

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-866410383/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Versatile and result-driven Senior Software Developer with over 8 years of professional experience in building and maintaining scalable enterprise applications. Specialized in .NET Core (7/8), C#, Angular (12+), SQL, and full-stack development within Agile teams. Proven ability to implement secure, robust, and high-performance solutions for clients across multiple industries. Adept at leveraging CI/CD pipelines, automated testing, object-oriented principles, and cloud-based infrastructures such as Azure.

TECHNICAL SKILLS

- Languages: C#, TypeScript, JavaScript, HTML, CSS, SQL
- Frameworks/Libraries: .NET Core (7/8), ASP.NET, Angular (12+), Entity Framework, LINQ
- Tools & Platforms: Git, Azure DevOps, Docker, Kubernetes, Terraform
- Databases: Microsoft SQL Server, Azure SQL, MySQL
- Development: REST APIs, Microservices, Clean Architecture, Agile/Scrum
- Testing: xUnit, NUnit, Moq, Cypress, Jasmine, Karma
- CI/CD: GitHub Actions, GitLab CI, Jenkins
- Cloud: Microsoft Azure (App Services, Azure SQL, Azure Functions)

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Engineered and maintained high-availability .NET Core 7 microservices, implementing RESTful APIs and ensuring optimal performance under high concurrent loads.
- Led Angular 13+ front-end development for enterprise-level applications, ensuring seamless integration with backend APIs and responsive UI/UX across all devices.
- Developed SQL Server stored procedures, views, and indexes for complex transactional workflows with real-time data synchronization across systems.
- Integrated CI/CD pipelines using GitHub Actions and Azure DevOps to enable automated testing, code analysis, and continuous deployments.
- Refactored legacy .NET Framework applications into modern .NET Core microservices, applying clean architecture principles and domain-driven design.
- Participated in Scrum ceremonies and collaborated closely with Product Owners to ensure sprint goals and user stories were met with high code quality.
- Designed and implemented role-based access control, JWT authentication, and secure endpoints following OWASP standards.

- Facilitated knowledge-sharing sessions and mentored junior developers in design patterns, Git workflows, and modular coding practices.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Designed end-to-end web applications using .NET Core, Angular, and SQL Server, reducing turnaround time of internal marketing platforms by 40%.
- Worked within Agile teams to analyze requirements, design database schemas, and build reusable components with modular Angular 10+ architecture.
- Created unit and integration tests using NUnit and Moq to improve code coverage and reduce regression defects in production releases.
- Contributed to the modernization of deployment practices using Docker containers and orchestrated staging environments with Kubernetes.
- Integrated third-party APIs (e.g., Twilio, Google Maps) for dynamic content delivery, increasing campaign customization capability for clients.
- Ensured Git branching strategy compliance, conducted peer reviews, and maintained clear documentation for all project modules.
- Used Azure Blob Storage and Azure Functions to handle asynchronous event-driven workloads in marketing automation modules.
- Built reusable custom Angular directives and services to maintain consistent styling and functionality across the platform.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Delivered scalable multi-tier solutions using ASP.NET MVC and .NET Core for logistics and warehouse automation systems.
- Built Angular 8+ modules and implemented service-based architecture for efficient data flow between backend and UI components.
- Optimized database queries and normalized schemas in Microsoft SQL Server to ensure sub-second response times for analytics dashboards.
- Collaborated with QA teams to develop automated UI tests using Cypress and integration tests using Postman and Newman.
- Managed deployments through GitLab CI pipelines, ensuring zero-downtime releases with rollback capabilities.
- Designed custom logging and exception-handling middleware for centralized issue tracking and faster debugging.
- Migrated legacy codebases to support cloud hosting in Azure, reducing infrastructure costs by 25%.
- Actively participated in architectural reviews and presented implementation proposals aligned with business objectives.

Decima Digital

Software Developer

November 2015 – April 2016

Tallinn, Estonia

- Contributed to CRM modules using .NET technologies and integrated reporting features using SSRS.
- Assisted in performance tuning and code optimization tasks, leading to 30% improvement in load times of reporting dashboards.

- Implemented secure login modules with ASP.NET Identity and customized user role policies.
- Supported deployment activities and created batch scripts to automate recurring development tasks.
- Assisted in UI updates using HTML5/CSS3 to enhance user accessibility across platforms.
- Conducted exploratory testing of backend modules and identified bugs early in the sprint cycle.
- Collaborated with cross-border teams to document requirements and clarify edge case scenarios.
- Enhanced SQL scripts for daily data imports from flat files and legacy DBs.

Borna Technology

Software Developer Intern

September 2014 – August 2015

Tallinn, Estonia

- Developed web-based inventory management features in ASP.NET Web Forms under senior developer supervision.
 - Wrote SQL scripts for data analysis tasks and automated monthly reporting operations.
 - Built basic CRUD modules using ADO.NET and learned principles of layered application design.
 - Gained exposure to Agile workflows including sprint planning and backlog grooming sessions.
 - Implemented input validation and business rule enforcement on the UI and service layers.
 - Enhanced internal admin tools with Excel export/import functionalities.
 - Participated in daily standups, code reviews, and team retrospectives.
 - Documented internal APIs and updated knowledge base entries for team reference.
-

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,

2010 – 2014

CERTIFICATIONS

- ❖ Microsoft Certified: Azure Developer Associate
 - ❖ Microsoft Certified: DevOps Engineer Expert
 - ❖ Microsoft Certified: .NET Developer (C# and ASP.NET Core)
-
-

PROJECTS

- ✓ **Marketing Automation Engine** – Developed scalable microservices with .NET Core and Angular for a campaign delivery system handling millions of requests/month.
- ✓ **Inventory & Order System** – Built a full-stack logistics tool with .NET, Angular, and SQL Server for a warehouse management startup, enabling real-time tracking and restocking.
- ✓ **Azure Cost Monitor** – Created a dashboard for monitoring Azure resource consumption with alerting features using Azure Functions, App Insights, and Logic Apps.
- ✓ **Role-Based Admin Portal** – Developed an admin interface with multi-tenant support using Angular, IdentityServer, and .NET Core APIs with granular access permissions.
