PROFESSIONAL SUMMARY

Experienced Full Stack Developer with 8+ years of proven expertise in .NET, Angular, cloud infrastructure (Azure, AWS, GCP), and scalable microservice architecture. Passionate about building secure and intuitive digital platforms in fintech and transaction-heavy ecosystems. Seeking to bring robust technical leadership and hands-on coding excellence to a high-impact financial product team.

TECHNICAL SKILLS

- **Languages & Frameworks:** .NET 6+, ASP.NET Core, C#, JavaScript, TypeScript, Angular, Node.js, HTML5, CSS3
- **Cloud & DevOps:** Azure, AWS, GCP, Azure DevOps, GitHub Actions, Docker, Kubernetes, Terraform
- **Databases:** SQL Server, PostgreSQL, MySQL, MongoDB, Redis, Firebase
- **Messaging & Orchestration:** RabbitMQ, Kafka, SignalR, REST, gRPC, WebSockets
- **Tools:** Git, Swagger, Selenium, Mocha, Webpack, JIRA, Visual Studio, Postman, Figma
- **Testing:** xUnit, NUnit, Jasmine, Cypress, Jest
- **CI/CD:** Jenkins, GitHub Actions, Azure Pipelines
- **Monitoring:** Prometheus, Grafana, Azure Monitor, ELK Stack

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Led the implementation of a scalable .NET 6+ backend with REST APIs for a digital wallet system, handling over 1M monthly financial transactions across mobile and web platforms.
- Developed a dynamic Angular frontend with TypeScript and RxJS, delivering responsive UIs that enabled secure peer-to-peer transfers, cash-to-card conversion, and asset management.
- Integrated SignalR for real-time balance updates and notifications, enhancing user experience across cross-platform clients.
- Built a CI/CD pipeline with GitHub Actions and Azure DevOps, reducing release cycle from bi-weekly to daily deployments without downtime.
- Managed microservices deployment via Docker and Kubernetes on Azure Cloud, ensuring 99.9% system uptime with proactive scaling and rollback capabilities.

- Refactored existing services into domain-driven microservices, increasing maintainability and decreasing feature delivery time by 40%.
- Implemented secure user authentication and multi-factor authorization using Azure Active Directory B2C and JWT tokens.
- Collaborated with cross-functional squads to translate financial domain logic into scalable service-oriented architecture, enabling rapid expansion of transaction features.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Engineered backend services using .NET Core and integrated SQL Server for high-volume marketing analytics platforms across retail and finance sectors.
- Developed responsive and accessible frontend components with Angular 10, improving performance and usability across mobile and desktop devices.
- Integrated RabbitMQ message queues for asynchronous campaign event processing, achieving 3x improvement in throughput under peak load.
- Automated test coverage with NUnit and Selenium, achieving 92% test coverage and cutting QA regression cycles by 60%.
- Worked closely with UX designers and product owners to iterate features based on user feedback and usage analytics.
- Containerized legacy .NET Framework apps with Docker, deploying them seamlessly to Azure Kubernetes Service (AKS).
- Monitored application performance with ELK Stack and Grafana dashboards, reducing incident resolution time by 45%.
- Contributed to Agile ceremonies and mentoring junior developers on CI/CD, testing, and clean code practices.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Built full-stack web solutions in C# and ASP.NET MVC for small-to-medium fintech platforms with payment gateway integrations.
- Designed reusable UI components in AngularJS and migrated codebases to Angular 6, improving UI performance and maintainability.
- Developed multi-tenant SaaS applications with secure role-based access control, scaling to serve 100+ client organizations.
- Created stored procedures and optimized queries in SQL Server, cutting data retrieval latency by over 30% across core financial reports.
- Integrated third-party APIs including Stripe, Twilio, and Google Maps for service enrichment and operational insights.
- Applied Swagger for RESTful API documentation, streamlining frontend-backend collaboration.
- Developed data caching layer using Redis, reducing server load and improving dashboard rendering speed by 50%.
- Provided production support for critical fintech operations, ensuring 24/7 SLA compliance for high-value clients.

Software Developer

Decima Digital

November 2015 – April 2016

Tallinn, Estonia

- Created RESTful web services in ASP.NET for client-facing content portals and CRM integration tools.
- Designed dynamic dashboards in JavaScript and Bootstrap for analytics visualization used by enterprise stakeholders.
- Contributed to a financial document parser using regex, LINQ, and C# for PDF/Excel data extraction.
- Worked in an Agile Scrum team delivering monthly features and bug fixes aligned with business KPIs.
- Refactored legacy jQuery UI code into reusable Angular components to reduce duplication and improve testability.
- Automated deployment workflows using Jenkins for continuous delivery on internal test environments.
- Maintained SQL Server schemas and wrote complex joins for reporting modules.
- Implemented Git branching strategy for clean and traceable code delivery.

Software Developer Intern

Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Assisted in building internal tools in C# for automating monthly client invoicing and service usage reports.
- Implemented backend logic for user registration and login using ASP.NET Identity framework.
- Created mobile-first designs using Bootstrap, improving form usability and load speed.
- Wrote integration scripts to sync CRM data with cloud-based accounting software.
- Used LINQ to optimize data filtering logic and simplify codebase maintenance.
- Participated in daily standups and product demos, receiving direct mentorship from senior engineers.
- Ran manual and automated QA on UAT builds using Postman and Selenium.
- Contributed to documentation and internal wikis for team onboarding.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ Microsoft Certified: Azure Developer Associate
- ❖ AWS Certified Developer – Associate
- ❖ Google Cloud Associate Cloud Engineer
- ❖ MCSD: App Builder – Microsoft
- ❖ Docker & Kubernetes Mastery – Udemy

PROJECTS

- ✓ **Digital Wallet Platform for Cross-Border Transfers**
Led backend and frontend architecture of a secure fintech platform enabling cash-to-card and P2P transactions with .NET Core, Angular, Azure, and RabbitMQ.
- ✓ **Cloud-Based Transaction Engine**
Built scalable microservices in .NET 6 deployed on AKS with Redis, SQL Server, and Azure Service Bus for a high-load transaction engine processing thousands of ops/min.
- ✓ **Real-Time Notification System**
Developed SignalR-based solution for financial alerts across mobile and web interfaces, integrating with OAuth-secured APIs and Azure Event Grid.
