SKILLS

Programming

C#, TypeScript, JavaScript, SQL, T-SQL

Backend

.NET Framework 4.8, .NET 8, ASP.NET MVC, ASP.NET Web API, Entity Framework 6, Entity Framework Core, LINQ, Hangfire, Windows Services

Frontend

AngularJS, Angular, TypeScript, Razor, HTML, CSS

Database

SQL Server 2019, SQL Server 2022, Query Optimization, Indexing, Execution Plans, Performance Tuning

Cloud & DevOps

Azure Functions, Azure Blob Storage, Azure Key Vault, Azure App Configuration, Application Insights, CI/CD, IIS, Azure DevOps

Security & Observability

MSAL, Windows Authentication, Entra ID, Secure Configuration, KQL, Application Monitoring

EDUCATION

Florida State University

Bachelor of Computer Science
2009 - 2013

Professional Summary

Senior Software Engineer with 9+ years of experience modernizing, maintaining, and evolving enterprise applications across the Microsoft stack. Strong expertise in C# with .NET Framework 4.8 and .NET 8, including hands-on experience migrating legacy ASP.NET MVC and Web API solutions to modern, scalable architectures using EF Core and SQL Server. Proven ability to work in hybrid environments that span legacy and modern systems while ensuring performance, security, and reliability. Experienced in front-end modernization efforts, including AngularJS to Angular migrations, tightly integrated with secure .NET Web API backends. Adept at operating production systems hosted on IIS and Azure, with a strong focus on observability, performance tuning, and DevOps best practices.

Professional Skills

Senior Software Engineer

Web Venturez LLC | February 2020 - October 2025

- Modernized and maintained large-scale enterprise applications using C# across .NET Framework 4.8 and .NET 8, supporting hybrid solutions during phased migrations to modern architectures.
- Migrated legacy ASP.NET MVC and ASP.NET Web API patterns to modern .NET 8 services, improving maintainability, performance, and long-term supportability.
- Led Entity Framework 6 to EF Core migrations, implementing optimized LINQ queries, indexing strategies, interceptors, and performance tuning to support high-traffic SQL Server workloads.
- Developed and integrated AngularJS and modern Angular frontends with secure .NET Web API backends, implementing MSAL-based authentication and authorization flows.
- Supported production workloads hosted on IIS, addressing configuration, load balancing behavior, and Windows authentication considerations in enterprise environments.
- Implemented and maintained background job orchestration using Hangfire, Windows Services, and scheduled tasks to support critical business workflows.
- Leveraged Azure services including Functions, Blob Storage, Key Vault, App Configuration, and Application Insights to enhance scalability, security, and observability.
- Improved system reliability through structured logging, custom Application Insights dimensions, KQL-based analysis, and proactive performance monitoring.

Full Stack Engineer

Webiz Digital | July 2017 - January 2020

- Built and maintained full-stack web applications using C#, ASP.NET MVC, Web API, and SQL Server, supporting business-critical internal and client-facing systems.
- Developed RESTful APIs and backend services while adhering to secure coding practices and enterprise integration standards.
- Contributed to front-end development using AngularJS and TypeScript, collaborating closely with backend services to deliver cohesive user experiences.
- Worked extensively with SQL Server, writing optimized T-SQL queries, creating indexes, and analyzing execution plans to improve application performance.
- Supported IIS-hosted applications in production, troubleshooting configuration issues, deployment challenges, and runtime errors.
- Collaborated with cross-functional teams to translate evolving business requirements into maintainable technical solutions.
- Participated in code reviews, refactoring initiatives, and performance optimization efforts to improve overall code quality and system stability.

Software Developer

Centric Tech Inc. | October 2013 - June 2017

- Developed backend services and web applications using C#, ASP.NET, and SQL Server to support internal business operations and external clients.
 - Implemented application logic and data access layers using Entity Framework and raw SQL where appropriate for performance-critical paths.
 - Maintained and enhanced legacy systems, gaining hands-on experience with long-lived codebases and incremental modernization strategies.
 - Assisted with IIS deployments, configuration changes, and production troubleshooting in Windows-based environments.
 - Worked closely with senior engineers to understand system architecture, deployment workflows, and production support processes.
 - Contributed to debugging, performance tuning, and reliability improvements across multiple applications.
 - Collaborated across teams to deliver features aligned with business priorities, timelines, and quality expectations.
-
