

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Seasoned .NET Developer with 9+ years of experience delivering enterprise software solutions across the finance, marketing, and digital industries. Proven expertise in leading development teams, architecting scalable WinForms and C# applications, and implementing Clean Architecture and Domain-Driven Design (DDD). Adept at applying Test-Driven Development (TDD), threading using TPL, and automated testing to drive quality and performance. Excellent communication and mentoring skills, capable of fostering high-performing development teams and driving continuous improvement in Agile environments.

TECHNICAL SKILLS

- **Languages:** C#, .NET 6/7/8, ASP.NET Core, TPL, SQL, JavaScript
- **Frameworks:** WinForms, Entity Framework, LINQ, NUnit, xUnit
- **Architecture & Patterns:** Clean Architecture, DDD, TDD, MVVM, SOLID, CQRS
- **Testing:** Unit Testing, Moq, FluentAssertions, TDD strategy, Integration Tests
- **Tools:** Git, GitHub, Azure DevOps, Jira, ReSharper, Visual Studio
- **Databases:** MS SQL Server, Oracle, PostgreSQL, MySQL
- **CI/CD:** Azure Pipelines, GitHub Actions
- **Soft Skills:** Leadership, Mentorship, Agile/Scrum, Cross-functional Communication

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Spearheaded the development of high-performance .NET 6+ WinForms applications for a financial sector client, implementing multi-threaded workflows using TPL to optimize performance and responsiveness.
- Led a cross-functional team of 5 developers, introduced coding standards, performed code reviews, and facilitated the adoption of Clean Architecture and DDD principles.
- Devised and enforced robust unit testing strategies using xUnit and Moq, reaching over 90% code coverage and reducing production bugs by 40%.
- Refactored legacy codebases to .NET 6+, improving system scalability and aligning with modern architecture principles.

- Integrated secure authentication workflows and authorization patterns that complied with financial regulations and protected sensitive data.
- Collaborated with international teams across Europe to gather requirements, ensure on-time delivery, and continuously improve team productivity.
- Architected modular, reusable components and services to accelerate the rollout of new features in a CI/CD pipeline powered by Azure DevOps.
- Mentored junior developers in Agile ceremonies, design patterns, and debugging strategies, helping foster a culture of engineering excellence.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Delivered marketing automation tools using .NET Core, C#, and WinForms, integrated with custom internal frameworks to streamline campaign execution.
- Designed and implemented reusable architecture patterns (Repository, Factory, Adapter) that enhanced maintainability and testability across modules.
- Developed multi-threaded data processing tools with TPL to handle real-time data ingestion and transformation for analytics dashboards.
- Introduced automated testing using NUnit and FluentAssertions, establishing testing protocols and reducing defect escape rate by 50%.
- Participated in product roadmap discussions and introduced modern development workflows, including GitFlow and CI integration.
- Supported stakeholder demos and sprint reviews, translating technical progress into business value.
- Facilitated agile planning meetings and story estimations, ensuring backlog grooming aligned with delivery goals.
- Collaborated with QA and DevOps to deploy reliable releases on tight client deadlines with zero downtime.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Built financial record-keeping tools and reporting interfaces in WinForms/C#, introducing intuitive UI components to reduce user error rates.
- Refactored legacy systems with a DDD approach, promoting clear separation of concerns and reducing coupling in the business layer.
- Integrated MS SQL Server stored procedures with ORM (Entity Framework) for performance-tuned data access layers.
- Applied SOLID principles in daily development practices, leading to a noticeable drop in tech debt and easier onboarding for new developers.
- Wrote automated unit and integration tests using xUnit, continuously expanding the regression suite during feature growth.
- Conducted code reviews and provided architectural recommendations, fostering a peer-learning culture across the team.
- Ensured GDPR-compliant data handling in software used by financial clients across EU territories.
- Worked closely with PMs to define sprint scopes and delivered features within agreed timelines under Agile SCRUM methodology.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Developed internal business tools using C# and .NET Framework, with strong emphasis on modular architecture and maintainable code.
- Created customizable UI forms in WinForms, enabling client-specific branding and user configuration options.
- Integrated third-party APIs for financial transactions and client CRMs.
- Implemented logging and error tracking mechanisms to enhance observability and reduce downtime.
- Assisted in migrating legacy codebases to more testable and modern project structures.
- Worked alongside senior developers to align system design with company's scalability goals.
- Developed utilities to automate manual data import/export workflows from Excel to SQL Server.
- Ensured smooth release cycles using Git and manual release documentation.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Contributed to WinForms-based internal tools in C# under the guidance of senior developers, gaining practical experience in real-world software engineering.
- Developed helper libraries and reusable UI components that were adopted across multiple internal projects.
- Automated batch data processing tasks with multi-threading to speed up ETL workflows.
- Participated in team stand-ups, retrospectives, and code reviews to continuously learn Agile practices.
- Conducted functional testing and wrote detailed test plans for QA validation.
- Refined data input validations and error handling in finance modules to improve accuracy and resilience.
- Integrated Microsoft Access and Excel data sources with SQL Server for reporting applications.
- Delivered user-facing updates following UI/UX feedback sessions, applying clean design principles and consistency.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ Microsoft Certified: .NET Developer Associate
- ❖ Certified Scrum Developer (CSD)
- ❖ Clean Code & Refactoring Practitioner by DevIQ
- ❖ Test-Driven Development with .NET (Pluralsight Certification)

PROJECTS

- ✓ **Financial Portfolio Dashboard** – Sensidev (2023)
Led a cross-functional team to deliver a modular portfolio management system for financial analysts. Integrated multi-threaded TPL operations, implemented Clean Architecture, and ensured 95% test coverage via TDD.
- ✓ **Automated Trading Simulator** – Syscom Digital (2020)
Created a desktop simulation engine to test algorithmic trading strategies using WinForms and .NET Core. Incorporated threading, performance profiling, and test automation.
- ✓ **Banking Audit Toolkit** – Soft Build (2018)
Built a regulatory compliance toolkit with secure WinForms UI, dynamic reporting, and validation logic. Designed for seamless deployment and low-maintenance operation in banking institutions.
