LinkedIn: linkedin.com/in/tyler-roberts-a7b0953a0

SKILLS

Programming

C#, JavaScript, TypeScript, Python

AI & GenAI

Conversational AI, Chatbot Development, Microsoft Bot Framework, Azure OpenAI, Microsoft Copilot Studio, Prompt Engineering, NLP, RAG Patterns, LLM Integration

Cloud & Platforms

Azure, AWS, Cloud-Native Architecture, Serverless

Microsoft 365

SharePoint Online, SharePoint On-Prem to M365 Migration, Power Platform, Microsoft Graph API, Copilot Integrations

Backend & Integration

REST APIs, Secure API Design, Distributed Systems, Microservices, Enterprise Integrations

DevOps & Quality

CI/CD, Monitoring & Dashboards, Observability, Performance Optimization

EDUCATION

Florida State University

Bachelor of Computer Science
2009 - 2013

Professional Summary

Senior Software Engineer with 9+ years of experience designing and delivering enterprise-grade software solutions with a strong focus on AI-powered systems and conversational platforms. Extensive hands-on expertise building AI and GenAI chatbot solutions using cloud-native architectures, modern APIs, and large language models. Proven ability to design secure, scalable backend services and integrate AI capabilities into enterprise ecosystems including Microsoft 365 and cloud platforms. Strong background in NLP, prompt engineering, and Retrieval-Augmented Generation (RAG) patterns to deliver reliable, high-quality conversational experiences. Adept at collaborating with business stakeholders, architects, and product teams to translate complex requirements into measurable, production-ready outcomes.

Professional Skills

Senior Software Engineer

Web Venturez LLC | February 2020 - October 2025

- Designed and delivered scalable backend services and AI-enabled applications using C#, JavaScript, TypeScript, and Python in cloud-native environments.
- Architected and integrated conversational AI and GenAI solutions leveraging large language models, prompt engineering techniques, and Retrieval-Augmented Generation patterns.
- Built secure REST APIs and data access layers to support AI-driven workflows and enterprise system integrations with strong attention to performance and reliability.
- Collaborated closely with product owners, stakeholders, and cross-functional teams to translate business requirements into production-ready technical designs.
- Implemented monitoring, logging, and performance dashboards to measure chatbot usage, latency, and response quality, enabling continuous optimization.
- Led technical evaluations and proofs of concept for emerging AI technologies, ensuring alignment with long-term platform strategy and security standards.

Full Stack Engineer

Webiz Digital | July 2017 - January 2020

- Developed full-stack web applications and backend services using modern JavaScript frameworks and server-side technologies.
- Designed and implemented RESTful APIs to support data-heavy business workflows and third-party system integrations.

- Contributed to cloud-hosted solutions, gaining hands-on experience with scalable architectures and deployment pipelines.
- Worked with frontend and backend teams to improve application performance, reliability, and maintainability.
- Supported early integrations with AI-adjacent features such as search optimization, data classification, and automation logic.
- Collaborated with stakeholders to refine requirements and deliver features aligned with business objectives and timelines.

Software Developer

Centric Tech Inc. | October 2013 - June 2017

- Built and maintained backend services and internal web applications supporting business-critical operations.
 - Implemented application logic and APIs using JavaScript and related backend technologies in distributed environments.
 - Collaborated with senior engineers to understand system architecture, security considerations, and deployment processes.
 - Assisted in debugging, performance tuning, and reliability improvements across multiple production systems.
 - Participated in requirements analysis and translated business needs into technical solutions.
 - Established a strong foundation in software engineering best practices, documentation, and cross-team collaboration.
-
