SKILLS

Programming

Python, JavaScript, TypeScript

Frontend

React, HTML, CSS, Modern Web UI Development

Backend

REST APIs, Scalable Web Services, Distributed Systems, API Design

Cloud

AWS, Cloud-Native Architecture, CI/CD Pipelines, Infrastructure Automation

Data & Platforms

Geospatial Data Processing, Data-Driven Web Applications, Enterprise Platforms

Practices

Agile Development, System Design, Production Support, Cross-Functional Collaboration

EDUCATION

Florida State University

Bachelor of Computer Science
2009 - 2013

Professional Summary

Senior Software Engineer with 9+ years of experience designing and delivering cloud-native, full-stack applications using Python, JavaScript, TypeScript, React, and AWS. Strong background building scalable APIs, data-intensive platforms, and customer-facing web applications in distributed, production environments. Experienced in architecting modern web systems with a focus on performance, reliability, and maintainability. Proven ability to collaborate closely with product, commercial, and customer-facing teams to translate complex requirements into polished features. Hands-on engineer with deep ownership across backend, frontend, and deployment pipelines. Adept at supporting enterprise users through direct technical troubleshooting and platform support. Passionate about building impactful technology that supports data-driven decision-making and real-world outcomes.

Professional Skills

Senior Software Engineer

Web Venturez LLC | February 2020 - October 2025

- Designed and developed full-stack web applications using Python, JavaScript, TypeScript, and React to deliver data-driven insights to enterprise customers.
- Built and maintained scalable backend APIs supporting high-volume data access, complex business logic, and customer-facing workflows.
- Contributed to system architecture decisions focused on performance, scalability, and long-term maintainability in cloud-native environments.
- Worked closely with product and commercial stakeholders to translate customer requirements into reliable, polished platform features.
- Integrated data-intensive services and external APIs to support advanced analytics and reporting use cases.
- Implemented CI/CD pipelines and deployment workflows on AWS to improve release velocity and operational stability.
- Provided direct technical support to customers by troubleshooting API usage, platform behavior, and integration issues.
- Improved system observability through structured logging and monitoring to enable faster diagnosis of production issues.
- Collaborated in agile teams, participating in sprint planning, reviews, and regular code discussions.

- Ensured frontend usability and responsiveness while aligning UI behavior with backend data models.
- Demonstrated strong ownership of features from design through production deployment and ongoing support.

Full Stack Engineer

Webiz Digital | July 2017 - January 2020

- Developed full-stack web applications using JavaScript, React, HTML, and CSS for cloud-hosted SaaS platforms.
- Designed and implemented RESTful APIs to support frontend features and data-heavy workflows.
- Collaborated with designers and stakeholders to deliver responsive, user-friendly interfaces.
- Worked with backend services to ensure efficient data access and consistent application behavior.
- Contributed to cloud deployments and environment configuration on AWS.
- Supported integration efforts with third-party services and internal systems.
- Participated in agile development processes, including sprint planning and code reviews.
- Assisted with troubleshooting production issues and improving application reliability.
- Strengthened skills in scalable system design and modern web development practices.

Software Developer

Centric Tech Inc. | October 2013 - June 2017

- Built and maintained backend services and web applications supporting business-critical systems.
 - Implemented application logic and APIs using JavaScript and backend technologies.
 - Worked closely with senior engineers to understand system architecture and deployment workflows.
 - Assisted with debugging, performance tuning, and production issue resolution.
 - Collaborated across teams to deliver features aligned with business requirements.
 - Gained foundational experience in distributed systems and software engineering best practices.
 - Established a strong technical base that enabled progression to senior-level ownership.
-
