SKILLS

Programming

JavaScript, TypeScript, React, Node.js, Python

Frontend

React, Headless CMS, Public Website Development, Responsive UI, Performance Optimization

CMS

WordPress, Headless WordPress, REST API Integration

Cloud

Azure, AWS, GCP

DevOps

CI/CD Pipelines, Docker, Cloud Deployments

Practices

Agile, Cross-Functional Collaboration, Technical Leadership

EDUCATION

Florida State University

Bachelor of Computer Science
2009 - 2013

Professional Summary

Senior Software Engineer with 10+ years of professional software development experience, specializing in building and rebuilding modern, high-performance public-facing websites and applications. Strong expertise in React-based frontend development combined with headless CMS architectures, including WordPress used as a backend content platform. Proven ability to lead frontend rebuilds from concept to production, collaborating closely with marketing, design, and engineering stakeholders to deliver visually polished, performant, and scalable websites. Experienced working in Agile environments, delivering under tight timelines, and communicating effectively with cross-functional teams. Authorized to work in the United States with extensive experience delivering remote projects aligned to EST working hours.

Professional Skills

Senior Software Engineer

Web Venturez LLC | February 2020 - October 2025

- Led the design and development of multiple public-facing websites using React as the frontend framework, focusing on performance, accessibility, and modern UI standards.
- Implemented headless WordPress architectures where WordPress served as a backend CMS and React consumed content via REST APIs, enabling marketing teams to manage content independently.
- Collaborated closely with marketing, design, and product stakeholders to translate branding and business requirements into polished, user-friendly web experiences.
- Optimized frontend performance through code-splitting, component optimization, and efficient data-fetching strategies to improve load times and SEO metrics.
- Worked within Agile delivery cycles, participating in sprint planning, reviews, and daily standups while maintaining clear and consistent communication across distributed teams.
- Deployed and maintained applications in cloud environments, including Azure and AWS, ensuring reliability, scalability, and smooth release cycles.

Full Stack Engineer

Webiz Digital | July 2017 - January 2020

- Developed and maintained public-facing websites and internal applications using React on the frontend and Node.js-based

services on the backend.

- Built CMS-driven websites leveraging WordPress, including early headless patterns that separated content management from frontend presentation.
- Partnered with marketing teams to rapidly deliver new landing pages, content updates, and campaign-driven site enhancements.
- Ensured cross-browser compatibility, responsive design, and consistent user experience across desktop and mobile devices.
- Contributed to architectural decisions around frontend structure, API integration, and long-term maintainability.
- Actively participated in Agile workflows, collaborating with designers, QA, and project managers to deliver features on schedule.

Software Developer

Centric Tech Inc. | October 2013 - June 2017

- Developed and enhanced web applications with a strong focus on frontend usability and performance.
 - Worked extensively with JavaScript-based frameworks and early React implementations to build interactive user interfaces.
 - Integrated CMS-driven content, including WordPress-based systems, into custom frontend experiences.
 - Collaborated with senior engineers to refactor legacy codebases into more modular and maintainable architectures.
 - Supported deployment and maintenance of applications in cloud-hosted environments.
 - Built a strong foundation in professional software development practices, teamwork, and clear technical communication.
-
