

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-866410383/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Full-stack developer with 10+ years of experience designing, building, and scaling web and cloud applications across industries including construction, engineering, and digital solutions. Skilled in **React, TypeScript, C#, .NET Core, SQL/NoSQL, CAD integrations, and 3D visualizations**, with proven ability to deliver performant, user-centric systems. Adept at **cloud platforms (AWS, Azure, GCP)**, DevOps practices, and data visualization tools, while consistently contributing ideas that optimize processes and drive innovation.

TECHNICAL SKILLS

- **Frontend:** React, TypeScript, JavaScript (ES6+), Material UI, Redux, HTML5, CSS3, LESS/SASS, Webpack, Babel
- **Backend:** C#, .NET Core, Entity Framework, Node.js, REST APIs, GraphQL
- **Databases:** MS SQL, PostgreSQL, MongoDB, Redis, MySQL, NoSQL stores
- **Cloud Platforms:** AWS, GCP, Azure, Docker, Kubernetes, RabbitMQ, OAuth 2.0, JWT
- **DevOps & Tools:** Git, Jira, Confluence, Bitbucket, CI/CD pipelines, Terraform
- **Other:** CAD model integration, 3D visualization, AR/VR, Tableau, Power BI

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Led full-stack development of enterprise-grade applications with **React, TypeScript, and .NET Core**, integrating scalable APIs and ensuring seamless system-to-system communication.
- Developed CAD model processing pipelines, enabling visualization of **3D metadata inside React components** with support for interactive design exploration.
- Optimized SQL and NoSQL queries across **MS SQL, PostgreSQL, and MongoDB**, reducing response latency by over 40% in high-traffic, data-intensive applications.
- Collaborated with architects to implement **RabbitMQ message brokers**, supporting distributed event-driven systems across multi-cloud environments (AWS/GCP).
- Designed and delivered **JWT/OAuth 2.0 authentication flows**, enhancing platform security while ensuring compliance with enterprise security standards.
- Introduced **Webpack and Babel optimizations**, reducing frontend bundle sizes and improving load performance across devices and browsers.
- Worked closely with product and UI/UX teams to integrate **Material UI components**, ensuring accessibility and scalability across desktop and mobile platforms.

- Mentored junior developers, conducted peer code reviews, and established CI/CD pipelines with Docker and GitHub Actions, raising release velocity by 30%.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Developed **React and TypeScript dashboards** that visualized IoT and telemetry data, integrating APIs with Node.js backends and SQL databases.
- Built **.NET Core microservices** handling data synchronization between CRM and ERP systems, enabling real-time reporting across multiple clients.
- Integrated **Redis caching strategies** into API services, improving throughput and reducing server load under peak traffic conditions.
- Collaborated with clients in **engineering and construction sectors** to design tailored digital solutions leveraging CAD metadata visualization.
- Enhanced application scalability by deploying workloads to **AWS Elastic Beanstalk and GCP Compute Engine**, aligning with client cloud preferences.
- Implemented role-based access control using **JWT and OAuth 2.0**, securing APIs for enterprise-level customers.
- Designed data pipelines with **RabbitMQ event queues** for decoupled services, reducing system coupling and improving resiliency.
- Proposed new architecture patterns and technologies during POCs, enabling experimentation with **AR/VR integrations** in construction design apps.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Contributed to the design and development of **cloud-based planning applications** for construction firms, leveraging React and C#.NET backends.
- Built **CAD model integration services** that allowed seamless linking of 3D design files with pricing metadata and engineering project workflows.
- Enhanced performance of **MS SQL stored procedures**, optimizing query execution plans for real-time construction data dashboards.
- Collaborated with designers to build **3D model viewers using React, WebGL, and Three.js**, providing interactive visualization of building layouts.
- Implemented **SASS/LESS modular styling**, establishing reusable design systems for complex UI flows.
- Designed and deployed **microservices with Docker containers**, ensuring consistent environments across dev, staging, and production.
- Established CI/CD workflows in Bitbucket pipelines, integrating automated testing and deployment triggers.
- Introduced **Power BI dashboards** for financial and operational data, enabling leadership to make informed decisions based on real-time insights.

Decima Digital

Software Developer

November 2015 – April 2016

Tallinn, Estonia

- Assisted in building enterprise **.NET Core APIs** serving thousands of daily users in digital commerce solutions.

- Built frontend features using **JavaScript ES6 and React**, improving usability and reducing UI-related defects by over 20%.
- Designed normalized **SQL database schemas**, ensuring consistency and integrity across large datasets.
- Integrated **OAuth authentication systems** for secure login, ensuring compatibility with corporate SSO providers.
- Refactored legacy codebases to adopt **modular architecture with Git version control**, reducing merge conflicts and deployment issues.
- Participated in Agile sprints, delivering incremental value and collaborating with distributed teams across Europe.
- Collaborated with QA engineers to automate regression test suites, improving testing coverage and deployment confidence.
- Created documentation and best practices guidelines for efficient onboarding of junior developers.

Borna Technology

Software Developer Intern

September 2014 – August 2015

Tallinn, Estonia

- Supported senior engineers in developing **JavaScript-based web tools** that processed structured engineering metadata.
- Assisted in building **C#.NET APIs** that supported integration with early CAD design workflows, linking 3D objects with associated project metadata.
- Implemented simple **SQL queries and stored procedures**, enabling reporting dashboards for construction project managers.
- Learned and applied Git version control workflows, contributing to shared repositories across development teams.
- Explored 3D modeling libraries and experimented with **WebGL visualization of CAD data**, contributing to internal POCs.
- Built small-scale automation scripts in **Python** to streamline data imports into MS SQL Server.
- Documented feature requirements and participated in code reviews, developing professional engineering practices early on.
- Gained exposure to Agile methodologies, sprint planning, and cross-team collaboration.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- Microsoft Certified: **Azure Developer Associate**
 - AWS Certified **Solutions Architect – Associate**
 - Google Cloud **Associate Cloud Engineer**
 - Microsoft Certified: **Power BI Data Analyst Associate**
-

PROJECTS

- **3D Construction Planning App:** Developed a web app integrating **CAD models with React and .NET Core APIs**, enabling engineers to link design files with structured metadata and pricing.
- **Cloud Visualization Platform:** Built **AWS- and GCP-based services** for visualizing large datasets in construction projects, leveraging **Power BI** dashboards and Redis caching.
- **AR/VR Engineering Prototype:** Experimented with **WebXR and React integrations**, creating immersive visualization experiences for construction clients evaluating project layouts.
