SKILLS

Programming

JavaScript, TypeScript, Node.js, Python, PHP (integration & maintenance)

Frontend

React, Vue.js, HTML, CSS

Backend

REST APIs, Distributed Systems, Microservices, SQL Databases

Cloud

AWS, Serverless Architecture, Cloud-Native Systems

DevOps

Git, CI/CD, Infrastructure as Code, Observability & Monitoring

Leadership

Technical Leadership, Client Communication, Code Reviews, Estimation & Scoping, Technical Documentation

EDUCATION

Florida State University

Bachelor of Computer Science
2009 - 2013

Professional Summary

Senior Software Engineer with 9+ years of experience delivering and leading full-stack web applications in client-facing, production environments. Strong background building scalable systems using modern JavaScript frameworks (React, Vue-style component architectures), SQL-backed data models, and API-driven backends across cloud-native platforms. Proven ability to act as a technical lead and translator between clients, stakeholders, and engineering teams, aligning business goals with pragmatic technical solutions. Experienced across the full web development lifecycle including design, development, testing, deployment, and ongoing support. Known for ownership, clear communication, code quality, and continuously improving development processes, standards, and team effectiveness.

Professional Skills

Senior Software Engineer

Web Venturez LLC | February 2020 - October 2025

- Served as a senior and lead-level full-stack engineer delivering client-facing web applications using React-based frontends, SQL-backed data layers, and API-driven backend services in cloud environments.

- Collaborated directly with clients, product owners, and internal stakeholders to translate business requirements into clear technical solutions, providing architectural guidance and implementation recommendations.

- Led development efforts across multiple projects simultaneously, contributing hands-on code while maintaining oversight of code quality, scalability, and long-term maintainability.

- Performed detailed code reviews, debugging, and refactoring to uphold consistent standards and improve reliability, performance, and reusability across shared codebases.

- Contributed to project scoping, feature estimation, and delivery planning, helping align technical effort with timelines, budgets, and client expectations.

- Introduced and reinforced best practices around documentation, version control, CI/CD workflows, and observability, improving team efficiency and production stability.

- Worked closely with support and customer success teams to ensure smooth deployments, effective issue resolution, and high client satisfaction throughout the software lifecycle.

Full Stack Engineer

Webiz Digital | July 2017 - January 2020

- Developed and maintained full-stack web applications using modern JavaScript frameworks, relational databases, and backend services to support multiple client projects.
- Collaborated with designers, project managers, and fellow engineers to deliver high-quality features aligned with client requirements and evolving project scopes.
- Worked across frontend and backend layers, contributing reusable components, shared utilities, and well-structured APIs to improve development efficiency.
- Actively participated in debugging, performance tuning, and production support to ensure stable and reliable application behavior.
- Used Git-based workflows for version control, collaborating through pull requests, reviews, and iterative improvement of existing codebases.
- Assisted in documenting technical decisions and system behavior, supporting clearer communication across technical and non-technical stakeholders.

Software Developer

Centric Tech Inc. | October 2013 - June 2017

- Built and maintained backend services and web applications supporting internal tools and client-facing systems in a growing engineering environment.
 - Implemented application logic, APIs, and database interactions while gaining hands-on experience across the full development lifecycle.
 - Collaborated with senior engineers to understand system architecture, deployment processes, and long-term maintenance considerations.
 - Supported debugging and issue resolution efforts in production systems, contributing to improved stability and reliability.
 - Worked closely with cross-functional teams to deliver features on schedule while meeting functional and quality requirements.
 - Developed a strong foundation in clean code practices, version control, and collaborative software development that enabled progression into senior and lead-level roles.
-
