systems and enterprise development standards in a professional engineering organization.
- Built a strong foundation in collaborative software development, version control, and professional communication.

EDUCATION

Bachelor of Computer Science

The University of North Carolina at Chapel Hill

2010 - 2014
