

# Tyler Roberts

Senior Software Engineer

## CONTACT

tyler.roberts.1991@outlook.com  
+1 6142073008  
Florida, United States  
LinkedIn: linkedin.com/in/tyler-roberts-a7b0953a0

## SKILLS

### Programming

Java, Python, JavaScript, TypeScript

### Frontend

React, Next.js, HTML, CSS

### AI\_ML

Machine Learning, Natural Language Processing (NLP), Generative AI, LLMs, RAG Pipelines, Prompt Engineering, Vector Databases

### Backend

REST APIs, Microservices, Distributed Systems, Event-Driven Architecture

### Cloud

AWS, GCP, Cloud-Native Architecture, Serverless

### DevOps

Docker, CI/CD, Infrastructure as Code, Observability

## EDUCATION

### Florida State University

Bachelor of Computer Science  
2009 - 2013

## Professional Summary

Senior Software Engineer and AI/ML Engineer with 9+ years of professional experience delivering production-grade systems from a strong Java background, complemented by modern React-based frontend development and applied machine learning solutions. Extensive experience designing and implementing scalable backend services, APIs, and distributed systems, with recent focus on AI/ML, Generative AI, and intelligent automation. Proven ability to integrate machine learning models, NLP pipelines, and LLM-based systems into enterprise applications while maintaining performance, reliability, and security. Strong hands-on expertise across Java, Python, JavaScript, React, and cloud-native platforms, enabling end-to-end ownership from architecture through deployment. Adept at collaborating with cross-functional teams to translate ambiguous business and AI requirements into robust, maintainable, and production-ready solutions in fully remote environments.

## Professional Skills

### Senior Software Engineer

Web Venturez LLC | February 2020 - October 2025

- Designed and implemented scalable backend services using Java and Python, forming the foundation for AI-enabled and data-driven enterprise applications.
- Built and maintained React-based frontend applications that integrated seamlessly with Java APIs, delivering responsive and user-friendly experiences.
- Led the integration of AI/ML components, including NLP workflows, recommendation logic, and LLM-powered features, into existing Java-based systems.
- Architected cloud-native solutions on AWS, ensuring high availability, scalability, and secure deployment of AI-enabled services.
- Owned complex end-to-end features from design through production release, balancing performance, maintainability, and evolving AI requirements.
- Collaborated closely with product managers and stakeholders to translate business needs into production-ready technical and AI-driven solutions.

### Full Stack Engineer

Webiz Digital | July 2017 - January 2020

- Developed full-stack web applications using Java-based

backend services and React frontends for SaaS platforms.

- Implemented RESTful APIs and business logic in Java, supporting data-intensive workflows and third-party integrations.
- Contributed to early machine learning and data analysis initiatives, preparing backend systems for future AI/ML enhancements.
- Collaborated with designers and frontend engineers to deliver performant and accessible React user interfaces.
- Improved application stability and performance through refactoring, testing, and adherence to clean architecture principles.
- Worked in agile teams, participating in planning, estimation, and continuous delivery of production features.

## **Software Developer**

Centric Tech Inc. | October 2013 - June 2017

- Built and maintained Java-based backend systems supporting internal and client-facing enterprise applications.
  - Developed foundational APIs and services that handled core business logic and data processing requirements.
  - Collaborated with senior engineers to understand system architecture, scalability concerns, and production support processes.
  - Assisted in early data processing and analytics efforts, laying groundwork for later AI and ML adoption.
  - Participated in debugging, performance tuning, and reliability improvements across multiple environments.
  - Established strong software engineering fundamentals, including clean code practices, testing, and documentation.
-
