

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with over 9 years of hands-on experience building scalable web applications, APIs, and microservices using .NET Core, C#, Web API, and modern JavaScript frameworks. Skilled in backend system design, database modeling, and front-end integration using Vue.js and TypeScript. Proven success delivering cloud-integrated solutions, CI/CD pipelines, and data-driven platforms for global clients. Adept at cross-functional collaboration, clean code practices, and Agile methodologies.

TECHNICAL SKILLS

- **Languages:** C#, JavaScript, TypeScript, SQL, HTML5, CSS3
- **Frameworks:** ASP.NET Core, Web API, Entity Framework, Vue.js, Node.js
- **Databases:** MongoDB, SQL Server, PostgreSQL, MySQL
- **Tools:** Git, Docker, Jenkins, Azure DevOps, GitHub Actions
- **Concepts:** Microservices Architecture, RESTful APIs, CI/CD, Unit Testing, TDD, DDD
- **Cloud & DevOps:** Azure, AWS (basics), Infrastructure as Code, GitOps

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Developed distributed microservices in .NET Core for handling financial data ingestion, transformation, and API exposure with robust fault-tolerance and logging.
- Built scalable REST APIs using ASP.NET Core and Web API for mobile and web clients, ensuring compliance with security standards and data contracts.
- Led the implementation of a CI/CD pipeline using Azure DevOps and Docker to automate build, test, and deployment processes across staging and production.
- Integrated MongoDB and SQL Server to support both transactional and document-based workloads for internal analytics and user-facing dashboards.
- Introduced Vue.js for front-end modules in the admin portal, improving performance and usability for non-technical users.
- Conducted daily code reviews, introduced TDD workflows with xUnit and Moq, and mentored junior developers on backend development patterns.

- Collaborated with cross-country product teams to ship new features in biweekly sprints using Agile methodologies.
- Migrated legacy services to .NET 6 microservices, boosting API performance by 40% and simplifying deployment with containerization.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Built and maintained .NET Core microservices for marketing automation tools, handling email and SMS campaign scheduling through background jobs.
- Designed and optimized SQL Server stored procedures and queries, reducing campaign processing time by over 60% through index tuning and caching.
- Developed Vue.js-based UI components to allow marketers to define audience segments dynamically.
- Built integration layers for external APIs such as Mailchimp and Twilio, handling retries, logging, and API rate limits.
- Implemented JWT-based authentication and RBAC in backend APIs for secure access control across admin tools.
- Streamlined CI/CD deployments using GitHub Actions and Docker Compose for staging and production environments.
- Refactored legacy ASP.NET MVC apps to modern .NET Core solutions and modularized them for better maintainability.
- Participated in weekly technical planning with cross-functional teams to align deliverables with marketing roadmap.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Designed and built REST APIs using ASP.NET Web API and Entity Framework for a CRM and invoicing system.
- Led the migration of monolithic applications to microservices-based architecture, decomposing modules into isolated services.
- Created reusable Vue.js components to enhance user interaction on dashboards, forms, and reporting tools.
- Developed backend schedulers to generate monthly reports and PDFs with server-side templating and email delivery.
- Integrated MongoDB for storing flexible, unstructured documents and reduced relational dependency for several new modules.
- Collaborated closely with QA teams to define automated test strategies using NUnit and Postman for regression testing.
- Conducted internal training workshops for best practices in .NET backend development and microservice integration.
- Maintained detailed documentation of API specs, deployment processes, and troubleshooting guides.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Built internal tools in ASP.NET MVC and JavaScript for business analytics and reporting automation.
- Worked on client-specific customization for e-commerce modules with .NET and SQL Server.
- Participated in sprint reviews, requirement analysis, and implementation estimation with the local and offshore team.
- Enhanced customer profile management interfaces using Razor and jQuery for improved user experience.
- Contributed to unit test coverage of existing services, bringing critical modules up to 85% test coverage.
- Supported deployment and configuration scripts for IIS and SQL Server in staging environments.
- Provided on-call bug fixing support and rapid patch releases during UAT cycles.
- Delivered quick POCs for proposed new features to validate architecture feasibility.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Assisted in developing .NET Windows Forms and ASP.NET solutions for internal document management systems.
- Contributed to data validation, CRUD operations, and backend logic implementation in C#.
- Wrote SQL scripts for database seeding, backups, and basic reporting tasks.
- Helped debug UI issues across IE and Chrome using JavaScript and DevTools.
- Wrote technical documentation and user manuals for the developed tools.
- Learned Agile practices and participated in daily stand-ups and retrospectives.
- Collaborated with senior devs on testing and versioning strategies with Git.
- Contributed bug reports and fixes to shared modules used across teams.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ Microsoft Certified: Azure Developer Associate
 - ❖ MongoDB for .NET Developers – MongoDB University
 - ❖ Clean Architecture & Design Patterns in .NET – Udemy
-

PROJECTS

.NET Billing Platform API

- Developed modular microservices for billing, invoicing, and user account management. Integrated payment gateways and handled recurring subscriptions using event-driven patterns.

CI/CD for .NET Apps (Azure DevOps)

- Created and managed CI/CD pipelines for .NET Core apps with Docker, enabling rapid testing and zero-downtime deployments.

Vue.js Admin Panel

- Built a fully responsive admin dashboard in Vue.js integrated with .NET Core backend, including dynamic forms, filters, and data visualizations.
