SKILLS

Mobile

iOS Development, Swift, Objective-C, Mixed Swift / Objective-C Codebases, UIKit, Auto Layout, Accessibility (VoiceOver)

Testing

XCTest, Unit Testing, UI Testing, Test-Driven Development

Architecture

MVC, MVVM, Modular App Architecture, Code Migration & Refactoring

Backend & APIs

REST APIs, JSON, API Integration

Tools & Platforms

Xcode, Git, CI/CD, App Store Deployment

EDUCATION

Florida State University

Bachelor of Computer Science
2009 - 2013

Professional Summary

Senior Software Engineer with 9+ years of experience delivering production-grade applications across the full software development lifecycle, including mobile, backend, and cloud-native platforms. Strong background in iOS application development using Swift and Objective-C, with hands-on experience working in mixed codebases and modernizing legacy Objective-C applications through incremental Swift migration. Experienced in building scalable, high-performance mobile solutions with a strong focus on accessibility, performance optimization, and clean architecture. Proven ability to collaborate cross-functionally with product, design, backend, and QA teams to deliver reliable, user-centric mobile experiences in retail and consumer-facing environments.

Professional Skills

Senior Software Engineer

Web Venturez LLC | February 2020 - October 2025

- Designed, developed, and maintained iOS applications using both Swift and Objective-C, working extensively in mixed codebases to support legacy functionality while introducing modern Swift-based components.

- Led incremental migration efforts from Objective-C to Swift, improving code maintainability, safety, and long-term scalability without disrupting existing production features.

- Delivered features across the full mobile application lifecycle, including requirements analysis, technical design, implementation, testing, App Store releases, and post-release support.

- Implemented and validated accessibility features such as VoiceOver support, dynamic text, and accessible UI components to ensure compliance with accessibility standards.

- Collaborated closely with product managers, designers, backend engineers, and QA teams to align technical solutions with business goals and deliver high-quality retail-focused mobile experiences.

- Established and enforced coding standards, performance optimization practices, and unit testing strategies to improve app stability and long-term maintainability.

Full Stack Engineer

Webiz Digital | July 2017 - January 2020

- Contributed to the development of consumer-facing mobile and web applications, including iOS components built with Swift and Objective-C integrated with backend services.

- Worked on maintaining and enhancing existing Objective-C codebases while introducing Swift modules for new features and refactored components.
- Integrated mobile applications with RESTful APIs, ensuring reliable data exchange, robust error handling, and responsive user experiences.
- Collaborated with cross-functional teams to plan and deliver features aligned with product roadmaps and tight delivery timelines.
- Participated in code reviews, debugging sessions, and performance optimization efforts to improve application quality and responsiveness.
- Supported CI/CD pipelines and release processes to ensure smooth deployments and consistent application behavior across environments.

Software Developer

Centric Tech Inc. | October 2013 - June 2017

- Built and maintained application components using Objective-C, gaining a strong foundation in iOS development and Apple platform conventions.
 - Worked closely with senior engineers to understand mobile architecture patterns, memory management, and performance considerations.
 - Assisted in developing and testing new features, fixing bugs, and improving application stability in production environments.
 - Collaborated with designers and backend teams to implement user interfaces and integrate mobile applications with server-side systems.
 - Participated in application testing, debugging, and release support to ensure reliable delivery to end users.
 - Developed a strong understanding of software engineering best practices, version control, and collaborative development workflows.
-
