LinkedIn: linkedin.com/in/tyler-roberts-a7b0953a0

SKILLS

Frontend

React, Next.js, TypeScript, HTML, CSS, Component-Based Architecture

Backend

C#, .NET, REST APIs, System Integration, Authentication & SSO

Cloud & DevOps

Azure, AWS, Azure DevOps, CI/CD, Cloud-Native Architecture

Engineering Practices

Agile / Scrum, Code Reviews, Performance Optimization, Maintainable System Design

EDUCATION

Florida State University

Bachelor of Computer Science
2009 - 2013

Professional Summary

Senior Software Engineer with 9+ years of experience designing, building, and owning modern full-stack web applications. Strong expertise in React, TypeScript, and C# with a proven track record of delivering scalable, maintainable systems in Agile environments. Experienced in end-to-end feature development, API design, authentication and SSO integrations, and component-based frontend architectures. Comfortable working across frontend, backend, and cloud platforms, with hands-on experience in Azure and AWS. Known for clear communication, high ownership, and a pragmatic approach to solving complex product and engineering problems.

Professional Skills

Senior Software Engineer

Web Venturez LLC | February 2020 - October 2025

- Designed, developed, and maintained scalable full-stack web applications using React, TypeScript, and C#, delivering production-ready features used by enterprise customers.
- Owned end-to-end feature development from requirements gathering through implementation, testing, deployment, and post-release support in a fast-paced Agile environment.
- Built and integrated RESTful APIs and backend services, ensuring reliable data flow, strong performance, and clean separation of concerns across systems.
- Contributed to authentication and SSO-related initiatives, collaborating with cross-functional teams to improve security, user experience, and system reliability.
- Worked extensively with component-based frontend architectures, improving reusability, maintainability, and consistency across multiple applications.
- Collaborated closely with product managers, designers, and engineers during sprint planning, standups, backlog refinement, and code reviews to deliver high-quality solutions on time.

Full Stack Engineer

Webiz Digital | July 2017 - January 2020

- Developed and enhanced full-stack web applications using React, TypeScript, and backend services, supporting customer-facing and internal business platforms.
- Implemented reusable frontend components and modern UI patterns, ensuring responsive design and alignment with product and UX requirements.
- Designed and consumed APIs to support complex workflows,

integrations, and data-driven features across multiple systems.

- Worked with cloud-hosted environments and CI/CD pipelines, contributing to reliable deployments and streamlined development workflows.

- Collaborated with cross-functional teams in an Agile/Scrum setting, actively participating in sprint ceremonies and peer code reviews.

- Improved existing codebases through refactoring, performance tuning, and adherence to best practices in maintainable software design.

Software Developer

Centric Tech Inc. | October 2013 - June 2017

- Built and maintained backend services and web applications using C# and modern web technologies to support business-critical systems.

- Implemented application logic, APIs, and integrations that enabled reliable data exchange between internal and external systems.

- Worked closely with senior engineers to understand system architecture, deployment processes, and production support requirements.

- Participated in debugging, performance optimization, and issue resolution in live production environments.

- Collaborated with stakeholders to translate business requirements into technical solutions that met quality and timeline expectations.

- Developed a strong foundation in software engineering best practices, preparing for senior-level ownership and responsibility.
