

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Detail-oriented and innovative Senior Software Developer with over 9 years of experience in building scalable, maintainable, and secure web applications. Specializing in .NET technologies with strong hands-on experience in Blazor (WebAssembly and Server), REST API integration, Entity Framework Core, and CI/CD practices. Proven track record in leading front-end and back-end projects, collaborating with cross-functional teams, and delivering performant and accessible solutions.

TECHNICAL SKILLS

- Languages: C#, JavaScript, TypeScript, SQL, HTML5, CSS3
- Frameworks: .NET Core (3.1 → 8), ASP.NET MVC/Web API, Blazor (WASM/Server), Entity Framework Core
- Tools: Visual Studio, Git, GitHub Actions, Azure DevOps, Docker
- Databases: SQL Server, MySQL, SQLite
- Testing: xUnit, NUnit, bUnit, Moq, Playwright
- UI/Styling: Tailwind CSS, Bootstrap, Razor Components
- DevOps: Azure App Services, Azure Functions, Git workflows, CI/CD pipelines
- Other: RESTful APIs, GraphQL, JWT, JS interop, Scrum, Agile methodologies

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Led development of a cross-platform Blazor Server solution with complex forms, real-time validation, and granular access control for enterprise clients.
- Designed reusable Blazor components following component lifecycle best practices and applied DI for flexible services and unit testability.
- Integrated REST APIs and GraphQL endpoints with Entity Framework Core to manage a large-scale relational data model and support real-time dashboard updates.
- Developed end-to-end bUnit test coverage and integrated with GitHub Actions to enforce quality gates and continuous integration pipelines.
- Worked closely with UX/UI teams and designers to ensure the Blazor front-end met accessibility standards (WCAG 2.1) and was mobile-responsive.

- Optimized server-side rendering and pre-rendering strategies to enhance SEO and reduce TTFB for SPA-like experiences.
- Managed feature releases through Azure DevOps pipelines, coordinating rollouts using feature flags and A/B testing strategies.
- Participated in sprint planning, grooming, and code review sessions across distributed teams with daily Greek/English communication.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Built Blazor WebAssembly proof-of-concepts and migrated legacy .NET MVC modules into a modern, component-based architecture.
- Developed and consumed REST APIs using ASP.NET Core and integrated external services via secure OAuth2 authentication flows.
- Implemented authentication, role-based access control, and secure cookie/session management in Blazor using ASP.NET Identity.
- Configured CI/CD pipelines with GitHub Actions for automatic deployments to Azure App Services and slot-based staging.
- Wrote unit and integration tests using xUnit and bUnit to improve test coverage and catch regressions early during builds.
- Led performance audits using Lighthouse and browser dev tools to identify render-blocking assets and optimize asset bundling.
- Collaborated with QA and product teams to ensure accurate requirements translation into scalable components and APIs.
- Mentored junior team members on Blazor lifecycle, JS interop, component isolation, and error boundary handling.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Designed modular .NET Core applications using layered architecture with separation of concerns and repository patterns.
- Developed custom Razor pages and user-friendly dashboards for internal tools, employing responsive design principles.
- Migrated monolithic legacy systems to a more maintainable and scalable microservice architecture hosted on Azure.
- Created reusable Entity Framework Core repositories and async services to improve backend performance and testability.
- Integrated third-party APIs, including payment gateways and CRM systems, with secure and fault-tolerant retry logic.
- Configured Docker-based local development environments and standardized local builds for multiple platforms.
- Monitored app performance and logs using Azure Application Insights and implemented alerts for SLA breaches.
- Contributed to documentation and onboarding materials to support faster ramp-up of new engineers on the codebase.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Delivered web modules using ASP.NET MVC and began experimenting with early Blazor and Razor Component design patterns.
- Developed internal tooling for customer relationship management and business analytics reporting.
- Utilized dependency injection and configuration patterns to simplify environment-based deployments.
- Participated in code reviews and performance tuning activities targeting SQL queries and .NET controllers.
- Supported integration of dynamic reporting tools using server-side templating and export features (PDF/Excel).
- Improved front-end interactivity by leveraging JS interop to bridge modern scripts into legacy views.
- Adopted basic Git branching models and wrote PowerShell scripts for local deployments and backups.
- Participated in daily standups and retrospectives, following an Agile methodology and Kanban board.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Built early-stage UI prototypes using Blazor-like patterns and C# logic in Razor files for real-time content rendering.
- Created simple data access layers with ADO.NET and later migrated to Entity Framework for more maintainability.
- Implemented CRUD functionality and export modules for internal business data systems.
- Wrote scripts to automate database seeding and cleanup processes during staging deployments.
- Participated in weekly code walkthroughs and refactoring sessions to improve code readability and modularity.
- Investigated and resolved performance bottlenecks in view rendering and background job execution.
- Documented technical flows and diagrams to support application onboarding and maintenance.
- Assisted in cross-browser testing and compliance QA for regional accessibility guidelines.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ Microsoft Certified: Azure Developer Associate
- ❖ Pluralsight Path: Blazor Fundamentals and Advanced Topics
- ❖ GitHub Actions for CI/CD Developers (Coursera)
- ❖ Entity Framework Core In-Depth (Udemy)

PROJECTS

- ✓ **Real-Time Blazor Dashboard:** Developed a high-performance Blazor Server dashboard with SignalR integration and live chart updates, enabling enterprise users to track logistics data in real time.
- ✓ **Blazor Modular CMS:** Designed a content management system using Blazor WebAssembly with dynamic component rendering, multilingual support, and full offline capabilities.
- ✓ **DevOps Workflow Automation:** Created automated CI/CD pipelines with GitHub Actions for testing, building, and deploying Blazor apps to Azure with staging/production slots.
