

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Senior Software Developer with 9+ years of experience in architecting and implementing secure, scalable full-stack web solutions. Specialized in Microsoft .NET (C#), ASP.NET Core, Vue.js, TypeScript, and Kubernetes-based microservices. Proven track record of delivering robust systems that leverage modern authentication (OAuth2), CI/CD pipelines, and AMQP messaging. Comfortable leading Agile teams and collaborating across international environments.

TECHNICAL SKILLS

- **Frontend:** Vue.js, Angular, TypeScript, JavaScript (ES6+), Semantic UI, SASS/SCSS, HTML5, CSS3
- **Backend:** C#, .NET Core, ASP.NET MVC/WebAPI, RESTful services, Microservices Architecture
- **Messaging & Auth:** AMQP (RabbitMQ), OAuth2.0, JWT, ADFS
- **DevOps & Cloud:** Docker, Kubernetes, Azure DevOps, CI/CD pipelines
- **Database:** MS SQL Server, PostgreSQL, Elasticsearch
- **Tools:** Git, GitHub, GitLab, Postman, Fiddler, Visual Studio, VS Code
- **Testing:** xUnit, Moq, NUnit, Jasmine, Karma
- **Methodologies:** Agile/Scrum, TDD, SDLC Best Practices
- **OS & Shell:** Linux (Bash), Windows

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Led the frontend development of enterprise applications using Vue.js and TypeScript, delivering dynamic and maintainable single-page interfaces optimized for performance and accessibility.
- Designed scalable .NET Core microservices with robust REST APIs, integrating OAuth2 authentication and secure communication across distributed services.
- Built and maintained Kubernetes Helm charts for automatic deployment of microservices across environments with zero-downtime deployment strategies.
- Developed AMQP-based event-driven modules for real-time processing of asynchronous transactions, with robust routing, retries, and error handling mechanisms.
- Created comprehensive unit and integration tests using xUnit, Jasmine, and Moq, maintaining 90%+ code coverage across key business modules.
- Managed CI/CD pipelines using Azure DevOps for automated testing, containerization, and deployment to Kubernetes clusters.

- Collaborated closely with international product teams to gather requirements, propose solutions, and iteratively deliver working software every sprint.
- Authored detailed technical documentation, including system architecture diagrams, service contracts, and audit/security considerations.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Developed responsive front-end modules in Angular and Vue.js, integrating with REST APIs and ensuring compliance with accessibility and usability standards.
- Participated in backend development with ASP.NET Core and Entity Framework, managing schema evolution and optimizing database performance on SQL Server.
- Designed and implemented OAuth2.0-secured APIs, handling access tokens, refresh flows, and integration with ADFS.
- Implemented real-time features using RabbitMQ for messaging between microservices, enabling scalable multi-tenant architectures.
- Applied Gitflow strategies for source control, ensuring clear branching, merge, and release processes across a global team.
- Conducted code reviews and maintained coding standards based on SOLID principles and secure development lifecycle.
- Estimated and planned backlog items accurately during sprint planning sessions, aligning technical deliverables with business goals.
- Facilitated daily Scrum ceremonies and contributed to the adoption of Agile best practices across the department.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Created modular Vue.js components and orchestrated their interaction with complex backend logic using REST APIs built in ASP.NET MVC.
- Refactored legacy .NET codebases into microservices with domain separation, service registries, and resilient error recovery workflows.
- Maintained and evolved a distributed logging infrastructure using Elasticsearch and Kibana, helping reduce bug resolution time by 60%.
- Developed secure forms and APIs implementing role-based access control, field-level encryption, and audit logging.
- Supported containerization of legacy systems using Docker, standardizing deployment processes and reducing environmental inconsistencies.
- Used AMQP (RabbitMQ) to decouple services and improve fault tolerance during transaction-heavy operations.
- Delivered production-ready software with extensive unit and end-to-end test coverage using NUnit and Selenium.
- Documented design specifications, including sequence diagrams, deployment models, and system interfaces.

Decima Digital

Software Developer

November 2015 – April 2016

Tallinn, Estonia

- Contributed to internal tooling dashboards using JavaScript, SASS, and HTML, enhancing operational workflows across teams.
- Developed RESTful endpoints using ASP.NET WebAPI for integration with partner applications.
- Wrote data manipulation scripts and optimized stored procedures in MS SQL Server.
- Supported OAuth2-based SSO integration across client systems.
- Participated in daily Agile stand-ups, sprint planning, and retrospectives.
- Implemented Git-based version control practices across frontend/backend repositories.
- Maintained detailed changelogs and release notes.
- Ensured code adhered to OWASP security standards.

Borna Technology

Software Developer Intern

September 2014 – August 2015

Tallinn, Estonia

- Developed CRUD interfaces using AngularJS and Bootstrap for administrative systems.
- Supported .NET backend service development and gained experience with REST API creation.
- Conducted basic SQL tuning for reporting queries.
- Automated UI test cases with Selenium WebDriver.
- Created version-controlled documentation for team onboarding.
- Attended internal workshops on Agile and Git workflows.
- Shadowed senior engineers during code reviews and deployments.
- Participated in integration testing cycles and bug triage sessions.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ Microsoft Certified: Azure Developer Associate
- ❖ Certified Kubernetes Application Developer (CKAD)
- ❖ Scrum Alliance Certified Scrum Developer (CSD)

PROJECTS

- ✓ **KubeShop Admin Suite** – Designed and implemented a Vue.js SPA with Kubernetes-native backend using .NET Core. Included real-time logs, service health, and OAuth2-authenticated access. Deployed via Helm.
- ✓ **Messaging Orchestrator** – Created a microservice using RabbitMQ and .NET Core that handled AMQP queues for billing and notifications. Included retry strategies, error queuing, and performance monitoring.
- ✓ **Elastic Audit API** – Developed secure, role-restricted ASP.NET Core API with logging via Elasticsearch and access control through ADFS-integrated OAuth2 mechanisms.

- ✓ **ScrumBoard Pro** – Led frontend development with Vue.js and backend APIs in ASP.NET Core for a sprint planning tool used by 5 Agile teams across 2 countries.
