SKILLS

Frontend

React, Angular, TypeScript, JavaScript, HTML5, CSS3

Backend

Python, Node.js, Golang, REST APIs, Microservices

Cloud

AWS, AWS Lambda, AWS CDK, Serverless Architecture, Cloud-Native Systems

DevOps

CI/CD Pipelines, Docker, Infrastructure as Code, Git

Integration

CRM Integrations, Third-Party APIs, System Migrations, Legacy System Modernization

Databases

Relational Databases, NoSQL Databases

EDUCATION

Florida State University

Bachelor of Computer Science
2009 - 2013

Professional Summary

Senior Software Engineer with 9+ years of experience delivering full-stack, cloud-native web applications for enterprise and SaaS platforms. Strong background in modern frontend development using React, Angular, TypeScript, HTML, and CSS, combined with deep backend expertise in Python, Node.js, and Golang. Proven experience designing and building scalable REST APIs, microservices, and serverless applications on AWS using Lambda and AWS CDK. Adept at maintaining and modernizing legacy systems, integrating CRM platforms, and supporting complex system migrations. Known for strong ownership, clean code practices, and close collaboration with product, design, and DevOps teams to deliver reliable, high-performance solutions in remote, distributed environments.

Professional Skills

Senior Software Engineer

Web Venturez LLC | February 2020 - October 2025

- Designed, developed, and maintained full-stack web applications using React, TypeScript, HTML, and CSS to deliver responsive, user-friendly interfaces for enterprise clients.
- Built and owned backend services using Node.js and Python, implementing RESTful APIs and microservices that supported high-traffic SaaS platforms.
- Developed and deployed cloud-native and serverless solutions on AWS using Lambda and AWS CDK, improving scalability, reliability, and operational efficiency.
- Maintained and enhanced legacy systems while integrating modern frontend frameworks and backend services without disrupting existing business workflows.
- Led CRM and third-party integrations end-to-end, ensuring secure data exchange, robust error handling, and clear observability across distributed systems.
- Collaborated closely with product owners, designers, and DevOps teams to translate evolving requirements into production-ready solutions while operating with a high level of autonomy.

Full Stack Engineer

Webiz Digital | July 2017 - January 2020

- Developed full-stack web applications using React, JavaScript, HTML, and CSS, focusing on performance, usability, and maintainable component-based architectures.
- Designed and implemented backend services and REST APIs using Node.js, supporting frontend workflows and complex

business logic.

- Worked on maintaining and extending legacy applications while gradually modernizing systems with newer frameworks and best practices.
- Integrated external APIs and CRM systems to support business operations and data synchronization across platforms.
- Collaborated with cross-functional teams in an Agile environment, participating in code reviews, sprint planning, and continuous improvement initiatives.
- Contributed to cloud deployments and environment configuration on AWS, gaining hands-on experience with cloud-native development patterns.

Software Developer

Centric Tech Inc. | October 2013 - June 2017

- Built and maintained backend services and web applications supporting internal and client-facing systems using JavaScript and backend technologies.
 - Developed APIs and application logic that supported early microservice-style architectures and data-driven applications.
 - Worked extensively on troubleshooting, debugging, and performance optimization in production environments.
 - Assisted with maintaining legacy systems while implementing incremental improvements to reliability and code quality.
 - Collaborated with senior engineers and stakeholders to deliver features aligned with business requirements and project timelines.
 - Established a strong foundation in software engineering best practices, including version control, documentation, and clean code standards.
-
