SKILLS

Programming

PHP, JavaScript, TypeScript, Node.js, Python

Frontend

React, HTML, CSS

Backend

Symfony, REST APIs, Microservices, Service-Oriented Architecture

Databases

MySQL, Relational Databases

Cloud

AWS, Cloud-Native Architecture, Serverless

DevOps

CI/CD, Git, Infrastructure as Code, Observability

Methodologies

Agile, Scrum

EDUCATION

Florida State University

Bachelor of Computer Science
2009 - 2013

Professional Summary

Senior Software Engineer with 9+ years of experience designing, building, and modernizing enterprise-grade, cloud-native web applications in regulated and data-sensitive environments. Strong full stack background with deep expertise in PHP, Symfony, React, JavaScript, and MySQL, delivering scalable platforms through clean architecture and microservices-oriented design. Proven track record modernizing legacy monoliths into maintainable, service-oriented systems while maintaining performance, reliability, and security. Experienced collaborating cross-functionally with product managers, designers, and stakeholders to translate complex business requirements into high-quality technical solutions. Known for technical ownership, mentoring junior engineers, and contributing actively within Agile teams to deliver sustainable, long-term value.

Professional Skills

Senior Software Engineer

Web Venturez LLC | February 2020 - October 2025

- Led full stack development of enterprise SaaS applications using PHP, Symfony, React, and MySQL, supporting complex business workflows in regulated industries.
- Played a key role in modernizing legacy monolithic systems by incrementally refactoring core functionality into scalable, service-oriented and microservices-based architectures.
- Designed and implemented RESTful APIs, backend services, and frontend interfaces with a strong focus on performance, maintainability, and clean separation of concerns.
- Collaborated closely with UX/UI designers, product managers, and stakeholders to translate evolving requirements into reliable technical solutions that met both business and compliance needs.
- Mentored junior developers through code reviews, architectural discussions, and best-practice guidance, helping raise overall team code quality and delivery standards.
- Actively participated in Agile ceremonies including sprint planning, daily standups, and retrospectives, contributing to continuous process improvement and predictable delivery.

Full Stack Engineer

Webiz Digital | July 2017 - January 2020

- Developed full stack web applications using PHP-based frameworks, JavaScript, React, and relational databases to support cloud-hosted SaaS platforms.

- Built and maintained backend services and APIs, ensuring reliable data handling, efficient database interactions, and seamless frontend integration.
- Contributed to the enhancement and stabilization of legacy systems while gradually introducing modern development patterns and reusable components.
- Worked closely with designers and product stakeholders to implement responsive, user-friendly interfaces aligned with business requirements.
- Supported deployment workflows and environment configuration on AWS, gaining hands-on experience with cloud infrastructure and CI/CD pipelines.
- Collaborated within cross-functional Agile teams, participating in sprint planning, backlog refinement, and iterative delivery of production features.

Software Developer

Centric Tech Inc. | October 2013 - June 2017

- Built and maintained backend services and web applications using PHP, JavaScript, and relational databases to support internal and client-facing systems.
 - Implemented application logic, database schemas, and APIs that formed the foundation of early distributed and service-based architectures.
 - Worked closely with senior engineers to understand system design, deployment pipelines, and production support processes.
 - Assisted in debugging production issues, performing performance tuning, and improving application reliability and stability.
 - Collaborated across technical and non-technical teams to deliver features aligned with business goals and project timelines.
 - Established strong software engineering fundamentals in clean code, version control, documentation, and long-term maintainability.
-
