## Senior Software Engineer

taylorpentz2@gmail.com | linkedin.com/in/taylor-pentz-080a8b39b | 1601 Larkin, High Point, NC | +1 8042860439

## SUMMARY

Senior Software Engineer and Solutions Architect with 9+ years of experience designing, building, and scaling production-grade mobile and web platforms. Deep expertise in React Native architecture for cross-platform iOS and Android applications, with a strong focus on performance, scalability, and user experience. Proven ability to engage directly with clients and stakeholders, translate complex business requirements into end-to-end technical solutions, and lead delivery across the full software lifecycle. Experienced in architecting mobile systems that integrate cloud services, CI/CD pipelines, and secure data flows while maintaining high engineering standards. Known for strong communication, mentorship, and a pragmatic, results-driven approach that aligns technical decisions with strategic business goals.

## SKILLS

|                |                         |                    |              |
|----------------|-------------------------|--------------------|--------------|
| JavaScript     | TypeScript              | React Native       | React        |
| Expo SDK       | EAS                     | Redux              | MobX         |
| Nativewind     | Tamagui                 | REST APIs          | Node.js      |
| AWS            | Microsoft Azure         | CI/CD              | AppCenter    |
| CodePush       | TestFlight              | Git                | Jest         |
| Detox          | Performance Profiling   | Apple Pay          | Google Pay   |
| Stripe         | In-App Purchases        | Push Notifications | Deep Linking |
| GitHub Copilot | AI-Assisted Development |                    |              |

## EXPERIENCE

### Senior Software Engineer

#### SumatoSoft

April 2022 - December 2025

- Led the architecture and development of large-scale React Native applications used across iOS and Android, ensuring scalability, performance, and maintainability in production environments.
- Designed end-to-end mobile architectures integrating cloud services, secure REST APIs, CI/CD pipelines, and monitoring solutions aligned with client business objectives.
- Drove engineering best practices by defining coding standards, applying common design patterns, and leading code reviews to maintain a high level of quality across multiple projects.
- Collaborated directly with clients and non-technical stakeholders to understand business needs, identify architectural gaps, and propose alternative technical approaches when constraints emerged.
- Built and validated proof-of-concepts to de-risk complex requirements, then evolved them into production-ready solutions using Expo, EAS, and modern state management techniques.
- Mentored engineers throughout the development lifecycle, providing guidance on React Native performance optimization, native module integration, and scalable UI design systems.

### Software Engineer

#### Hexaview Technologies Inc.

July 2018 - March 2022

- Developed and maintained cross-platform mobile applications using React Native, delivering consistent, high-quality user experiences on both iOS and Android platforms.

- Implemented robust state management solutions and reusable UI components to support complex, data-driven mobile workflows.
- Worked closely with product managers, designers, and QA teams to translate evolving requirements into well-architected technical solutions.
- Integrated mobile applications with backend services and third-party platforms, ensuring secure data handling and reliable performance at scale.
- Supported CI/CD pipelines and app store deployment workflows, including build automation, testing, and release management.
- Contributed to architectural discussions and technical reviews, helping improve system reliability, performance, and long-term maintainability.

---

## **Software Developer**

### **SimbirSoft Company**

March 2015 - June 2018

- Built and enhanced client-facing applications with a strong emphasis on clean architecture, code quality, and long-term scalability.
- Contributed to early mobile and frontend initiatives, gaining hands-on experience with cross-platform development concepts and UI performance considerations.
- Collaborated with senior engineers to design APIs and application workflows that supported complex business processes.
- Participated in iterative development cycles, delivering features in Agile environments while responding quickly to changing requirements.
- Assisted with debugging, performance tuning, and production issue resolution to ensure stable and reliable releases.
- Developed a strong foundation in software engineering best practices that later supported architectural and leadership responsibilities.

---

## **Software Developer Intern**

### **Microsoft**

August 2014 - February 2015

- Worked as part of an engineering team on internal tools and services, contributing production-quality code under the guidance of senior engineers.
- Gained exposure to large-scale software development practices, including version control, code reviews, and automated testing.
- Assisted in implementing new features and fixing defects, learning how design decisions impact performance and maintainability.
- Collaborated with cross-functional teams to understand requirements and translate them into technical solutions.
- Developed a strong appreciation for engineering rigor, documentation, and clear communication in enterprise environments.
- Built a solid foundation in professional software development that accelerated growth into full-time engineering roles.

---

## **EDUCATION**

### **Bachelor of Computer Science**

#### **The University of North Carolina at Chapel Hill**

2010 - 2014
