SKILLS

Programming

Ruby, JavaScript, TypeScript, Python

Backend

Ruby on Rails, REST APIs, Monolithic & Modular Architectures, Background Jobs, Service-Oriented Design

Databases

PostgreSQL, SQL Optimization, Schema Design, Migrations, Data Integrity

Cloud & DevOps

Heroku, AWS, Docker, CI/CD, Infrastructure Ownership, Production Monitoring

Observability & Tooling

Scout, Bugsnag, Logging, Metrics, Performance Monitoring

Collaboration & Delivery

Technical Leadership, Ticket Breakdown, Estimation, Slack, GitHub, Linear, Figma, Product Collaboration

EDUCATION

Florida State University

Bachelor of Computer Science
2009 - 2013

Professional Summary

Senior Software Engineer with 9+ years of experience building, owning, and leading production-grade, cloud-native SaaS platforms in startup and growth-stage environments. Deep hands-on expertise in backend systems, relational databases, and cloud deployment, with strong ownership across architecture, delivery, and operational excellence. Proven ability to act as a hands-on technical lead—driving delivery, raising engineering standards, making core technical decisions, and collaborating directly with executive and product leadership. Experienced in high-autonomy roles where clarity, quality, and execution matter more than process theater.

Professional Skills

Senior Software Engineer

Web Venturez LLC | February 2020 - October 2025

- Acted as hands-on technical lead for multiple SaaS products, owning architecture, delivery timelines, and production reliability in a fast-paced startup environment.
- Built and maintained large-scale backend systems using Ruby on Rails and PostgreSQL, supporting core business workflows and customer-facing features.
- Owned deployment, infrastructure, and operational workflows, ensuring high availability, performance, and smooth production releases.
- Made and owned technical decisions for core platform components, balancing speed of delivery with long-term maintainability and quality.
- Wrote, reviewed, and refactored production code while setting a high bar for engineering quality and consistency.
- Broke down complex initiatives into clear technical tickets, providing direction and context for engineers during implementation.
- Collaborated directly with product managers and executive stakeholders to shape roadmap priorities and future platform capabilities.
- Improved system observability by introducing structured logging, monitoring, and error tracking to reduce incident response time.
- Led cross-functional collaboration through Slack, GitHub, and Linear to maintain transparency and alignment across teams.
- Mentored engineers through code reviews, architectural discussions, and hands-on problem solving.
- Supported hiring, onboarding, and performance accountability

while remaining an individual contributor focused on delivery.

Full Stack Engineer

Webiz Digital | July 2017 - January 2020

- Developed and maintained full-stack web applications using Ruby on Rails, PostgreSQL, and modern JavaScript frameworks.
- Designed RESTful APIs and backend services to support complex business logic and integrations.
- Collaborated closely with designers and product stakeholders to translate requirements into scalable technical solutions.
- Implemented database schemas, migrations, and query optimizations to ensure performance and data consistency.
- Supported cloud deployments and release processes, gaining hands-on experience with production infrastructure.
- Reviewed code and contributed to improving engineering standards and shared best practices.
- Worked in agile environments with rapid iteration and direct stakeholder feedback.
- Diagnosed and resolved production issues related to performance, data integrity, and application stability.
- Contributed to technical planning and estimation for upcoming product features.

Software Developer

Centric Tech Inc. | October 2013 - June 2017

- Built and maintained backend services and web applications supporting internal and client-facing systems.
 - Implemented application logic and APIs using server-side frameworks and relational databases.
 - Worked closely with senior engineers to understand system architecture and deployment workflows.
 - Assisted with debugging, performance tuning, and reliability improvements in production environments.
 - Collaborated across engineering and business teams to deliver features aligned with requirements.
 - Participated in code reviews and refactoring efforts to improve maintainability and quality.
 - Developed a strong foundation in software engineering best practices and ownership.
-
