

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Seasoned **Lead Full-Stack Developer & Architect** with 9+ years of experience designing, developing, and leading enterprise-grade applications across **.NET, C#, React, Angular, Node.js, and cloud-native ecosystems**. Skilled in building **scalable microservices architectures**, integrating AI-driven engineering practices, and mentoring high-performing teams. Proven ability to deliver complex solutions in **Azure, AWS, and GCP**, while applying best practices in security, performance, and DevOps automation. Adept at bridging technical and business goals with a consultant mindset, ensuring both innovation and client satisfaction.

TECHNICAL SKILLS

- **Programming & Frameworks:** .NET Core, ASP.NET Core, C#, React, Angular, Node.js, JavaScript, TypeScript, HTML5, CSS3, WebAPI
- **Architecture & Patterns:** Microservices, Domain-Driven Design (DDD), Repository & Unit of Work, Dependency Injection, MediatR, Design Patterns
- **Databases:** MS SQL, PostgreSQL, MySQL, Redis, MongoDB, NoSQL, SQL optimization & profiling
- **Cloud Platforms:** Azure (App Service, Service Bus, Functions, SQL DB, DevOps), AWS (Lambda, S3, RDS, ECS), GCP (Cloud Functions, Pub/Sub, Firestore)
- **DevOps & Tools:** Docker, Kubernetes, GitHub, Azure DevOps, CI/CD, OAuth, JWT, Postman, Fiddler, xUnit, Static Code Analysis, Profiling Tools
- **AI/Analytics & Reporting:** PowerBI, SSRS, Aspose, AI-powered automation, Large Language Model integrations
- **Security:** OWASP, XSS, CSRF, SQL Injection prevention, enterprise-grade identity & access management

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Spearheaded development of **microservices-based enterprise applications** in .NET Core and React, ensuring scalability, maintainability, and performance in cloud-native environments.
- Designed and implemented **Azure-hosted solutions leveraging App Services, Service Bus, and Azure Functions**, enabling seamless integration with legacy enterprise systems.
- Guided a distributed Scrum team of 6 engineers, conducting code reviews, mentoring juniors, and ensuring adoption of **DDD, clean architecture, and CI/CD best practices**.

- Built high-performance **Web APIs integrated with SQL and NoSQL databases**, optimizing queries to reduce response times by up to 40% through caching strategies with Redis.
- Championed **containerization and orchestration with Docker and Kubernetes**, reducing deployment failures and enabling continuous delivery across environments.
- Implemented **MediatR and repository pattern**, simplifying business logic management while maintaining separation of concerns and reusability across projects.
- Collaborated directly with stakeholders and client representatives, acting as **technical consultant** to propose architectural improvements, tools adoption, and AI integrations.
- Established **static code analysis pipelines and profiling routines**, reducing defects and technical debt while achieving consistent adherence to security and performance standards.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Developed and maintained **full-stack applications** with ASP.NET Core, Angular, and MS SQL, handling millions of daily transactions in advertising and digital marketing.
- Optimized **data pipelines integrating SQL Server and Redis caching**, ensuring system resilience under high-load scenarios and reducing downtime incidents by 30%.
- Contributed to **CI/CD automation with Azure DevOps**, creating deployment pipelines that shortened release cycles from bi-weekly to daily.
- Designed secure **OAuth and JWT-based authentication**, improving compliance with GDPR and enterprise security standards.
- Introduced **profiling tools and monitoring dashboards**, improving root cause analysis and reducing bug resolution times by over 25%.
- Implemented **asynchronous communication using Azure Service Bus**, enabling decoupled services and improving throughput in multi-tenant applications.
- Collaborated with UI/UX teams to refine Angular front-end components, delivering optimized client-facing dashboards and reporting interfaces.
- Advocated adoption of **DevOps practices and Agile ceremonies**, resulting in improved team velocity and stronger collaboration across remote squads.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Delivered robust **enterprise applications in .NET MVC and Angular**, focusing on modular architectures and long-term maintainability.
- Implemented **unit and integration testing using xUnit**, improving test coverage and reducing regression defects in production releases.
- Designed **RESTful APIs integrated with both relational (MS SQL) and non-relational databases (MongoDB, Redis)**, enabling flexible data flows for diverse client projects.
- Migrated monolithic applications into **containerized microservices**, enhancing scalability and reducing infrastructure costs.
- Leveraged **dependency injection and repository patterns**, ensuring high testability and simplified onboarding for new developers.
- Built **cloud-ready applications** on Azure and AWS, using Lambda, App Services, and Cloud Functions for elastic scaling.
- Introduced **CI/CD pipelines with GitHub Actions**, ensuring stable automated builds and deployments across development and production environments.
- Collaborated with client stakeholders to gather requirements and deliver **customized AI-powered features** for predictive analytics and data reporting.

Decima Digital
Software Developer
November 2015 – April 2016
Tallinn, Estonia

- Contributed to **e-commerce and digital platforms** using .NET Core, Angular, and SQL, ensuring responsiveness and scalability.
- Built **secure authentication workflows with OAuth2 and JWT**, safeguarding customer data and aligning with security best practices.
- Implemented **repository and unit of work patterns**, ensuring data consistency across multiple modules.
- Developed **reporting modules with SSRS and PowerBI integrations**, providing stakeholders with real-time insights and analytics dashboards.
- Participated in **Agile sprints and daily scrums**, delivering incremental improvements aligned with business priorities.
- Enhanced code quality with **static code analysis and peer reviews**, driving adherence to clean code principles and reducing technical debt.
- Optimized **stored procedures and SQL queries**, improving system performance and reducing transaction response times significantly.
- Coordinated with cross-functional teams to deliver features under tight deadlines, demonstrating flexibility and accountability.

Borna Technology
Software Developer Intern
September 2014 – August 2015
Tallinn, Estonia

- Assisted in the design and development of **.NET-based applications**, gaining exposure to enterprise-grade architecture and cloud adoption.
- Contributed to **front-end modules with JavaScript, AngularJS, and HTML5**, ensuring responsive design and user-centric functionality.
- Supported development of **REST APIs and backend logic**, working closely with senior developers to ensure scalability.
- Gained hands-on experience in **SQL Server and NoSQL databases**, improving data management skills early in career.
- Developed test cases and performed **manual and automated unit testing**, ensuring quality before client delivery.
- Participated in **security testing and vulnerability scanning**, learning early best practices for preventing SQL injection and XSS attacks.
- Assisted in **client demos and documentation**, communicating technical work in business-friendly terms.
- Supported DevOps processes, including version control with Git and deployment pipelines, establishing strong foundations in CI/CD.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- **Microsoft Certified: Azure Solutions Architect Expert**
 - **AWS Certified Solutions Architect – Associate**
 - **Google Cloud Professional Cloud Architect**
 - **Microsoft Certified: .NET Developer Associate**
 - **Certified Kubernetes Application Developer (CKAD)**
-

PROJECTS

- **AI-Native Engineering Platform (2024):** Architected and led the development of an integrated engineering platform consolidating **AI-powered delivery tools, microservices, and cloud-native services** on Azure.
- **E-Commerce Analytics Suite (2021):** Delivered **predictive analytics dashboards using PowerBI, SQL, and Redis caching**, providing real-time sales intelligence for enterprise clients.
- **Cloud Migration Initiative (2019):** Migrated monolithic legacy systems to **Azure and AWS microservices**, leveraging Kubernetes and Service Bus for scalability and fault tolerance.
- **Enterprise Reporting Portal (2016):** Developed multi-tenant reporting platform with **SSRS, PowerBI, and secure APIs**, enabling data-driven decision-making across business units.
