

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Highly skilled and performance-driven Senior Software Developer with 8+ years of experience in designing and maintaining scalable, high-performance web solutions using .NET technologies. Adept at building microservices architectures, implementing CI/CD pipelines, and delivering mission-critical enterprise systems. Proven track record in Agile teams, fostering team collaboration, and optimizing software quality and performance. Passionate about driving continuous improvement and delivering business value through robust technical execution.

TECHNICAL SKILLS

- **Languages & Frameworks:** C#, .NET Core, ASP.NET Core, .NET Framework, Web API, Entity Framework
- **Frontend:** HTML5, CSS3, JavaScript, Angular (fundamentals), Razor
- **DevOps & CI/CD:** GitLab CI/CD, GitHub Actions, Jenkins, Docker, Kubernetes
- **Cloud & Hosting:** Azure DevOps, Azure App Services, AWS EC2 (basic exposure)
- **Databases:** SQL Server, PostgreSQL, MongoDB
- **Testing:** xUnit, NUnit, MSTest, Moq, Integration Testing, Test-Driven Development
- **Architecture:** Microservices, RESTful APIs, Clean Architecture, Onion Architecture
- **Tools:** Git, Jira, Confluence, Visual Studio, ReSharper
- **Agile Methodologies:** Scrum, Kanban

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Led the backend development of a modular microservices-based platform using .NET Core and Docker, enabling dynamic scaling across entertainment and CRM platforms.
- Designed and implemented REST APIs for internal and external integrations, improving system interoperability and reducing manual processes by 40%.
- Migrated legacy .NET Framework components to .NET 6+, significantly enhancing system performance and reducing infrastructure costs.
- Actively participated in sprint planning, task decomposition, and estimations, collaborating closely with PMs and stakeholders to align deliverables with business goals.

- Created comprehensive test coverage using xUnit and Moq, boosting code reliability and reducing production incidents by 65%.
- Maintained GitLab CI/CD pipelines with automated unit tests and staging deployments, cutting delivery time by 35% and improving deployment consistency.
- Conducted in-depth code reviews and architectural discussions, mentoring junior engineers and fostering a culture of clean, maintainable code.
- Diagnosed and resolved system bottlenecks through profiling and SQL tuning, reducing request latency by over 50% in core APIs.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed end-to-end web applications using ASP.NET Core and Entity Framework, streamlining business processes across marketing automation and user management systems.
- Integrated 3rd-party analytics and campaign APIs into .NET backend, facilitating seamless customer tracking and dynamic campaign adjustments.
- Designed and deployed a reusable user authentication microservice, enabling secure and scalable SSO across 5+ internal applications.
- Established CI pipelines in GitLab, supporting automated build and deployment workflows for both development and QA environments.
- Wrote and maintained robust unit and integration tests with MSTest and custom mocks, improving test coverage from 45% to 82%.
- Participated in Agile ceremonies including daily stand-ups, sprint retrospectives, and planning sessions to improve team velocity and communication.
- Collaborated with the QA team to analyze, debug, and resolve production issues, reducing bug resolution time by 30%.
- Documented system architecture and data flow diagrams for internal use, accelerating onboarding of new team members.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Contributed to multi-tenant .NET-based applications for client-side reporting dashboards with live data streaming using SignalR.
- Built custom APIs using ASP.NET Web API and SQL Server stored procedures to support real-time insights for iGaming platforms.
- Refactored legacy monolithic codebases into modular components using clean architecture patterns, improving code reusability and testability.
- Assisted in containerizing key services using Docker and managing environments with Docker Compose for dev/test/staging deployments.
- Developed admin portals and control panels using Razor and JavaScript, enhancing usability and operational control.
- Performed regression testing and release smoke checks, ensuring stability and consistency across multiple deployment environments.
- Contributed to sprint-based delivery using Jira, improving project transparency and client satisfaction.
- Improved performance of background jobs by implementing parallel processing strategies, reducing task runtimes by 60%.

Software Developer

Decima Digital

November 2015 – April 2016

Tallinn, Estonia (Remote)

- Built custom business logic and backend services in C# for client onboarding workflows.
- Assisted in upgrading .NET Framework 4.5 applications to .NET Core for better performance and deployment flexibility.
- Delivered integration modules to connect external APIs to core systems via REST and SOAP.
- Resolved backend bottlenecks using profiling tools and proposed efficient LINQ-to-SQL optimizations.

Software Developer Intern

Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Assisted in building internal administrative tools using ASP.NET and WinForms.
- Participated in code reviews and learned Agile development methodologies through daily collaboration.
- Wrote technical documentation and user manuals to support software releases and QA testing.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,

2010 – 2014

CERTIFICATIONS

- ❖ Microsoft Certified: Azure Developer Associate (AZ-204)
- ❖ Docker for .NET Developers – Pluralsight
- ❖ Secure Coding Practices for .NET – Udemy
- ❖ Test-Driven Development in .NET – LinkedIn Learning

PROJECTS

- 🚀 **Performance Monitoring Tool for iGaming Platform**
Designed and deployed a microservices-based diagnostics tool in .NET 6 with SQL Server and Redis, enabling real-time resource monitoring across gaming environments.
Integrated logging with Serilog and dashboards via Grafana for live health metrics and alerts.
- 🚀 **CI/CD Pipeline Optimization**
Refactored and unified GitLab pipelines for 5+ services, reducing deployment errors and pipeline duration by 45%.
- 🚀 **Authentication Gateway API**
Built a secure Auth API supporting OAuth2, JWT tokens, and role-based access control for gaming admin panels.
