LinkedIn: linkedin.com/in/tyler-roberts-a7b0953a0

SKILLS

Programming

JavaScript, TypeScript, Node.js, Ruby, Python

Frontend

React, Tailwind CSS, Next.js, HTML, CSS

Backend

Node.js, Ruby on Rails, REST APIs, Microservices, Distributed Systems

AI_ML

Applied AI/ML, LLM Integration, Prompt Engineering, Vector Databases, AI Inference Services

Databases

PostgreSQL, MySQL, NoSQL Datastores

Cloud_DevOps

AWS, GCP, Docker, CI/CD, Observability

EDUCATION

Florida State University

Bachelor of Computer Science
2009 - 2013

Professional Summary

Senior Software Engineer with 10+ years of experience designing, building, and scaling modern full-stack web applications. Deep expertise across React, Node.js, Tailwind CSS, and Ruby on Rails, with a strong track record of delivering production-grade systems used by enterprise customers. Hands-on experience integrating AI/ML capabilities, including LLM-powered features, applied inference services, and intelligent automation, into real-world products. Proven ability to own end-to-end feature development, collaborate cross-functionally with product and design, and maintain high standards for code quality, security, accessibility, and performance in fully remote environments.

Professional Skills

Senior Software Engineer

Web Venturez LLC | February 2020 - October 2025

- Designed, developed, and maintained large-scale full-stack web applications using React, Tailwind CSS, Node.js, and Ruby on Rails, supporting multiple SaaS products in production.
- Owned end-to-end feature delivery from requirements and technical design through implementation, deployment, and long-term maintenance with minimal supervision.
- Built and scaled backend services and RESTful APIs, focusing on performance, reliability, and secure data access across distributed systems.
- Integrated AI/ML-driven functionality into existing and new product features, including intelligent automation and model-powered enhancements that improved user workflows.
- Collaborated closely with product managers, designers, and cross-functional engineering teams to translate business needs into robust technical solutions.
- Mentored engineers through code reviews, architectural discussions, and best practices, contributing to higher code quality and shared technical ownership.

Full Stack Engineer

Webiz Digital | July 2017 - January 2020

- Developed and enhanced full-stack applications using React on the frontend and Node.js-based services on the backend, delivering responsive and accessible user interfaces.
- Implemented reusable UI components and design-system patterns, ensuring consistency, performance, and maintainability across multiple applications.

- Designed and consumed RESTful APIs, integrating frontend workflows with backend business logic and external services.
- Worked with relational databases to design schemas, optimize queries, and ensure data integrity for production workloads.
- Collaborated with product owners and designers in an Agile environment to estimate work, refine requirements, and deliver features on schedule.
- Continuously improved application performance, code structure, and test coverage through refactoring and adherence to engineering best practices.

Software Developer

Centric Tech Inc. | October 2013 - June 2017

- Built and maintained backend services and web applications supporting internal tools and client-facing systems using JavaScript and related technologies.
 - Implemented core application logic, APIs, and integrations that formed the foundation of early scalable system designs.
 - Collaborated with senior engineers to understand architectural patterns, deployment workflows, and production support requirements.
 - Participated in debugging, performance tuning, and reliability improvements for live systems under real user load.
 - Worked cross-functionally with stakeholders to deliver features aligned with evolving business requirements and technical constraints.
 - Established a strong foundation in software engineering fundamentals, clean code practices, and long-term system maintainability.
-
