

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Senior Software Engineer with 8+ years of experience designing, building, and maintaining scalable, cloud-based applications using .NET Core, C#, Azure, and React/React Native. Proven ability to lead hybrid development teams, implement robust CI/CD pipelines using Azure DevOps, and deliver performant microservices-based systems. Adept in mobile-first API development, Azure Functions, Service Bus architectures, and infrastructure-as-code using Terraform and YAML. Passionate about clean code, mentorship, and agile principles.

TECHNICAL SKILLS

- **Languages & Frameworks:** C#, ASP.NET Core, .NET 6+, React, React Native, JavaScript, TypeScript, Node.js
- **Cloud & DevOps:** Azure (App Services, Azure Functions, Azure Service Bus, Azure DevOps, ARM Templates, Azure App Center), YAML, Terraform
- **Databases & Search:** SQL Server, Cosmos DB, PostgreSQL, Elasticsearch, Kibana
- **Tools & Platforms:** Git, Bitbucket, Git Flow, Jira, Confluence, SSMS, Service Bus Explorer
- **Practices:** CI/CD, Microservices, RESTful API Design, TDD, Agile/Scrum, A/B Testing
- **Others:** Azure Document Intelligence, OpenAI/LLM APIs, Docker, Kubernetes (basic)

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Spearheaded architecture and development of cloud-native services using ASP.NET Core, Azure Functions, and Azure Service Bus, resulting in 35% performance improvement in asynchronous processing.
- Mentored a hybrid team of 6 developers across time zones, introducing peer reviews and pairing sessions that elevated code quality and team velocity.
- Led migration from monolithic architecture to Azure-hosted microservices, significantly improving scalability and reducing downtime during deployments.
- Developed REST API layers with ASP.NET Core integrated into React and React Native clients, ensuring fast, mobile-first experiences with 99.99% uptime.
- Designed and deployed CI/CD pipelines via Azure DevOps, reducing deployment times by 70% and enabling rapid, secure rollouts across environments.

- Built and monitored robust Service Bus messaging solutions using Azure Service Bus Explorer and custom logging tools with Application Insights.
- Implemented Infrastructure-as-Code using Terraform and YAML for consistent, version-controlled provisioning of Azure resources.
- Collaborated with product and design to ship high-impact features, leveraging Azure AI services like Document Intelligence and OpenAI for smart OCR and user interaction enhancements.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Delivered high-availability ASP.NET Core APIs consumed by external partners, including JWT authentication, CORS, and Swagger documentation.
- Integrated React frontends with backend APIs, achieving seamless interaction across multiple domains with cross-platform responsiveness.
- Automated infrastructure and deployments using Azure DevOps Pipelines and YAML configurations, accelerating feature delivery across 3 environments.
- Managed Azure App Services lifecycle, ensuring autoscaling, security policies, and alerting systems were tightly aligned with business SLAs.
- Orchestrated development workflows using Bitbucket, Git Flow, and Confluence, improving documentation and version control practices.
- Reduced operational costs by optimizing backend logic and implementing caching layers in memory and Redis for high-demand endpoints.
- Built robust frontend components in React and Next.js, leveraging TypeScript and performance profiling tools to ensure fast rendering.
- Led daily standups and bi-weekly retrospectives in Agile teams, helping maintain delivery cadence and resolving technical blockers proactively.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Developed business-critical applications in ASP.NET MVC/Core and C#, including a complex CRM system with multi-role access and dashboarding.
- Implemented REST APIs consumed by Angular and React apps, focusing on versioning, backward compatibility, and OpenAPI documentation.
- Deployed applications to Azure App Services with performance monitoring and Application Insights integration for error tracing and diagnostics.
- Handled database modeling, migrations, and tuning in SQL Server and PostgreSQL for high-volume transactional systems.
- Created custom reusable UI components in React, increasing frontend development speed and reducing duplication across projects.
- Collaborated with QA teams to implement TDD and E2E test automation using NUnit, Postman, and Cypress.
- Participated in client workshops to capture domain knowledge, translating requirements into actionable tickets in Jira.
- Assisted DevOps engineers in rolling out Terraform-based resource provisioning and policy enforcement in Azure environments.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Built and maintained web components using ASP.NET Web API and React.js for e-commerce platforms with payment and cart modules.
- Implemented user authentication and authorization modules, including OAuth 2.0 and custom role-based access control.
- Refactored legacy backend code into modular .NET Core services, improving testability and code readability.
- Deployed applications to Azure App Services and integrated logging dashboards via Kibana for real-time observability.
- Wrote custom CI scripts using YAML for internal build processes in Azure DevOps, ensuring repeatable and secure deployment pipelines.
- Developed reusable hooks and UI patterns in React to maintain UX consistency across projects.
- Integrated Elasticsearch for full-text product search with highlighted matches and faceted filtering features.
- Used Confluence and Jira extensively for sprint planning, documentation, and retrospectives.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Assisted in the development of internal admin tools using ASP.NET MVC and Razor views to streamline operations and report generation.
- Contributed to frontend development in JavaScript, jQuery, and early-stage React, learning modern component-based UI structures.
- Wrote unit tests in MSTest and NUnit, increasing code coverage for business-critical endpoints.
- Supported transition from on-premise deployments to early Azure App Service environments.
- Created automation scripts for backups, migrations, and deployment tasks using PowerShell and Git hooks.
- Collaborated closely with senior developers on debugging production issues and enhancing SQL Server performance.
- Produced technical documentation and API specs to onboard new developers into existing codebases.
- Learned Agile practices and contributed to sprint cycles, performing tasks ranging from bug fixes to small features.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ **SmartDocs OCR Platform** – Integrated Azure Document Intelligence and React frontend to extract and validate financial data from scanned invoices.
 - ❖ **Real-Time Notification Hub** – Designed and implemented a microservice using Azure Functions and Service Bus to dispatch real-time alerts to mobile apps via SignalR.
 - ❖ **CI/CD Excellence** – Built reusable Azure DevOps YAML templates to enable one-click deployments and environment-specific configuration across 12+ services.
-

PROJECTS

- ✓ Microsoft Certified: Azure Developer Associate
- ✓ Microsoft Certified: Azure Fundamentals
- ✓ Microsoft Certified: DevOps Engineer Expert
