SKILLS

Backend

PHP, Laravel, Object-Oriented Programming, MVC Architecture, REST APIs, MySQL, MongoDB, Redis

Frontend

JavaScript (ES5, ES6), HTML5, CSS3, Vue.js, Tailwind CSS

DevOps & Tooling

Linux, Git, CI/CD, Pull Requests, Code Reviews, Nginx

Testing & Quality

PHPUnit, Laravel Dusk, Automated Testing, Clean Code, Code Maintainability

Additional Technologies

Node.js, Express, WebSockets

AI-Assisted Development

GitHub Copilot, ChatGPT, AI-Assisted Documentation, AI-Assisted Testing

EDUCATION

Florida State University

Bachelor of Computer Science
2009 - 2013

Professional Summary

Senior Software Engineer with 9+ years of experience designing, building, and owning full-stack web platforms with a strong emphasis on PHP, Laravel, and modern JavaScript frameworks. Proven ability to deliver robust, scalable, and maintainable applications in fast-growing, business-critical environments, including customer-facing and high-visibility products. Deep understanding of object-oriented programming, MVC architecture, and clean code principles, with a consistent focus on long-term maintainability and performance. Experienced working closely with non-technical stakeholders to translate business needs into reliable technical solutions while guiding architectural decisions. Adept at leading development initiatives end-to-end, introducing automated testing, CI/CD workflows, and responsibly leveraging AI-assisted tools to improve delivery speed, quality, and documentation.

Professional Skills

Senior Software Engineer

Web Venturez LLC | February 2020 - October 2025

- Led the design, development, and maintenance of complex, production-grade web applications using PHP, Laravel, JavaScript, and relational databases in a high-availability SaaS environment.
- Took ownership of critical features and platform components, driving projects from initial concept through implementation, deployment, and post-launch support with a strong sense of accountability.
- Collaborated closely with business stakeholders and non-technical partners to iteratively define requirements, propose technical solutions, and deliver features aligned with business goals.
- Introduced and expanded automated testing practices using PHPUnit and Laravel Dusk, significantly improving release confidence and reducing regression risk before major customer-facing releases.
- Guided modern development workflows by enforcing pull requests, structured code reviews, and CI/CD pipelines to maintain high code quality and predictable delivery timelines.
- Provided technical leadership by mentoring team members, supporting parallel development efforts, and responsibly leveraging AI-assisted tools to accelerate development, documentation, and testing.

Full Stack Engineer

Webiz Digital | July 2017 - January 2020

- Developed and maintained full-stack web applications using PHP-based frameworks, JavaScript, HTML5, CSS3, and MySQL to support growing customer and business needs.
- Implemented backend business logic following object-oriented and MVC principles, ensuring clarity, testability, and long-term maintainability of the codebase.
- Worked closely with designers and product stakeholders to deliver responsive, user-friendly frontend interfaces while maintaining strong performance standards.
- Participated actively in code reviews, refactoring initiatives, and documentation efforts to continuously improve code quality and team collaboration.
- Supported deployment and operational workflows in Linux-based environments, using Git for version control and collaborating on structured release processes.
- Assisted with troubleshooting and resolving production issues, contributing to stable application operation and positive end-user experiences.

Software Developer

Centric Tech Inc. | October 2013 - June 2017

- Built and maintained backend services and web applications using PHP, JavaScript, and relational databases to support internal and client-facing business systems.
 - Applied object-oriented programming concepts and MVC-style architectures to deliver structured, maintainable application logic.
 - Collaborated with senior engineers to understand system design, deployment workflows, and production support processes in real-world environments.
 - Contributed to debugging, performance tuning, and reliability improvements across multiple applications and services.
 - Worked closely with cross-functional teams to ensure delivered features aligned with business requirements, timelines, and quality expectations.
 - Established a strong foundation in software engineering best practices, setting the stage for senior-level ownership and leadership in later roles.
-
