SKILLS

Programming

C#, JavaScript, TypeScript, Node.js

Frontend

React, React Router, HTML, CSS

Backend

.NET 6, .NET Core 3.1, Entity Framework, REST APIs, Microservices

Cloud

Microsoft Azure, Azure Service Bus, Azure Data Factory, Azure SQL

Databases

Azure SQL, MS SQL Server, MongoDB, Stored Procedures, Query Optimization

DevOps

Git, Azure DevOps, CI/CD Pipelines, Build and Release Management

EDUCATION

Florida State University

Bachelor of Computer Science
2009 - 2013

Professional Summary

Senior Software Engineer with 9+ years of full-stack development experience delivering cloud-native, enterprise-grade applications. Strong expertise in C# and .NET Core/.NET 6 for backend development, combined with modern frontend development using React and TypeScript. Proven experience designing scalable APIs, event-driven systems, and data pipelines on Microsoft Azure. Adept at owning features end-to-end, from architecture and implementation through deployment and optimization, while collaborating closely with cross-functional teams in distributed, remote environments.

Professional Skills

Senior Software Engineer

Web Venturez LLC | February 2020 - October 2025

- Designed and developed full-stack web applications using C#, .NET Core/.NET 6, and React, delivering scalable and maintainable solutions for enterprise clients.
- Built and maintained backend APIs with Entity Framework and REST principles, ensuring high performance, reliability, and secure data access.
- Implemented event-driven architectures using Azure Service Bus to enable asynchronous communication between microservices and external systems.
- Developed and optimized data workflows using Azure SQL and MS SQL Server, including complex queries, stored procedures, and performance tuning.
- Collaborated closely with product managers, designers, and QA teams in a remote Agile environment to translate business requirements into technical solutions.
- Managed source control, branching strategies, and CI/CD pipelines using Git and Azure DevOps, improving deployment reliability and release velocity.

Full Stack Engineer

Webiz Digital | July 2017 - January 2020

- Developed full-stack applications using .NET Core, C#, React, and Node.js to support modern, cloud-hosted SaaS platforms.
- Created reusable frontend components with React and React Router, ensuring responsive design and consistent user experience across browsers.
- Built supporting Node.js services and APIs to complement core .NET backend systems and enable flexible integrations.
- Worked extensively with SQL Server and MongoDB, designing schemas, writing stored procedures, and optimizing queries for

performance.

- Assisted with Azure-based deployments and environment configuration, gaining hands-on experience with cloud infrastructure and services.
- Participated in code reviews and collaborated with cross-functional teams to improve code quality, maintainability, and delivery timelines.

Software Developer

Centric Tech Inc. | October 2013 - June 2017

- Developed and maintained backend services and web applications using C# and early .NET frameworks, supporting internal and client-facing systems.
 - Implemented database-driven features using MS SQL Server, including stored procedures, data models, and query optimization techniques.
 - Contributed to the design and development of RESTful APIs and application logic supporting growing business requirements.
 - Worked closely with senior engineers to understand system architecture, deployment processes, and production support workflows.
 - Assisted with debugging, performance tuning, and reliability improvements in live production environments.
 - Collaborated across teams to deliver features on schedule while adhering to established coding standards and best practices.
-
