SKILLS

Programming

Python, JavaScript, TypeScript, Node.js

Frontend

React, Tailwind CSS, HTML, CSS

Backend

REST APIs, Distributed Systems, Microservices, Event-Driven Architecture

AI & GenAI

Retrieval-Augmented Generation (RAG), Large Language Models (LLMs), AI Agents, Prompt Engineering, Vector Databases, LangChain

Cloud & DevOps

AWS, GCP, Serverless Architecture, CI/CD, Infrastructure as Code, Observability

Integration & Platforms

Third-Party API Integrations, Internal Platform Consolidation, Data Pipelines, System Modernization

EDUCATION

Florida State University

Bachelor of Computer Science
2009 - 2013

Professional Summary

Senior Software Engineer with 9+ years of experience building and owning cloud-native, full-stack, and AI-powered platforms. Strong background in Python, Node.js, React, and modern frontend technologies, with hands-on experience designing and deploying Generative AI systems including RAG pipelines, vector search, and agent-based workflows. Proven ability to work with large-scale datasets to deliver intelligent, scalable solutions that reduce operational overhead and enable programmatic scale without proportional headcount growth. Experienced in owning complex systems end-to-end, operating autonomously in high-intensity startup environments, and maintaining exceptional standards for code quality, performance, and reliability. Deep passion for entrepreneurship, innovation, and building platforms that empower founders and early-stage startups at scale.

Professional Skills

Senior Software Engineer

Web Venturez LLC | February 2020 - October 2025

- Designed and delivered production-grade backend services and full-stack applications using Python, Node.js, React, and cloud-native architectures to support scalable SaaS platforms.
- Built and integrated Generative AI capabilities, including RAG-based systems leveraging vector databases and large datasets, to automate workflows and deliver intelligent user-facing features.
- Owned complex system components end-to-end, from architecture and implementation through deployment, monitoring, and long-term maintenance in high-availability environments.
- Collaborated closely with product managers and domain stakeholders to translate ambiguous business requirements into reliable, scalable technical solutions with measurable impact.
- Improved platform scalability and reliability by introducing structured logging, metrics, monitoring, and proactive performance optimization across distributed systems.
- Operated with a high degree of autonomy in a fast-paced environment, consistently maintaining a high standard of code quality, documentation, and operational excellence.

Full Stack Engineer

Webiz Digital | July 2017 - January 2020

- Developed full-stack web applications using Node.js, React, and modern JavaScript frameworks, delivering features across both frontend and backend layers.

- Designed and implemented RESTful APIs and backend services to support data-heavy business logic and third-party integrations.
- Worked closely with designers and product stakeholders to enhance existing user interfaces while maintaining performance, usability, and accessibility standards.
- Contributed to cloud-based deployments and environment configuration, gaining hands-on experience with scalable infrastructure and CI/CD workflows.
- Supported integration efforts with external systems, ensuring data consistency, error handling, and system reliability across distributed components.
- Demonstrated strong ownership and accountability by proactively identifying technical improvements and driving them through to production.

Software Developer

Centric Tech Inc. | October 2013 - June 2017

- Built and maintained backend services and web applications supporting internal tools and client-facing business systems.
 - Implemented application logic and APIs using JavaScript and backend technologies, contributing to early distributed system designs.
 - Worked closely with senior engineers to understand system architecture, deployment workflows, and production support processes.
 - Assisted with debugging, performance tuning, and reliability improvements in live production environments.
 - Collaborated across teams to deliver features aligned with business requirements, deadlines, and quality expectations.
 - Developed a strong foundation in software engineering best practices, setting the stage for senior-level ownership and independent execution.
-
