SKILLS

Programming

PHP, JavaScript, TypeScript, SQL

Frontend

HTML, CSS, JavaScript, Responsive Design

Backend

Drupal 10, Custom Drupal Modules, PHP OOP, REST APIs

Platforms

Acquia Cloud, Linux, Apache

DevOps

Git, CI/CD, Deployment Pipelines, Environment Monitoring

Databases

MySQL, Database Backup and Restore

Tools

Drush, Composer, New Relic

EDUCATION

Florida State University

Bachelor of Computer Science
2009 - 2013

Professional Summary

Senior Software Engineer with 9+ years of professional experience delivering and maintaining production-grade web applications in remote, regulated, and enterprise environments. Strong expertise in PHP-based systems, Drupal architecture, custom module development, and front-end technologies including JavaScript, CSS, and responsive design. Proven ability to support long-running applications through defect resolution, performance monitoring, security updates, and feature enhancements. Hands-on experience working with cloud-hosted platforms, CI/CD workflows, and Git-based version control. Adept at diagnosing complex production issues, performing database backups and rollbacks, and ensuring high availability and reliability. Known for clear communication, strong problem-solving skills, and effective collaboration with cross-functional stakeholders. Experienced in operating independently on remote contracts while adhering to organizational standards and best practices.

Professional Skills

Senior Software Engineer

Web Venturez LLC | February 2020 - October 2025

- Maintained and enhanced large-scale web applications with a strong focus on reliability, availability, and long-term maintainability.
- Diagnosed and resolved production issues across backend PHP code, custom Drupal modules, and front-end JavaScript and CSS layers.
- Worked extensively with Drupal core updates, security patches, and compatibility checks to ensure stable deployments.
- Managed Git-based workflows including branching, merging, and code reviews to support continuous delivery pipelines.
- Supported cloud-hosted environments by monitoring application performance and responding to alerts using industry-standard tools.
- Performed database backups, rollback procedures, and data integrity checks in production environments.
- Troubleshoot complex data import and export issues involving CSV files and structured content workflows.
- Implemented front-end enhancements and bug fixes by modifying and compiling CSS and JavaScript assets.
- Collaborated closely with product owners and stakeholders to implement feature updates and resolve ad hoc technical requests.
- Ensured compliance with organizational technology standards,

security requirements, and best practices.

- Operated with a high degree of autonomy while delivering consistent results in a fully remote engineering environment.

Full Stack Engineer

Webiz Digital | July 2017 - January 2020

- Developed and maintained PHP-based web applications with integrated front-end components using JavaScript and CSS.
- Built and customized content-driven features using CMS platforms and modular backend architectures.
- Supported ongoing application maintenance by troubleshooting defects and resolving production issues.
- Worked with version control systems to manage source code, collaborate with team members, and support releases.
- Assisted with deployment processes and environment configuration for cloud-hosted applications.
- Implemented responsive UI enhancements to improve usability across desktop and mobile devices.
- Collaborated with designers and stakeholders to translate requirements into functional technical solutions.
- Handled data-related issues including imports, exports, and content updates within structured systems.
- Strengthened overall system stability through refactoring, debugging, and incremental improvements.

Software Developer

Centric Tech Inc. | October 2013 - June 2017

- Developed and maintained backend services and web applications using PHP and related web technologies.
 - Contributed to custom application features by writing clean, maintainable, and well-documented code.
 - Assisted in debugging and resolving defects across application layers in production environments.
 - Worked with relational databases to query, update, and maintain application data.
 - Supported routine code updates, content changes, and system maintenance tasks.
 - Collaborated with senior engineers to understand system architecture and deployment workflows.
 - Built a strong foundation in software engineering best practices and production support processes.
-
